

NAPLES BAY STORM SWEEP

Islands of Ischia and Procida Devastated by the Elements.

HUNDREDS OF LIVES ARE LOST

Cloudburst, Tidal Wave and Eruptions From Vesuvius Are Features.

No Americans Reported in Trouble Zone—Monetary Loss Great—Relief Being Organized.

Naples, Oct. 25.—The beautiful coasts of the bay of Naples and the gulf of Salerno and the islands of Ischia and Procida have been devastated by a peculiar combination of the elements.

The disaster appears to have come in the form of a tornado, having three centers, the first over the island of Ischia, the second over the town of Torre del Greco, on the east coast of the bay of Naples and the third sweeping the gulf of Salerno.

Accompanying the winds were a cloudburst, a tidal wave and a violent eruption from Mount Vesuvius, from a crater suddenly opened on the summit of the long extinct Mount Epomeo, on the island of Ischia.

The islands of Ischia and Procida and the adjacent islands suffered most. No Americans are reported in the trouble zone, foreigners having recently given that section a wide berth, because of the cholera epidemic.

Throughout the night much confusion existed as the failure of the electric and telegraph wires left the territory in darkness and without means of easy communication.

The boats of the Minialda which yesterday were beautiful with their growth of orange, lemon and mandarin trees have been overrun with rivers of mud and ashes from Mount Vesuvius.

Human bodies and the carcasses of animals have been discovered. The mountain high road from Sorrento to Amalfi and Salerno formed by terraces in the mountain cliffs and bordered with fruit trees and vines was unrecognizable today.

Next to the loss at Ischia the greatest damage was done in the towns of Sorrento, Torre del Greco, Resina, Amalfi, Positano, Maiori, Ravello, Anagni, Ponticagnano, Cetara and Monte Corvino.

The station master on the railroad at Vistri, a mile and a half west from Salerno, was killed by an electric shock while attempting to telegraph the news of the disaster to other points.

Reports from Ischia describe the situation there as distressing. The famous baths of Lucullus have been destroyed. At some points the lava from Mount Epomeo is 20 feet deep.

When the cyclone was at its height enormous hailstones fell and huge rocks detached from the mountain peaks came tumbling down.

At Torre del Greco, the roof of a building was blown off and the floors, collapsing, carried a sailor, his wife and child 13 months into the cellar. The woman was killed and the husband, with the babe in his arms, escaped from the place only to be drowned in the street. The baby was rescued.

ARIZONA LIFTS BAN ON NEWSPAPER MEN

Phoenix, Ariz., Oct. 25.—The ban on newspaper men was raised today by the constitutional convention which voted again to allow them the privilege of the floor.

The station master on the railroad at Vistri, a mile and a half west from Salerno, was killed by an electric shock while attempting to telegraph the news of the disaster to other points.

Reports from Ischia describe the situation there as distressing. The famous baths of Lucullus have been destroyed. At some points the lava from Mount Epomeo is 20 feet deep.

KILLS COUNTRYMAN IN SALOON FIGHT

Coroner's Jury Sits on Case Before Justice Hanks Today.

ARRESTED WITH SMOKING GUN

William Niemi Taken by Police as He Crouched on Iron Stairway Near Orpheum Theater.

A coroner's jury sat in the court of Justice of the Peace Hanks today, in the case of Sam Osterberg, the man shot to death in the Commercial bar at 68 Commercial street last night. The police charge that he came to his death as a result of pistol bullets fired by William Niemi.

The jury was convened in the court of Justice Hanks and later adjourned to look at the body of the dead man that lay at the O'Donnell undertaking establishment.

John Hermanson, one of the owners of the saloon where the killing took place, Jack Grant, A. J. Johnson, Axel Ekstrom, and Hugo Johnson, eye witnesses testified to the killing. Ekstrom and Hugo Johnson have been held in custody.

The murder was done in cold blood. Niemi and Osterberg had been drinking together when suddenly Niemi pulled his revolver, placed it to the temple of Osterberg and fired, Osterberg fell dead like a log.

Niemi then ran out of the place with the smoking gun in his hand and started north on Commercial street. Policeman H. D. McMartin saw the man running and having heard the shot, he followed him to the Orpheum theater at the side of the building, where he had taken refuge.

