

MINING, BUSINESS AND STOCKS.

EXCHANGE MEMBERS TO VISIT PROVO NEXT WEEK

Autos to Convey Party—Will Have No Call of Exchange Monday or Saturday—Market Livelier.

The first real junket of the year is to be undertaken by the Salt Lake exchange members a week from tomorrow when automobiles will carry some 60 brokers to Provo. The visit will be quite an event as it has been a long time since the security sellers felt a desire to leave and make new friends. The mining men of Provo will probably prepare a routing time for their reception.

There are enough automobiles owned by members of the exchange to carry the party to Provo. For the purpose of providing an entertainment fund the brokers have decided to assess each member of the party \$2. This will be used for refreshments and other things that will lend life to the entertainment.

As the members of the exchange will start for the garden city quite early in the forenoon it is probable that there will be no session of the exchange a week from tomorrow.

On account of Monday being Decoration day all the exchanges throughout the country are closed tomorrow and Monday. The local exchange will be closed on both days.

The change in market conditions on the local exchange today. From a sick market of yesterday the trading this morning was over 500 per cent better and stocks developed considerable strength.

WHAT COULD BE DONE. One thing that was demonstrated to a certainty this morning was that the best bit of activity in mining stocks will be seen when the market is at present prices. Everything has struck rock level at present is the belief of the brokers.

Colorado was slow today and sold around 14 and 15 cents. Iron Blossom climbed up from 92 cents to 96 cents this morning on the sale of 1,200 shares of stock. Nevada Hills held up steady and under heavy selling Tintic Central managed to move up. Although 18,000 shares changed hands the price moved up from 10 1/2 cents to 11 1/2 cents. Talcum was back to 12 cents this morning.

The total number of shares disposed this morning was 3,450, while the amount paid out for the stocks was \$8,904.75.

On the curb market there was considerable activity and a larger range of stocks than usual. Many stocks also made their appearance and bids and offers were made for the first time in several days. Bingham Copper has been a favorite for several days and from 8 cents at which it was selling several weeks ago it sold at 12 cents this morning. Most of this stock is going east, it is said.

The sales on the curb this morning were 4,500 shares of Bingham Copper at 12 cents; 1,500 at 18 1/2 cents; 1,000 shares of Bingham Central Standard at 18 1/2 cents; 200 shares of Opex at 48 cents; 700 at 45 cents; 300 at 46 cents; 100 shares of Utah Sugar at 8.45 cents; 400 shares of Seven Troughs Kindergarten at 25 cents.

TODAY'S QUOTATIONS. Table with columns: Forenoon, Afternoon, Bid, Asked. Lists various stocks like Addie, Albin, Beck, etc.

MORNING METALS.

SILVER, 53 1/2; COPPER (cathodes), 12 1/2; LEAD, 4.40.

NEW YORK QUOTATIONS.

LEAD, steady, 4.40@4.50; COPPER, steady, 12.45@12.55; SILVER, 53 1/2.

LOCAL BANK CLEARINGS.

Today's \$ 825,629.77; May 27, 1909 1,065,158.06.

Table of Unlisted Stocks with columns: Stock, Bid, Asked. Lists DemJohn, Bingham Copper, etc.

FORENOON SALES.

Cedar Talcum, 500 at 12; Colorado, 1,900 at 65; Iron Blossom, 500 at 93; Lower Mammoth, 500 at 49; Nevada Hills, 100 at 84.

OPEN BOARD.

Carisa, 1,000 at 50; Colorado, 500 at 64; Columbia, 200 at 30; Iron Blossom, 400 at 95; 100 at 96; Nevada Hills, 500 at 83; Tintic Central, 5,000 at 11 1/2; Tintic Combination, 6,000 at 1 1/2.

RECAPITULATION.

Shares. Amount. Regular board 16,100 \$2,170.00; Open board 23,350 5,734.75; Totals 39,450 \$8,904.75.

AFTERNOON SALES.

