

Mining, Business and Stocks.

Little Bell Issues Financial Statement

Management Sends Out Report With Dividend Checks Being Mailed To Stockholders Today.

Accompanying the dividend checks to stockholders of the Little Bell Consolidated Mining company, which are being mailed today, is a financial statement of the condition of the company.

The annual meeting of the stockholders was held at Cheyenne last week, at which time the trustees, three in number, were re-elected. They are Solon Spiro, president and general manager, Sidney M. Benberger, vice president and treasurer, and Herman Benberger, trustee. The board chose J. B. Bean to continue as secretary of the company.

In the statement sent out Solon Spiro says: "During the quarter ending Feb. 28, 1910, dividend No. 2 of 5 cents per share was declared, payable March 22, amounting to \$10,000, and check for which is enclosed herewith.

"The net earnings during this period amounted to \$40,957.74 which, after meeting the dividend requirement, shows an increase of \$5,083.74 in your surplus.

"Conditions at your property are very encouraging, and developments continue to meet our most sanguine expectations. I look forward to a long and uninterrupted period of prosperity.

"The mine product for this quarter shows quite an improvement in values while the mining costs have been materially reduced owing to more systematic methods.

"The amount of ore extracted since the last statement issued with the dividend checks was 1,428 dry tons, which yielded 694,733 pounds of lead, 108,629 ounces of silver, 67.64 ounces in gold, 55.11 pounds of copper, all of which sold for \$68,113.70.

"The average value per ton of ore extracted was 21.18 per cent lead, 75.66 ounces silver, .0471 of an ounce in gold, 1.28 per cent copper, making a total of \$46.30.

"The following were the receipts and disbursements from Nov. 30, 1909, to Feb. 28, 1910, according to Secy. Bean:

Table with columns: RECEIPTS, DISBURSEMENTS, and TOTALS. Includes items like Cash on hand, Ore sales, Mining supplies, Labor and salaries, etc.

"Cash on hand represents the net amount remaining after allowing for February payroll and all other expenditures to March 1, 1910.

Trading Continues Good

Iron Blossom and Sioux Develop Strength on Local Board. Good trading on the local stock exchange hung over for another day today, although there was quite an amount of activity in the market.

Prices were stronger and higher. Tintic securities were the main feature of the market and advances were noted in Carissa, Iron Blossom, Lower Mammoth and Sioux.

The present extraction from the Lower Mammoth property has caused considerable activity in the stock. In two months the company took out over \$40,000 in dividends once upon a time, and it is declared there is no reason why this performance cannot be repeated.

Carissa reached 70 cents this morning. Colorado remained unchanged. Iron Blossom mounted to 46 cents, high 45 cents and held out strong at the price. Sioux, which was the feature of the market climbed up to 45 cents. The changes in Iron Blossom and Sioux are due to the reported strikes at each of the properties.

The total number of shares disposed of on the local exchange this morning was 31,399, while the amount represented by the transactions was \$11,683.50.

The cash market Opeex showed considerable activity again. It was lower than yesterday. The sales on the curb this morning were 1,600 shares of Opeex at 46 cents, 1,000 shares of Ely Centennial at 30 cents, 700 shares of Opeex at 47 cents, 100 at 49 cents at 50 cents, 1,000 shares of McDonald Ely at 30 cents.

Goldfield Con. Doing Better

Makes Better Savings and Puts More Ore in Sight. General Manager J. H. Finlay of the Goldfield Consolidated in his report for February...

This tonnage averaged \$38.58 per ton, and an extraction of 25 per cent was made, giving a loss in the tailings of \$45.62. Including this loss, the total earnings for the month were \$24,432, giving the company a net profit of \$45,498, a profit per ton of \$20.81. In closing his report, Mr. Finlay says:

"This record is satisfactory in comparison with that of January. The mine produced ore of more uniform grade and at lower cost. The mill treated a larger tonnage, with a better extraction. The company realized larger daily profits and a higher percentage of profit on the ore mined.

"The mill had a particularly good showing. The cost showed no reduction on account of the expense of repairing the fire loss of January, but it showed the best extraction in its history, both on crude ore and concentrate. The extraction of 25 per cent concentrate plant for the latter two-thirds of the month exceeded 50 per cent.

"The advance in the various mines was as follows: Combination, 419 feet; Mohawk, 755 feet; Clermont, 1,135 feet; Red Top, 1,650 feet; total, 3,959 feet. Mr. Finlay estimates that the amount of ore put in sight during the month was 51,700 tons of a probable value of \$22 a ton.