Osterberg was unidentified until this morning. Then some friends of his came to police headquarters and said they knew him, and that he had worked in the quarries near the city.

A brother of the murdered man sailed for his old home in Finland several days ago. Niemi is also a Finlander.

IDENTIFIED MURDERER. Sam Osterberg, the murdered Finlander, was identified this morning at the O'Donnell undertaking parlors by Jack Perra and Axel Johnson. They knew the dead man in a casual manner and knew that he had just returned from some mines in Topfitt, Michigan.

It was said that Niemi, who was last night's killing man, had the police to have happened about 11:45 o'clock. Hundreds of people waiting for the cars heard the shots of police.

Lieutenant John Hempel worked on the case this morning and located the two men who identified the dead man. He also said that against William Niemi is complete.

Niemi is 21 years of age. He is also a Finlander. Today he does not seem to care to meet any of his friends. He said to George Moore of the police department this morning, "I want to go out of here. I got a job and I must get going."

Niemi is a giant in strength. If of normal height he would weigh 250 pounds. He has been a sailor all his life and left a German oil transport in Philadelphia. He also says he knows nothing of the shooting. He maintains also that he never saw Osterberg until yesterday.

They met in a saloon, and as Niemi was going to meet a friend, both men imbibed freely. Then came an argument as to their relative strength, and after several bouts Niemi, who was going to telegraph the news of the disaster to other points.

At Torre del Greco, the roof of a building was blown off and the floors, collapsing, carried a sailor, his wife and child 13 months into the cellar. The woman was killed and the husband, with the babe in his arms, escaped from the place only to be drowned in the street. The baby was rescued.

When the cyclone was at its height enormous hailstones fell and huge rocks detached from the mountain peaks came tumbling down.

SPECIAL VENUE FOR VANDE JURY

Regular Panel Exhausted This Morning in Examination Of Talesmen.

SHOWS HIS PRISON PALLOR

Man Once Convicted of Killing His Wife, Now On Trial Again For Murder.

With the pallor caused by almost three years' confinement behind prison walls showing plainly in his face and betraying by his movements the nervousness which has characterized his attitude throughout the various proceedings of the case, Thomas Vance, alleged wife murderer, scrutinized with piercing eyes the men who were being examined in Judge T. D. Lewis's court this morning as to their eligibility to sit as jurors in the second trial of the case.

At noon today the entire regular panel of the September term of court had been exhausted and a special venire of 35 names was drawn the venire to be returned at 10 o'clock Wednesday morning.

Twenty-six men in the regular panel were examined Monday afternoon and this morning out of that number, three were passed for cause, accepted and sworn in. They are H. B. Thier, Alfred S. Derrick and William H. Igham.

Two others, William M. Egan and James C. Thinson, were passed for cause, but have not yet been sworn in. The remaining 28 members of the venire were examined this morning. The men examined and excused this morning are James Gordon, Frank B. Allen, Philip Emmigan, Orson Brown, James M. Adams, Henry Pollard, Lewis T. Cannon, Will Rees and Harry O. Lawrence.

Monday passed without a single juror being sworn in. Twelve talesmen were partly examined and five excused for cause.

Vance is represented by W. L. Maginnis and S. A. Madson of Ogden and A. J. Weber and John F. Tobin of Salt Lake City. The state is represented by Dist. Atty. Fred C. Looftwood and his assistant, E. O. Leatherwood.

The following have been subpoenaed to testify in Vance's behalf: Lewis M. Cannon, Cyrus H. Gold, John Abbott, Mrs. Clara F. Richards, Frank Stanley, T. S. Pendergrass, Mr. and Mrs. Joseph E. Taylor, Frances Caroline Thompson, George E. Edward, Florence, Lena and Mrs. A. B. Vance, John Culley and Mrs. Clara Wunderlich.

FIRE DESTROYS BOTH RESIDENCE AND BARN

Eight Thousand Dollar Blaze Wrecks Machinery of Capital Cleaning Company, Furniture, Etc.