Erooklyn, 1,000 at 52; Columbia, 400 at 53; Crown Point, 100 at 8; Iron Blossom, 200 at 95; Nevada Hills, 800 at 84; Nevada, 1,000 at 2; South Iron Blossom, 2,000 at 9; Tintic Central, 500 at 12; Tintic Combination, 2,000 at 1 1/2.

LEASE FARMS TO OIL MEN.

Pennsylvania Company to Drill in Grand Valley. S. F. Barrett, a mining and oil expert from Bradford, Pa., and L. Peavy, a Denver attorney, are here this week to examine the oil prospects along Grand river.

They also believe that the farm lands of this valley contain oil and have been several years leased on some of the farms with a view of drilling for oil within a year. The leases provide that Mr. Barrett's company shall drill for the oil and give to the land owners 50 per cent of the oil discovered.

The company further agrees that any artesian water discovered shall belong to the owners of the land. The farmers figure that this is a big feature of the lease and it has already been believed that there is artesian water in the valley, and in this way they can find out without the expense of prospecting.

A meeting of the commercial club was called Wednesday for the purpose of acquainting the farmers and business men with the provisions of the proposed lease.

Among those who have leased their land to Mr. Barrett's company are Dr. J. W. Williams, J. A. Huff, Neal Ray and Myron Lance—Grand Valley Times.

CARNEGIE IS NEW DISTRICT.

Discover Large Bodies of Low Grade Gold Ore. Assay returns have been received from samples taken from the great porphyry ledge discovered in the new camp of Carnegie in the Lewis district last week.

These samples were taken at random for a distance of 400 yards and averaged 34.67 in gold. The ledge has been traced south for between 200 and 300 yards, outcropping quite prominently the entire distance, and part of the way paralleling the noted Betty O'Neal ledge claim in that distance and it has been traced an equal distance north, says the Battle Mountain Herald.

Another ledge, composed of finely crystallized quartz, so far determined to be 40 feet wide, cutting through a quartz formation, and in one place a small vein of mica, was encountered by another party of prospectors.

There are a number of experienced miners and prospectors in the new camp, who are not yet in agreement as to the value of the vein. It is believed that the mine will be in perfect running order. The buckets were sent on their way for the first time last Sunday and only a few tight places were discovered along the entire circuit.

The mine is still supplying ore under the old contract with the American Smelting and Refining company. This is expected will be finished in about a month. As the company wishes to have its mine in first class condition it is not probable that ore will begin going over the hill to the smelter before August.

It is believed that the smelter will not be ready to care for ore before Labor day. At that time both the smelter and the mine will be ready to operate to the limit. At the same time it would give the Groux Consolidated property at Ely time to be in a position to ship its ores to the smelter. By September 1st the smelter will be in condition to send out a good tonnage.

UTAH OIL FIELDS ARE RECEIVING ATTENTION

Emery, Wayne, Garfield and Grand Counties Declared to Have Promising Petroleum Land.

(Special to the News.) Torrey, Wayne Co., May 27.—From Cedar Ridge, which skirts the southwestern edge of Castle valley near Emery, Emery county, and stretching out in a southeasterly direction, running through the Simbad country, and the San Rafael swell, on through Wayne county, a portion of Garfield county, and over the Green river into Grand county, is a stretch of country that shows oil seepage in hundreds of places—perhaps thousands—on which but little work has ever been done. This vast area is far removed from the railroad and for the most part is most desolate. Great desert wastes covering thousands of acres are the valleys and near-by reservoirs of the country. One end of this stretch of country to the other, lands are being taken up for the purpose of prospecting for oil.

Besides the possibilities of oil, the geologists believe that this part of Utah is something that holds out many promises. On account of the location of this land little has ever been done with it in any way.

In Emery county, at the northwestern end of the Simbad tract, work has been started on the oil lands, at the southeastern end, Grand county, leases are being secured on the farm lands for the purpose of sinking for oil, while in Wayne county, which is near the center, there is much activity.

To the west of the Honoho valley in Emery county a number of oil leases have recently been made. Relations with this Emery County Progress says: "A. C. Dennis, one of the original prospectors, and J. W. Kimball of Winnipeg, Canada, have just returned from the States with another batch for drilling and stated that they would have a drill at work there in a short time. This begins to look good. There is no question as to the country down that way being saturated with oil and every-where the prospectors are anxious to get to know what a drill will develop.

