

ADMINISTRATION PROGRAM GOES

Republican "Regulars" and "Insurgents" Agree to Put Shouder to Wheel and Push.

CAUCUS WILL BE SUPREME.

Will be No Conflict Between the Recalcitrants and the Committee on Rules.

Washington, Feb. 2.—The administration program as revised today by leaders of the senate and house and given the stamp of White House approval, comprises the following legislation:

Statehood for Arizona and New Mexico in the form of the senate bill, which provides for ratification by Congress of the constitutions of the new states after approval by the president.

Postal savings banks with safeguards against funds being transferred from sections where originally deposited to the money centers.

Giving the president authority to withdraw from entry public lands desired for conservation purposes or for classification, the withdrawals to remain in force until revoked by him or by acts of Congress.

Federal incorporation open to the voluntary application of concerns engaged in interstate business and willing to subscribe to federal regulation.

Creating a legislative council for Alaska, members to be appointed by the president.

Later in the session it may be decided to make additions to the administration program by adding sections now deemed of secondary importance.

For instance, President Taft has told his advisers that he is inclined to come out strongly for ship subsidy in some form, and it is possible he also may urge the passage of the bill providing assurances of indebtedness to the amount of \$20,000,000 to provide money to carry on reclamation work.

All Republican members on the senate committee in advance had a meeting today in advance of the regular session. Some plain talk was indulged in by Chairman Aldrich on the situation in which the Republican party has found itself by opposition bodies were recovered, bringing the total up to 65, while three others have died in the hospital, making the grand total of victims thus far 68.

The toll of human life which paid the penalty of negligence on the part of some miner, according to latest reports, is placed at 68. After an official report showing 53 dead, 12 additional bodies were recovered, bringing the total up to 65, while three others have died in the hospital, making the grand total of victims thus far 68.

An explosion occurred in No. 3 shaft of the coal mine of the Esperanzas Mining company, and it is attributed to the ignition of gas from the flame of a cigarette of a miner, smoking contrary to the rules.

The miners, mostly Mexicans and Japanese, had assumed their places in the different workings just after 7 o'clock.

At 8:30 o'clock those at work above ground heard a loud explosion, and almost instantly a vast cloud of dust and smoke issued from the mouth of the shaft.

When the onlookers realized the meaning of the disaster assistance was immediately forthcoming. As soon as the air in the shaft could be purified sufficiently to permit rescuers to descend, many volunteers were offered to risk their lives in an endeavor to succor their stricken brothers below.

Cages were immediately sent down, loaded to their capacity with miners' tools, and the rescue work was begun. On the first and second levels, everything was found intact and the men working in these levels were safe.

The rescue party went down to the third level, and as soon as the air could be sufficiently cleared they entered the various drifts and began a search for the dead. Scattered about in various positions in the workings they found the bodies of the victims, and their faces indicating the bitter fight they had waged to reach pure air and safety.

The rescuers worked in relays, searching for their dead and dying companions.

After six hours' work, 53 bodies had been brought to the surface, while nearly 40 injured men had been removed to hospital care and others were being treated for their wounds.

Most of the killed were Mexicans, the Japanese employed in the other parts of the mine.

State representatives sent a detailed report of the explosion, and a deduction as to probable cause—the explosion of mine lamps and the governor of Coahuila and Saitillo. They instructed the local authorities to take such action as they deemed necessary and to investigate thoroughly the cause of the disaster.

The mining company officials lost no time in making provision for the injured. An order was telegraphed to Eagle Pass and Monterey for coffins for the dead, and money and food has been provided for the suffering families.

The Palau mine is one of the best equipped coal mines in the republic. It has an adequate ventilating system, is provided with electric lights, and mining officials are utterly at a loss to account for the presence of mine damp in No. 3 workings.

Mr. E. A. Kelley, Belvidere, Ill., writes us: "I am an ex-employee of 22 years' active service to my credit. About three years ago my kidneys were affected so that I had to give up my mine. First I was troubled with severe aching pain over the hips. Then followed inflammation of the bladder, and specs appeared before my eyes. A sample of Foley's Kidney Pills that I tried, so benefited me that I bought more. I continued to take them until now I can safely testify they have made me a sound and well man." HOUSE AND SENATE INQUIRIES INTO THE COST OF LIVING

Washington, Feb. 2.—Two independent investigations into the high cost of living will be conducted by committees of the senate and house.

The first step toward the proposed inquiry in the senate was taken today when Senator Lodge presented a resolution providing for it. The resolution was introduced at the request of the interstate commerce commission, which insures its adoption. It provides for a committee of five.

The inquiry will include an investigation into the cost of the necessities of life with an especial view to determining whether there has been an increase during the last 10 years. It is also directed that it shall cover the question of wages with a view of ascertaining whether there has been an increase.

The resolution was referred to the committee on finance, which will report it back promptly. The house inquiry will be conducted by the ways and means committee.

Frankly admitting fear that a prolonged investigation of the increased cost of living by the ways and means committee of the house, or as provided by any rival resolution, might drag throughout the summer and work to the disadvantage of Republicans in elections next fall, the senate finance committee today formulated a program for a quick, sharp inquiry.