Fire in the J. C. Barton home, 412 north Main street, and in the large barn in the rear formerly occupied by the Capital Cleaning company, which was recently taken over by the Bartons, broke out early this morning and caused a loss that is estimated today at about \$8,000.

The home of the Bartons and the barn are completely gutted. The house today is merely a ruin with the gable walls standing, and the barn in the rear, where the cleaning machinery was located, is a mass of smoking debris and twisted steel.

The loss on the machinery is alone estimated at \$1,900. In addition several hundred dollars' worth of carpets left there by residents throughout the city were destroyed.

The barking of a dog aroused Mrs. W. H. White about 1 o'clock this morning and looking out she saw flames shooting up from the building in the rear of the Barton home where the cleaning works were. She immediately telephoned the fire department and the apparatus was started on the long drive up the hill to where the flames were lighting the midnight sky.

In the meantime the neighbors awoke and formed a volunteer fire brigade captained by the two Barton boys.

When the department finally arrived at the place after their long hard pull, the volunteers had succeeded in bringing most of the furniture from the Barton home which had caught from the barn. Everything that was of value was saved, but in the rush and hurry many valuable things were broken. Two oil paintings were badly torn in the scorching. It is also said that a quantity of carpenter tools, stored in the barn, were destroyed.

The Bartons had recently taken over the cleaning establishment and were preparing to continue the work. The origin of the fire is a mystery. Some insurance is carried on the buildings and contents but what amount could not be learned today.

SIX PIONEERS PRESENT

Utah Daughters Entertain at the Home of Their Chaplain.

The Daughters of Utah Pioneers met yesterday in a delightful social meeting at the home of the chaplain, Mrs. Sarah J. Cannon, six of the original pioneers being present with the members. The rooms were decorated in autumn leaves and a pretty feature was a pumpkin in basket shape with handles, and filled with fruit.

JURY ACQUITTED ETHEL C. LENEVE

Was Charged With Being Accessory to Murder of Belle Elmore After the Fact.

REJECT SOME CONTENTIONS

Decision Finally Disposes of Long Standing Dispute Between United States and Venezuela.

London, Oct. 25.—After a trial lasting but a few hours in the New Bailey criminal court today, a jury found Ethel Clare Leneve not guilty as an accessory after the fact in the murder of Cora Belle Crippen, for whose death the latter's husband, Dr. Crippen, will die on the gallows on Nov. 8.

Miss Leneve was in love with Dr. Crippen and slept in the house within 48 hours of the time the doctor murdered his wife and buried the dismembered parts in the cellar of his Hilldrop Crescent home. She accompanied Crippen in his flight to Canada and with him was arrested and indicted.

From the first she maintained innocence of any knowledge of the crime, but the crown alleged that her behavior subsequent to the disappearance of Mrs. Crippen, or Belle Elmore, as she was known on the stage, was such as to betray a guilty knowledge of the murder.

When arraigned today Miss Leneve pleaded not guilty and witnesses were introduced by the prosecution to show that she had experienced periods of great mental distress following Belle Elmore's death. The crown prosecutor, Richard Muller, introduced only such evidence as had been brought out in the earlier hearings.

Lord Chief Justice Alverstone, who presided, in summing up for the jury, said he saw no reason why Dr. Crippen should have told Miss Leneve a story different from that which he told others.

ETHEL'S EARLY LIFE. Miss Leneve was born at Dies, Norfolk, on June 22, 1883, the daughter of Walter Leneve, a railway agent. There was nothing about her as a child to suggest that she was anything but ordinary.

She learned stenography and obtained employment as a bookkeeper in an institute where she met Dr. Crippen, who was connected with the institution in a consulting capacity. Later the doctor, then Dr. Crippen, set up for himself in the dental business and took Miss Leneve with him as a stenographer and private secretary.

She then lived with her employer and after the death of Mrs. Crippen went to live with the doctor and later told her friends they were married.

EDITOR FINED FOR CONTENT OF QUOTE. London, Oct. 25.—There was a sequel in the Crippen case today when the high court inflicted a fine of \$1,000 on Asst. Editor Parris for contempt of court in the London Chronicle for a story asserting that Dr. Crippen had purchased hyoscin and had confessed to the murder of his wife.