ONE LITTLE PATCH. This is only one little patch of the oil fields of Emery county. All over the Simbad there are oil seeps and in places oil sand in thick veins. Several townships of land now held by Driggs and the district runs on east into Grand county. In fact nearly the whole district has been plenty of oil. The lands being rich in many minerals and metals which will revolutionize the map of Utah when they are once developed.

There has been considerable work done in the Simbad country and by and by claims have been filed there by the hundreds but a good practical test has never been made. The inaccessible location of the seeps has been one cause that has held back the work. John C. Jacobs, of Torrey has just returned from the Wayne county lands where he has been surveying several thousand acres of land for the Broken Bow oil company. The San Emery County Oil company also had several thousand acres surveyed by Mr. Jacobs. The shales which are taken from the seepage spots are saturated with oil. He then returned to the prospecting good quality of crude oil and there is every indication of oil in abundance. Mr. Jacobs declares that it is only a matter of time before the oil fields will be developed in Wayne county.

Relative to this oil country the Richfield Reamer has the following to say: "F. D. Mylor and S. W. Mulberry of Salt Lake were here this week on their lease and they are very confident that they have been examining oil and mineral lands, and locating some of these.

They carried with them a bottle of crude oil obtained from the oil bearing rocks found in both of the counties named, and also some fine specimens of rich copper and lead ore which were taken from property 28 miles from Lon.

On their trip they located 4,160 acres of oil lands. A number of Nebraska capitalists as well as Salt Lake men are interested in the locations both of mineral and oil lands. The Nebraska people are anxious to begin work in the oil region, and they expect to send in machinery at an early date. The gentlemen who were here were enthusiastic over the eastern oil lands. The recent oil locations are owned by the Broken Bow Oil company, and they will begin developments at once.

The ore which the gentlemen exhibited is rich. The copper assays 20 per cent, while the galena assays 45 per cent lead. There is a good vein of each, and the wealth from these sources, oil, copper and lead will bring a railroad into Wayne county as soon as sufficient development work is done to exploit the mines.

Messrs. Mylor and Mulberry were much enthused over the prospects for the early development of the wealth that lies in Wayne county.

CONCENTRATES. Activity has been started on the Tecoma Consolidated Mining company in the Lucin district.

The Sevier-Miller Coalition Mines company expect to have its mill running in a few days.

Charles Cooley of Moab has sold his half interest in the Golden Dream property near that place for \$1,400.

The drift has followed the gray shoot for 35 feet in the new strike at the Nevada Hills, according to the latest word from camp. The foot wall has not been in sight during the last 25 feet. The lower assay occurred in the face of the drift was \$88.

Final payment has just been made by the Commonwealth Mines company to its Beaver county property. Manager A. A. Dunyon will leave in a few days to lay out the plans for future work at the property, which is in the Star district.

General Manager A. N. Holdaway of the Tintic Copper was in the city yesterday. He asserts that the shaft is now down 700 feet and in a white lime. Mr. Holdaway does not believe the time has yet arrived for drifting to reach the gray lime and ore.

William Hatfield of Provo while in the city yesterday declared that the opening of the shaft at the Nevada Hills development work in various parts of the property. Mr. Hatfield says there is plenty of ore to work on and three or four cars a week are being sent to the market.

On account of a delay in the shipping machinery, the Badger Hill property is just starting up today. The necessary machinery is reported to be on the way to the mine so that work can start today. Superintendent Witt has been working a force of men at Mineral Flat.

A strong company it is asserted has been organized to take over the Fine Gold Seven Troughs Mining company property at Seven Troughs. The property consists of two groups, one the Badger Hill and the other the Yellow Dog. The Badger Hill property was worked for a time by lessees, who opened up some fine gold ore.