Copper at Bloomington

(Special to The News.) Bloomington, Washington County, March 22.—The discovery of copper ore here has caused an extraordinary excitement. Every portion of the territory that even contains a copper vein is being staked out. The ore has thus far been discovered in fairly high in copper and contains values in gold and silver. It was unexpected that copper existed in the country and hence the discovery was made hundreds of times without knowing that good ore values were there.

Gets Good Assays

Buckley Mine Near Provo Is Showing Up Some Excellent Ore. (Special to The News.) Provo, March 22.—Mat Clemmens of Park City, who is connected with the Buckley mine in the Buckley mine in Provo canyon last week. He was greatly pleased with the property and he took five samples over a distance of about 400 feet in the upper tunnel. They were analyzed but the showing made was exceptional for the distance. The assays were reported to Mr. Buckley by Mr. Clemmens were:

Table with columns: Lead, Silver, No. 1, No. 2, No. 3, No. 4, No. 5. Shows assay results for different samples.

Centennial Machinery Is Nearly Installed

Newhouse Tunnel Will Be Used to Work Ely Calumet and McDonald Ely Properties—Pushing Work. Work at the Ely Centennial is pushing ahead in a lively manner and some big things may be expected from the property according to Harry B. Cole, who has just returned from an inspection of the ground. Mr. Cole is pleased to the point of enthusiasm over the showing the company is making and the exterior indications of great ore bodies. Mr. Cole is exhibiting a large piece of native copper taken from the ore at the property.

The new machinery, which was recently purchased, has been nearly installed. The engine is running and all that is left to be put in are the machine drills and the air pipe. The electric light plant will be working within a day or so.

The tunnel at the property has been named the Newhouse tunnel, in honor of Samuel Newhouse, who is the largest individual stockholder. The tunnel is now in a distance of 50 feet and it is expected that it will have to go 200 feet further before reaching the big vein. At that distance a depth of 50 feet will be secured on the ore body opened up by the short shaft sent down in one of the veins.

As soon as the ore body is reached, raising, drifting and sinking will be started. The tunnel will also be used for the development of the McDonald Ely property to the west and the Ely Calumet to the east.

The ore body in the shaft was 14 1/2 feet wide and was widening with depth. The grade of the ore was 1 1/2 per cent shipping quality. It is estimated that the tunnel level, which seems most certain, the company will have a large body of shipping ore at once, so that work can commence as soon as the ore body is reached. This is believed to be about 60 days away. Good smelting rates have been offered for the ore already found.

Jarbridge Will Boom

Salt Laker Expects Much From Nevada Gold Camp. W. E. Bays of Salt Lake, who has done considerable mining in most of the western states, writes as follows from Jarbridge under a recent date:

"I never saw a country that was quite as promisingly mineralized as Jarbridge, and I pronounce it a sure winner. That this is going to be a booming camp in the spring, I am satisfied. The outlook for Jarbridge is bright. Money put in town now will be doubled by spring. All kinds of opportunities to make money—best opportunities—will be offered.

"I would have written before, but my baggage was mislaid and I had no stationery. A man couldn't get anything in the way of stamps. Stamps are scarce, as there is no postoffice closer than Three Creek, 30 miles away.

"Wages are \$3 a day, or \$3.50 and board. Flour \$11 a sack; bacon 85 cents a pound, and everything else in proportion. A new store has opened up and is cutting prices the past few days.

"At present it is impossible to do anything with our claims on account of so much snow. We have not had any rain today and the snow is disappearing fast and we can soon get into the hills. I saw a fine string of gold in a pan level, showing from the Stevens and Greenwell property.

"More miners will be put to work soon as the snow melts sufficiently so that men and supplies may get up into the hills.

"I can send you a letter only when I have a chance to get somebody to take it out of camp. We have not had a mail in for five or six days, but we are all living in hopes of some mail coming in tonight. A bridge has been washed out between the old and new camps that is holding the mail back."

Montezuma Is Bankrupt

New York, March 22.—An involuntary petition in bankruptcy has been filed against the Montezuma Mining Company, a Maine corporation with principal offices in this city. The petitioning creditors' claims aggregate about \$75,000. The assets of the company are given as \$2,968,032, consisting of the mining claims and plant at Montezuma.