The court ordered that Parris be imprisoned until the fine was paid.

ATTY. BELVA LOCKWOOD CELEBRATES BIRTHDAY

Washington, Oct. 25.—Belva A. Lockwood, lawyer, suffragist and twice candidate for the presidency of the United States and one of the best known women in the country, yesterday celebrated her eightieth birthday.

"I've never had an eightieth birthday before, and I'll never have another, so I decided to take a day off and have a birthday cake," she said.

Mrs. Lockwood says so far as she knows, there is no party difference in the world, and in being 80.

"I am as strong a suffragist now as I ever was," said Mrs. Lockwood. "Woman's suffrage is the only thing that will give women a voice in the government, and I will live to see the truth of my prophecy."

GRAVEL AND ROCKS RAIN FROM THE SKY

Explosion at Bingham Causes Construction Just After Noon Today—Many Narrow Escapes.

(Special to The News.) Bingham, Oct. 25.—Raining pebbles and boulders for a space of nearly five minutes following the explosion of a big blast placed by sub-contractors for the Utah Construction company along the line of the Bingham & Garfield railroad shortly after noon today, miraculous escapes from death and injury to three men, leaving a hole in the roof three feet square and plunging through the floors and into the ground under the Bingham residence, another through the James store and another through the Countryman residence.

The exploding charge led to a tearing and crashing noise that brought nearly everybody in the town out of doors and a moment afterward the streets were filled with people, men, women and children, joining in to see what had happened. The charge was buried 12 feet and a quantity of powder, but certainly it must have been excessive for its noise was heard for many miles and the falling gravel fell over a circle more than a mile across.

ORINOCO CLAIMS CASE IS DECIDED

The Hague International Court of Arbitration Awards American Co. \$46,867 and Costs.

REJECT SOME CONTENTIONS

Decision Finally Disposes of Long Standing Dispute Between United States and Venezuela.

The Hague, Oct. 25.—The international court of arbitration rendered its decision in the Orinoco claims case today. The large award is based on four points and the American company is awarded \$46,867, with 3 per cent interest since June 16, 1903, and \$7,000 costs.

The judgment is to be paid by Venezuela within two months. The tribunal rejected the American contention on the other points in dispute.

William Dennis, as agent of the United States, presented the case for the steamship company.

Today's decision disposes of a long standing dispute between the United States and Venezuela. The Orinoco Steamship company, a New Jersey corporation, was granted certain exclusive privileges by Venezuela, but the agreement was subsequently repudiated by President Castro. The steamship company instituted an action for \$1,400,000 damages. The case was eventually submitted to the arbitration tribunal, which, on Feb. 2, 1904, awarded the company \$28,700. The company appealed to the American government, which refused to accept the decision on the ground it was contrary to the principles of international law.

After prolonged negotiations between the American government and the Orinoco Steamship company, the latter agreed to submit the whole matter to the Hague tribunal, where Mr. Dennis asked that the large award be declared null and void, and the original claims settled on their merits.

LIEUT. MONTE, AVIATOR, KILLED AT MAGDEBURG

TANK OF GASOLINE EXPLODES WITH ROAR

C. D. Streett and Wife Badly Burned in Blaze at New York Cleaning Works.

With a roar heard for some distance, a large tank of gasoline in the New York Cleaning and Dyeing works, 133 west 10th Street, exploded about 9 o'clock this morning and in a second the room was a mass of flames. The gasoline had communicated itself to every thing burnable in the place and when Mr. C. D. Streett, the proprietor, and his wife were both painfully burned.

The department was called and quickly extinguished the damage to the building, according to the fire department, amounted to \$20, and to the contents of the cleaning works, which were scorched about the neck, when the tank exploded. They were both treated at their home.

"NO MAN'S LAND" IN NEW YORK CHINATOWN NO MORE

New York, Oct. 25.—"No Man's Land" in Chinatown is no more. The new police regime in New York city has placed the little strip of pavement in Chatham square where four precincts converged, under the supervision of the Elizabeth street station. Heretofore, because of a question as to who should make arrests, the spot has been a favorite haunt of shady characters of "Chinatown." The new order is the line with the plan to "clean up" the district.