A. E. Krautsen, a capitalist and mining expert of Pipestone, Minnesota, is expected at Ophir early next month for the purpose of becoming interested in the property. Mr. Krautsen will be accompanied by Mr. L. A. Mendenhall, a local resident. The property is owned by O. E. Turner and E. L. Fletcher. For a year Mr. Fletcher has been working a force of 40 men blocking out ore along the 2,500 foot ledge of ore, that varies in width from six inches to three feet.

WHEAT AND GRAIN DEALINGS

New York, May 27.—The opening stock market today was irregular with a narrow range and the dealings were quite active. The prominent speculative stocks were lower and the decline was extended after the opening. Union Pacific and Reading lost 1 and Southern Pacific, St. Paul, Baltimore & Ohio, Amalgamated Copper, American Smelting and International Mercantile Marine preferred large fractions. New York, Chicago & St. Louis and American Hide & Leather preferred rose 1 and American car.

Professional operators professed disappointment over the lack of response to the SE Paul bond sale. The unsettlement in the cotton and grain markets was supposed to throw some pressure on stocks. Prices had recovered before the noon, but business shrank to nominal proportions. American Locomotive, American Cotton Oil, Pullman and Pressed Steel Car preferred gained 1.

The railroad stocks were neglected but several of the minor specialties were strong. American Hide & Leather preferred advanced 2 and Consolidated Gas, 1 1/2.

The bulls did not vary much more than an eighth or so in the latter part of the day and business was at a standstill.

The close was heavy and dull. Prices yielded easily on light dealings. Falling to the low points in some cases. Virginia, Carolina chemical rose 1/4. Illinois Chalmers preferred fell 1/4 and Missouri Pacific and Kansas & Texas 1.

LIVE STOCK. CHICAGO. Chicago, May 27.—Cattle—Receipts, estimated at 1,500; market strong. Beef steers, 5.00@5.50; Texas steers, 5.00@5.50; western steers, 5.00@5.50; stockers and feeders, 5.00@5.50; calves, 5.00@5.50; hogs—Receipts, estimated at 10,000; market steady. Native, 5.00@5.50; western, 5.00@5.50; yearlings, 5.00@5.50; lambs, 5.00@5.50; ewes, 5.00@5.50.

OMAHA. Omaha, May 27.—Cattle—Receipts, 700; market steady. Native steers, 5.00@5.50; cows and heifers, 5.00@5.50; western steers, 5.00@5.50; calves, 5.00@5.50; hogs—Receipts, 1,000; market steady. Native, 5.00@5.50; western, 5.00@5.50; yearlings, 5.00@5.50; lambs, 5.00@5.50; ewes, 5.00@5.50.

KANSAS CITY. Kansas City, May 27.—Cattle—Receipts, 4,000; market steady. Native steers, 5.00@5.50; cows and heifers, 5.00@5.50; western steers, 5.00@5.50; calves, 5.00@5.50; hogs—Receipts, 1,000; market steady. Native, 5.00@5.50; western, 5.00@5.50; yearlings, 5.00@5.50; lambs, 5.00@5.50; ewes, 5.00@5.50.

ST. LOUIS. St. Louis, May 27.—Wool, unchanged. Cotton—Receipts, 10,000; market steady. Middling, 17.00; fine, 18.00.

PRODUCE. CHICAGO. Chicago, May 27.—Gigantic transactions in wheat today startled observers who looked for a calm after yesterday's whirlwind. Trade was very active and prices advanced. Individual operations seemed hardly to count. Prices still plunged downward and sometimes fell as low as 1 1/2 cents. The market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The wheat market opened 1/2 to 1 1/2 down with September at 81 1/2 to 82 1/2, a drop of 1/2 to 1 1/2. The market advanced to some extent finally at the upper figure. May at one time rallied to 1.04 1/2, but this was temporary and prices advanced to 1.04 1/2.

The corn market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The soybean market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The oil market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The sugar market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The coffee market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The tea market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The spice market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

The nut market was subjected to a sharp bidding up process by brokers, but this was temporary and prices advanced to 3 1/2 cents.

WHEAT MARKET

Chicago, May 27.—Wheat was demoralized again today. To yesterday's sensational slump of from 4 1/2 cents in September to 5 cents in May the market was at the bottom today, shortly before the close, showed extreme volatility of 2 1/2 cents. The close showed an average rally from the bottom of about 1/4 cents. This was due largely to the fact that the market for the time was sold to a standstill.