Strike at Sioux

Iron Blossom Said to Have Encountered Ore in South Shaft. According to reports from Tintic this morning, strikes have been made in both the Iron Blossom and Sioux properties. Besides that the North Colorado has an excellent showing in its new shaft at a depth of 50 feet.

The strike at the Sioux was made yesterday. A drift run southeast toward the Crown Point property encountered what was supposed to be a new ore body. Further work on the ore is declared to have shown that it is an extension of some of the old ore bodies. The ore was encountered between the 350 and 400-foot levels. The grade of ore is declared to be a lower grade than the present shipping ore. It is the most encouraging situation for the Sioux. It is said. Further that it is Crown Point in an excellent position.

Another strike is reported to have been made in the No. 1, or south shaft of the Iron Blossom. This is the deep working shaft. It is reported that the company is now shipping considerable low grade ore.

In the No. 3 shaft drifting is still going on at the 500 foot level to intersect the big rich ore body at that depth. The company is also shipping out considerable high grade ore from this workings.

The North Colorado, in which Joseph Wirtlbin and John Rounly are heavily interested, is reported to have an excellent showing in the bottom of the 50-foot shaft. The ground is highly mineralized and Mr. Rounly is confident that it will make ore shortly. The property is about two miles north of the Colorado and along the line of the Colorado-Sioux fissure.

Concentrates

M. A. King and Lindsay Fuddie have gone to New York in the interest of the property.

We beg to announce that we have installed the

Duplex Wire Service

of E. F. Hutton & Co., members New York Stock Exchange, etc., giving special attention to Copper Quotations and offering perfect facilities for execution of orders in New York stocks and cotton. Boston coppers and Chicago grain.

Badger Brothers

BROKERS 160 Main Street

The Silver Island Coalition Mines company.

John H. Cook of Pioche is at the Cheyenne hotel.

L. N. Morrison leaves today for Beaver county.

H. B. Cole leaves tomorrow for New York on mining business.

The La Rose Mining company has just declared a dividend of 2 per cent.

Stockholders of the Inlay Mining company will have received word that the plant started up last Saturday under the direction of Morris P. Kirk.

Barney O'Neill, Wallace, Ida, chairman of the Republican state central committee, and Ed. prominent mining man is visiting Col. George W. E. Dorsey.

The output for the First National Copper company for the month of February was 88,102 pounds of copper, 81,111 ounces of silver and 2,518 ounces of gold.

Manager Thomason of the Ely Valley Mining company leaves shortly for England to confer with his associates. He is accompanied by J. H. East of the mine there is a five-foot vein of 17 per cent copper ore.

The following were the Tintic quotations received this morning from the Denver office of James A. Pollock & Co., private wire: Carissa, 59 bid; Iron Blossom, 57@58; Sioux, 38@42; Iron Blossom, 92@96.

The latest reports from the Rye Patch Consolidated say that the ore body, which was recently encountered, is better than 25 feet wide. Reports from there say that it has been crossed for that distance and only one vein is in sight.

With good weather it is believed that the Nevada Consolidated will produce 6,000,000 pounds of copper for the month of March. For February the company practically produced 5,000,000 tons. From 130 to 140 cars a day were handled from the Copper Flat pit.

W. D. Nebecker, who for the past four years has maintained a brokerage office in the D. F. Walker building, has moved to new quarters at 22 Exchange building. Mr. Nebecker now has excellent quarters for the transaction of his business and the accommodation of his patrons.

The management of the Tintic Standard is well pleased with the showing that is being made in the mine sunk in a cross fissure on the 700-foot level. The mine was sent down about 20 feet from the surface at a depth of six feet the quartz is becoming more solid. At a depth of 15 feet it is due to catch the quartzite-limestone contact.

The disposal of the increased capitalization of the Utah Copper stock has been figured out as follows:

Table with columns: Shares, Amount. Lists various stock transactions.

Business and Realty

The Utah Lumber company has purchased the old Burton property at the 134-136 south Second West street, the price being \$100,000. The property is on the corner of Second West, running 155 feet into the block Tuttle Bros., acting as agents. It is understood the lumber company has in view extensive improvements.

Settlers on Irrigation Projects May Assign Claim

(Special to The News.) Washington, D. C., March 22.—House committee on irrigation has agreed to a favorable report on the bill to permit settlers on irrigation projects to assign their interests to qualified homesteaders. It took favorable action on the bill to grant settlers leave of absence from their claims on the condition that they turn over to irrigation ditch. The first bill has already passed the senate.

