

MINING, BUSINESS AND STOCKS.

MAKES INVENTORY OF PIOCHE PROPERTIES

Fred R. Woolley Returns From Pioche And Frisco After Making Inventory of Nevada-Utah.

Fred R. Woolley who is the resident agent of the Nevada-Utah returned to the city this morning after a three weeks' visit to the Pioche properties and those in the San Francisco district.

Mr. Woolley said that Pioche looked good, that during the time he was in the camp he had witnessed an entire change in the attitude of the people there in regard to mining and the mining industry of that section.

On return to Salt Lake, Mr. Woolley stopped off at Milford and went over to the Imperial ground that is owned by the same company.

The Nevada-Utah in addition to controlling the Nevada Utah and Day mines in Pioche owns the Imperial near Frisco, the Comet in Copper gulch near Nevada-Utah.

Nothing is being done at the present time with the Comet mine. This consists of a single claim that joins on the north and east with the Cactus claim on which the South Utah has large low grade ore bodies developed.

Mr. Woolley has not yet received regarding the completion of the merger of the Nevada Consolidated, Nevada-Utah, Frisco Consolidated and Imperial Pioche, but Mr. Woolley and Murray Godbe are said to be in the east looking after the details.

Prices on the exchange this morning in the firm with a moderate amount of trading that has been the rule for the last few days.

NEW INTERESTS ARE ENTERING SAN JUAN

Oil Fields Show Great Activity—Telephone Line Being Built—Field Has Two Stores—Laying Townships.

Activity in the San Juan oil fields is rapidly increasing, and in spite of the thousands of dollars now being spent in assessment work, a large amount of deeper drilling is being done.

A. L. Rapley, one of the pioneers of the field, is laying out the new townships of Mexican Hill, where seven towns are now up.

At the Chicago Exploration company camp the big pipe down something over 750 feet. The Monumental Oil company has an excellent showing of oil in its well at a depth of a few hundred feet.

ANDERSON'S ERECT RIG. The Anderson Oil company has just erected a rig and started work. The Aztec company is now down 250 feet with its first well.

THE NAVAJO OIL COMPANY has reached a depth of over 1,000 feet and is now in a sulphur water, which in several cases is above the oil sands.

AT SPENCER WELL. The Spencer well on the London and 1 San Juan ground at a depth of 529 feet was in 30 feet of oil sand, which gave every indication of being a large well.

THE ARCOLE WELL. The Arcole well, which is being sold to the various companies operating for fuel. In one or two cases the crude oil being used in the electric power plant.

THE ARCOLE WELL. The Arcole well, which is being sold to the various companies operating for fuel. In one or two cases the crude oil being used in the electric power plant.