This important question was considered by Republican members of the committee, and as a result Senator Lodge introduced in the senate a resolution providing for the appointment of a committee of five senators to do the work.

Suggestion was made that the proposed investigation by the ways and means committee of the house would accomplish every purpose, but the resolution introduced by Chairman Payne yesterday was characterized as a "dragnet."

The opinion was expressed generally that such an inquiry as was proposed by the house would not be concluded in time to be of assistance to Republicans in their campaign for re-election.

Senator Lodge after reemphasizing

any woman should use water upon her hair oftener than once in two months," says M. Fournier, the noted French scientist. Dry powder only should be used. Moisture causes the hair to lose its color and in time become thin.

Any woman desiring abundant, lustrous hair should use a dry shampoo every two or three days. Mix four ounces of ether, orrris root with four ounces of theriac. Sprinkle about a tablespoonful of this mixture upon the head; then brush the powder thoroughly through the hair. This will keep it soft and fluffy, and beautifully lustrous. You will soon see new hair starting to grow. I am sure will produce a growth of hair. While wash orrris root is used as a dry shampoo by many women, still, no such results can be obtained as by using the formula I have given.

Washington, Feb. 2.—One of the greatest disasters in the history of Mexican coal mining took place early today in the Palau mine at Las Esperanzas, Mexico.

The toll of human life which paid the penalty of negligence on the part of some miner, according to latest reports, is placed at 68. After an official report showing 53 dead, 12 additional bodies were recovered, bringing the total up to 65, while three others have died in the hospital, making the grand total of victims thus far 68.

An explosion occurred in No. 3 shaft of the coal mine of the Esperanzas Mining company, and it is attributed to the ignition of gas from the flame of a cigarette of a miner, smoking contrary to the rules.

The miners, mostly Mexicans and Japanese, had assumed their places in the different workings just after 7 o'clock.

At 8:30 o'clock those at work above ground heard a loud explosion, and almost instantly a vast cloud of dust and smoke issued from the mouth of the shaft.

When the onlookers realized the meaning of the disaster assistance was immediately forthcoming. As soon as the air in the shaft could be purified sufficiently to permit rescuers to descend, many volunteers were offered to risk their lives in an endeavor to succor their stricken brothers below.

Cages were immediately sent down, loaded to their capacity with miners' tools, and the rescue work was begun. On the first and second levels, everything was found intact and the men working in these levels were safe.

The rescue party went down to the third level, and as soon as the air could be sufficiently cleared they entered the various drifts and began a search for the dead. Scattered about in various positions in the workings they found the bodies of the victims, and their faces indicating the bitter fight they had waged to reach pure air and safety.

They instructed the local authorities to take such action as they deemed necessary and to investigate thoroughly the cause of the disaster.

S.S.S. NATURE'S CURE FOR RHEUMATISM

In a disease so painful as Rheumatism, medicines containing opiates and nerve-quieting drugs are often used. Such treatment is dangerous not only because it frequently causes the sufferer to become addicted to the drug habit, but medicines of this nature are always injurious to the system. Rheumatism is a disease of the blood, and its cure depends entirely upon a thorough purification of the circulation. As long as the blood remains saturated with uric acid, an inflammatory condition of the nerves, muscles and tendons of the body will exist, and the pains, aches, soreness, and hot, feverish flesh of Rheumatism will continue. The only safe and sure cure for Rheumatism is S. S. S. It is nature's remedy for this disease, made entirely of the healing, cleansing juices and extracts of roots, herbs and barks from the natural forests. S. S. S. does not contain anything that is in the slightest way injurious to the system. It is absolutely and purely vegetable, and free from opiates or sedatives of any kind. S. S. S. cures Rheumatism by removing the uric acid from the circulation, it makes the blood pure, rich and healthy so that instead of depositing sharp, uratic impurities into the muscles, nerves, joints and bones, it nourishes every portion of the body with natural, healthful properties. Book on Rheumatism and any medical advice free to all who write and request it.

MINING DISASTER IN OLD MEXICO

Sixty-eight Men Killed in Explosion at Palau Mine at Las Esperanzas.

CAUSED BY CARELESSNESS.

Gas Ignited From Flame of Cigarette Of Miner Who Was Smoking Contrary to Rules.

Laredo, Tex., Feb. 2.—One of the greatest disasters in the history of Mexican coal mining took place early today in the Palau mine at Las Esperanzas, Mexico.

The toll of human life which paid the penalty of negligence on the part of some miner, according to latest reports, is placed at 68. After an official report showing 53 dead, 12 additional bodies were recovered, bringing the total up to 65, while three others have died in the hospital, making the grand total of victims thus far 68.

An explosion occurred in No. 3 shaft of the coal mine of the Esperanzas Mining company, and it is attributed to the ignition of gas from the flame of a cigarette of a miner, smoking contrary to the rules.

The miners, mostly Mexicans and Japanese, had assumed their places in the different workings just after 7 o'clock.