Postmasters Appointed

(Special to The News.) Washington, D. C., March 22.—Postmasters appointed: Utah—Giles, Wayne county, Florence E. Robinson, vice J. H. Elliott, resigned. Wyoming—Cold Springs, Converse county, O. S. Marshall, vice M. Dawes, resigned.

University News

The senior class will appear in their regalia and gowns for the first time on Tuesday night. There are a great number of the students who are acquiring religion for the occasion. Judge Powers will make an address. A. A. Anderson, president of the class, will have something to say, and there will be music selections. There is to be a reception in the library building in the afternoon, a matinee dance in the gymnasium from 4 to 6, and the day will wind up with a box party at the Orpheum on night.

Nevada Consolidated Opening New Pit

Developments at the Nevada Consolidated Copper company are more progressive than ever. A special dispatch from there says that a drill hole in the bottom of the pit found ore to the depth of 114 feet. The four steam shovels now taking out over 7,000 tons of ore a day, and getting close to 5 per cent copper ore.

The drill holes are finding that the overburden has almost disappeared in the new ground being prospected. The overburden was growing greater for a while, but ore is now being found within a short distance of the grass roots.

The company is now working four shovels on ore and only three on overburden.

The company is getting ready to open up its second ore pit. This it is expected will be ready by the time the concentrator has added an additional unit and the capacity of the smelter is enlarged. Work on all three of these propositions is going ahead as rapidly as possible.

Charge of Burglary Faces Roost Thieves

Complaints Issued From County Attorney's Office Against Chicken Raiders This Morning. Complaints were issued from the county attorney's office this morning charging J. W. Peterson, Marie Peterson and Harry Creswell with burglary in the second degree, for chicken stealing. Officer F. M. Wheeling is the complaining witness, and it is charged that on the night of March 10, 1910, Marie Peterson entered the chicken coop of Oscar Egan, at 1415 Richards street, and stole 10 chickens. J. W. Peterson is charged with having unlawfully extracted 14 hens and one rooster from the henroost belonging to Benjamin Coulson, at 551 First East on the night of Feb. 17, and on the same night Harry Creswell, it is claimed, stole 14 hens from the premises of F. Stewart, at 612 and 818 South. The defendants will be arraigned in Judge Bowman's court.

Kallias Case Drags On

The trial of Jim Kallias on the charge of buying stolen property, is still going on before a jury in the criminal division of the city court. The prosecution has not put on all of its evidence and the case will not be concluded before Wednesday. Kallias is charged with buying groceries and tobacco from delivery boys last December and January.

Minnow in Milk Can

Deputy H. C. Smith of the Pure Food bureau says that in emptying a can of milk up in Weber county Monday, he noticed the presence of a minnow. He advised the owner of the milk that the next time he found it necessary to reduce the strength of his lactical fluid, he use a fine mesh sieve, so as to avoid any repetition of such a painful exposure as had just been witnessed. Mr. Smith says some of the farmers in Weber county were very anxious to get rid of the minnow. He will keep a sharp watch on the milk that the next time he finds any infraction of the law may be visited on the unscrupulous heads with sledge hammer force.

Stock Certificates

Conservation Commission—A meeting of the conservation commission will be held in the office of Governor Spry at 4 p. m. Wednesday. A full attendance of the board is desired, as matters of importance will be considered.

President Will Have Busy Day in New York

New York, March 22.—With a busy afternoon and evening in prospect President Taft arrived here from Providence, R. I. over the New York, New Haven & Hartford railroad early this morning.

The president's private car was detached and shifted to a side-track where it was surrounded by secret service men and detectives who remained on guard until the president departed for the home of his brother, Henry W. Taft, where he planned to remain until after noon.

Following lunch with Henry W. Taft at the latter's home the president planned to call on the New York Press club at 3:30 p. m. Tonight he will address the banquet of the American Peace & Arbitration league and is expected to make a brief call upon the Republicans attending the dinner at noon today, when it was decided that the debate with the Utah Agricultural college, of Logan, should be held at Bazaar hall on Thursday afternoon, a matinee dance in the Anderson, Woodbury, and Fish will represent the U. The debate will hinge upon the question: "Resolved, That the system of bank guarantees similar to that adopted by Oklahoma is desirable." Utah has the affirmative.