OLD CAMPAIGN METHODS ARE PASSING AWAY

New York, Oct. 25.—The passing of old-time campaign methods is apparently marked by the present gubernatorial and congressional campaign in New York. Keen political observers have several times noted that the campaign is the quietest in many years and they declare that it is not due to public apathy, but merely to the fact that the day of red fire, torchlight parades, banners, bands and buttons, as well as street corner spellbinders and cart tall oratory has gone by.

In all New York there are not more than half a dozen campaign banners for campaign advertising and the man wearing a button with the name and picture of his favorite candidate on it is a rarity.

STEAMSHIP SERVICE FROM SOUTH AFRICA TO NEW YORK

Washington, Oct. 25.—Vice Consul General George L. Foster of Capetown has reported to this government that an arrangement has been concluded between the German-Australian Steamship company and Elder, Dempster & Co. for a direct steamship service from South African ports to New York and Boston.

The service will begin Nov. 15 next, the steamer to run from Australia, via South African ports, to the United States. Freight is reported to be accepted for this country at South African ports at a rate considerably lower than those charged via England. The first steamer to make the new route will be Magdeburg, which will sail from Melbourne, touching at Durban, Natal, East London, Algoa Bay and Capetown. To other steamers will make the trip at intervals of about 15 days.

MORE RECORDS OF CHAIR AND ORGAN

Eastern Phonograph Experts Coming Here Next Week To Secure Plates.

COMPOSITIONS SELECTED

Prof. Stephens Proposes to Rehearse Selections From Famous Oratorios By the Old Masters.

Conductor Stephens of the Tabernacle choir and Manager Daynes of the Daynes-Beebe Music company held a conference this morning, relative to the choir repertoire to be selected when Experts Hausmann and Supt. Emerson of the Columbia company return for a second recording of ensemble work by the tabernacle choir, and organ solos by Prof. McClellan. Both Messrs. Stephens and Daynes agreed that a third horn is necessary to carry the organ part in the singing, the more feasible idea in this connection being that the horn should reach above the organ, with the bell turned down and with widely extended bell flanges, the distance between the bell flanges of the horns used to record the choir should be enlarged four times. By doing this the choir work will be much more complete, to say nothing of having the full organ backing up the choir in the third trumpet.

The idea of both a choir and organ people is to secure records of great ensemble works from the more noted masters, such as may be found in the big oratorios and the more noted anthems from the most distinguished composers. It is not drawing too long a bow to claim that the tabernacle choir is an aggregation of mixed voices that can not be surpassed anywhere for a faithful production of these great works. Consequently, manufacturers of the voice machines are ready enough to spend money, time and talent to secure records from such a source.

SOME SELECTIONS. Prof. Stephens has selected the following compositions for recording when the experts arrive: "Tise Up, Arise," from Mendelssohn's oratorio, "The Messiah"; "The Light of the Forty Second Psalm"; "God of Israel," by Evan Stephens; "Praise Ye the Father," from Mendelssohn's oratorio of the Forty Second Psalm; "God of Israel," by Evan Stephens; "Praise Ye the Father," from Mendelssohn's oratorio of the Forty Second Psalm; "God of Israel," by Evan Stephens; "Praise Ye the Father," from Mendelssohn's oratorio of the Forty Second Psalm.

Next to this recording will require from members of the choir some personal sacrifice in the matter of time, care and vocal effort. But the results are expected to be of such a nature as to readily call for such interest on the part of the choir. Prof. Stephens emphasizes this strenuously, and urges every member of the choir to personally interest themselves in doing their part to make of this enterprise a success. The best efforts of the choir will be recorded in the form of a special rehearsal of the great oratorio, so that they can gain a better idea of possibilities in matters of recording.

PLANS TO RESCUE HAWLEY AND POST

Balloon With Supplies to be Sent In Search of the Missing America II.

HUNT TO BE SYSTEMATIZED

Campaign Will be Conducted From Ottawa, Canada—Canadian Press Will Co-operate.

St. Louis, Oct. 25.—A plan to send a balloon with supplies after Alan Hawley and Augustus Post,