At 8:30 o'clock those at work above ground heard a loud explosion, and almost instantly a vast cloud of dust and smoke issued from the mouth of the shaft.

When the onlookers realized the meaning of the disaster assistance was immediately forthcoming. As soon as the air in the shaft could be purified sufficiently to permit rescuers to descend, many volunteers were offered to risk their lives in an endeavor to succor their stricken brothers below.

Cages were immediately sent down, loaded to their capacity with miners' tools, and the rescue work was begun. On the first and second levels, everything was found intact and the men working in these levels were safe.

The rescue party went down to the third level, and as soon as the air could be sufficiently cleared they entered the various drifts and began a search for the dead. Scattered about in various positions in the workings they found the bodies of the victims, and their faces indicating the bitter fight they had waged to reach pure air and safety.

The rescuers worked in relays, searching for their dead and dying companions.

After six hours' work, 53 bodies had been brought to the surface, while nearly 40 injured men had been removed to hospital care and others were being treated for their wounds.

Most of the killed were Mexicans, the Japanese employed in the other parts of the mine.

State representatives sent a detailed report of the explosion, and a deduction as to probable cause—the explosion of mine lamps and the governor of Coahuila and Saitillo. They instructed the local authorities to take such action as they deemed necessary and to investigate thoroughly the cause of the disaster.

The mining company officials lost no time in making provision for the injured. An order was telegraphed to Eagle Pass and Monterey for coffins for the dead, and money and food has been provided for the suffering families.

The Palau mine is one of the best equipped coal mines in the republic. It has an adequate ventilating system, is provided with electric lights, and mining officials are utterly at a loss to account for the presence of mine damp in No. 3 workings.

Washington, Feb. 2.—The union has an iron clad agreement with the merchants, whereby no apprentices may be put at work in the factories except sons or brothers of men now employed in the work. Merchants asked the union to sign an agreement that no further advance in wages would be required for two years, but their request was denied. The union has 400 members in this city.

Washington, Feb. 2.—Interesting comparative facts are disclosed in a study of immigration to the United States for the seven years ended June 30 last, in which time 5,617,155 aliens were admitted, more than 70 per cent of whom came from southern and eastern Europe and western Asia, composed largely of southern Italians, Greeks, Hungarians, Hebrews, Roumanians, Slavs, Bulgarians, Turks, Armenians and Syrians.

The addition to the population in those seven years was nearly a million more than the combined population of California, Oregon, Washington, Idaho, Nevada, New Mexico, Colorado, Wyoming, Montana, the two Dakotas and Nebraska—5,878,735.

Estimates are that immigration to the United States in the present fiscal year will aggregate more than 900,000.

Washington, Feb. 2.—A lively political debate occupied nearly the entire time of the house today in the consideration of a bill to amend the census law, so as to provide an enumeration of animals slaughtered in country butchering establishments and of hides produced in such establishments.

Mr. Crumpacker of Indiana explained the bill, telling one of his constituents that this amendment was to give accurate information on a subject upon which there had been much political speculation.

With this amendment and others providing for an enumeration of land under irrigation and in relation to irrigation projects the bill was passed.

Reading a letter said to have been written by Representative Crowe of Missouri, telling one of his constituents that if he should receive an appointment as a census enumerator, he would have to ascertain the relative strength of the "insurgents" and regular Republicans, Representative Robinson of Arkansas attacked the census bill.

The letter was in the form of a newspaper clipping and contained the statement that the work the census enumerator would have to do would be "such as any enthusiastic Republican would be glad to do, and not in any way conflict with their duty as an enumerator."

It also stated that this work would be outlined to the candidate before his appointment, so that he need not accept the appointment if he did not desire to do what would be asked of him.

UP GOES PRICE OF DIAMONDS.

New York, Feb. 2.—The retail price of diamonds is to be raised from \$5 to \$10 a carat, because of an advance of 12 1/2 per cent in wages just granted by the Madden Lane diamond merchants to members of the American Diamond Cutters' Protective association.

The average wage paid to polishers is \$60 per week. The workmen known as "bruters" who shape the diamonds, receive \$50 a week. "Cleavers" of

Electropodes POSITIVELY CURE Rheumatism

A remarkable Electric Device, that is relieving countless people of the pains and causes of Rheumatism. Now within reach of every sufferer.

A NEW ELECTRIC TREATMENT

Electropodes are metal insoles, worn in the heels of the shoes. One is a negative and one a positive plate. The body becomes the battery, the nerves the connecting wires—over which a gentle flow of electricity passes, building up the entire system.

What They Cure: Rheumatism, Neuralgia, Headache, Kidney Trouble, Backache, Weak Heart, Sleeplessness, Lumbago, Stomach and Liver Complaints are positively cured. Electropodes or money refunded.

Your Protection: Your Druggist signs a contract to refund the \$1.00 you pay him for Electropodes if they fail to effect a cure, or if they should, after 30 days' free trial, prove unsatisfactory.

Electropodes are available. If your druggist cannot furnish them, send us \$1.00 and we will see that you are supplied. In ordering, state whether for lady or gentleman.