Following yesterday's sensational decline in September and May wheat the market was violent today and registered further declines in the first hour and a half of trading. The pit fairly seethed. Prices of the same option varied simultaneously in different parts of the pit by a cent in September and a cent and a half in May.

May wheat closing last night at 1.06 the fall to 1.03 as discouraged longs of lesser magnitude unloaded and pocketed their losses. July and September were sold in immense quantities, to an extent by foreigners. September closing last night at 83 cents, dropped to 81 1/2 cents since Wednesday's close. The market was 1/2 cent as compared with 90 1/2 cents at the close yesterday, a loss of 1/2 cent in two days.

The bulls had been whipped by Old Mother Nature, as traders put it. Bulls loaded up with wheat early in the season when prices were high, but they were not adequate world crop. But in the United States the rains descended and the sun shone to such purpose that the grain crop was apparently apparently blighted prospects. Europe predicted unusual crops and even far away India further added to the gloom. The result was a record-breaking harvest.

It is almost axiomatic among speculators that in adverse conditions a quick right-about face in pace with shifting developments will not last long in any market. The big bulls in wheat were not long in getting out of the market in pouring out their holdings when nature pointed the way.

LOCAL MARKETS. Local commission men are still distressed over the combine of suburban farmers to boost prices away up to unconscionable figures, as was noted in Tuesday's News. It is driving away the jobbing trade from Salt Lake into the hands of Ogden and Provo jobbers, in fact, the farmers are demanding so much more here than they are ready to sell for at the other cities that Salt Lake commission houses find it just as cheap to buy in southern California and pay the high express charges.

Hay, like the shades of night in "excelsior," is "falling fast," as the new crop is being harvested. Lucerne is selling in the field at \$1 that is, "you hunt it away yourself." Delivered loose, by the load in town, commission men say a very reasonable price is \$11 per ton, though growers will try to get \$15—if they can. Jobbers are selling alfalfa at \$14 and clover at \$12. Timothy is down to \$18. Texas new potatoes are in the market; so is black bass; dewberries also—the latter being the same thing as the eastern ground blackberry. Oligomargarine continues to hold its own, thanks to the creameries. Jobbers say it has come to stay, will remain from now on in competition with genuine butter. Imported small fruits are becoming cheaper. The quotations obtaining today are as follows:

MEATS AND POULTRY. Dressed beef, per pound 12 1/2; Dressed hams, per pound 22 1/2; Lamb, per pound 20; Pork, per pound 18; Chicken, per pound 15; Turkey, per pound 18; Eggs, per dozen 15.

DAIRY PRODUCTS. Creamery butter, per pound 35; Butter, ranch, per pound 30; Cheese, per pound 20; Milk, per gallon 10; Condensed milk, per can 15; Ice cream, per gallon 10.

FRUIT. Oranges, per dozen 30, 35, 40, 50; Lemons, per dozen 20; Apples, per bushel 1.25; Strawberries, per box 2.00; Raspberries, per box 1.00; Blueberries, per bushel 1.00; Peaches, per bushel 1.00; Plums, per bushel 1.00; Cherries, per bushel 1.00; Nuts, per bushel 1.00.

VEGETABLES. Celery, per bunch 1.00; Lettuce, per bunch 1.00; Tomatoes, per bushel 1.00; Carrots, per bushel 1.00; Spinach, per bushel 1.00; Beans, per bushel 1.00; Peas, per bushel 1.00; Potatoes, per bushel 1.00.

FISH. Crabs, per bushel 1.00; Trout, per bushel 1.00; Salmon, per bushel 1.00; Mullet and carp, four pounds 2.00; Mountain trout, per pound 1.00; California smelt, per pound 1.00; Oregon smelt, per pound 1.00; Barracuda, per pound 1.00; Catfish, per pound 1.00; Codfish, per pound 1.00; Lake white, eastern 1.00; Lake white, western 1.00.

STOCKS.