Advances in Wheat

New York, March 22.—Prices moved irregularly at the opening of the stock market today and then started upward. Within the first few minutes gains had been established of a point in Union Pacific and St. Paul and of a substantial fraction in the common, leading, Southern Pacific and Virginia-Carolina Chemical. The New York City 4 1/2 per cent bonds were dealt in "when issued" at 101 1/2.

Profit taking sales met the advance and the gains were wiped out. There was enough buying to prevent the first falling below yesterday's closing and when trading rallied to the best again the whole list stiffened. Louisville & Nashville, Illinois Central, National Lead gained a point.

The promise of a settlement of the western railroads, a further increase in the influence toward higher prices. Satisfaction was expressed with the New York City bond sale. The new bonds were dealt in when stockers started at 101 1/2, and receded to 101 1/2. Reading rose 1/2 to 109 1/2. Rio Grande gained 1/2, Colorado Fuel and Pittsburg, Cincinnati, Chicago & St. Louis, 1/2 and Interborough, Westcott, preferred, 1/2. Chicago Great Western preferred and Allis-Chalmers preferred declined 1/2. Prices were at the highest at noon, and very little business was being done.

Deals were steady. Dealings contracted as usual for midday, but toward the end of the day in Reading and Union Pacific. The market in general was quiet and firm. Colorado & Southern, Central Leather and American Steel & Wire advanced a point. Wide fluctuations were made by various stocks but otherwise the market was unchanged and practically idle.

Chicago Fuel rose 6; Chicago Union Pacific, 1/2; American Sugar and Refining, 1/2; Erie second preferred 1/2. Great Northern Ore certificates lost 1/4.

The market closed easy. Room traders took profits toward the end of the day, this caused prices to run off. Not much was left of the day's gains and a number of the leaders sold below last night. Norfolk & Western, American Sugar and Refining, Car lost 1/2. Federal Mining declined 1/2.

ST. LOUIS. (St. Louis, March 22.—Wool—Unchanged. Territory and western mediums, 23@25; fine mediums, 16@22; fine, 11@16.

BOSTON. (Boston, March 22.—A slight increase in inquiry from the woolen mills is noted in the local market with a tendency to shade prices by the holders. Hearing is still being held in the usual manner according to advice there has been little contracting owing to the high prices demanded by the growers.

There have been some good sales of old California wool on the basis of 65 to 66 cents secured, with Montana selling at 85 to 70 cleaned.

Fleece wools are quiet, although some three-eighths Wyoming have sold at 23 cents and Michigan quarter blood at 27 1/2 cents.

Pulled wools are moving moderately but the foreign trade is limited.

Produce

CHICAGO. (Chicago, March 22.—Liberal sales of wheat gave a downward trend to the early trading today, more favorable crop reports and a better situation. The opening for July was from 1/2 @ 1/2 to 1/2 @ 1/2 with September showing nearly as great a decline at 10 1/2 to 10 1/2 @ 10 1/2. Consistent buying of the distant delivery by a leading concern kept the figures close to 10 1/2 in the first hour, while July fell off fractionally in the same period and steadied at 10 1/2. May opened unchanged to 1/2, off at 11 1/2 to 11 1/2 and sank in the first hour to 11 1/2. Opening figures for the July delivery option were 10 1/2 to 1/2.

The demand in the corn pit was overbalanced by general commission house selling and buying figures were from 1/2 to 1/2. The futures clung to the lower levels through the first hour, accumulation of stocks being a strong factor in the heated situation. May moved between 6 1/2 @ 6 1/2 and 6 1/2 @ 6 1/2. At the start the nearby market sold 1/2 @ 1/2 to 1/2 @ 1/2. On starting at 1/2 @ 1/2, easier for May and July, with September, for which some demand was noted, a shade higher. Following buyers' demand the market in the first hour but the firmness spread to the other options. May held between 1/2 @ 1/2 and 1/2 @ 1/2 and advanced to 1/2. July gaining similarly and all months steadied near the top in the first hour. Provisions showed a easier tone and at the outset were from 2 1/2 to 12 1/2 cents off, pork having the greatest decline. Scattered long led the selling and the support was 1/2 @ 1/2. The market in the first hour. Opening quotations for the May products were: Pork, 23.50@24.00; lard, 13.25@13.50; 7 1/2 cents down, and ribs 13.50@13.75, 2 1/2 cents off.
