BLEAK NEW ENGLAND.

Farmers Forsaking the Sterile, Rocky Hills.

THE YOUNG MEN WON'T STAY. Perhaps European, Not Knowing the Advantages of the West, May Be Induced to Take the Farm.

An exceedingly interesting movement is now in progress in at least two of the New England states. The decline of population in the rural districts of that section is a familiar fact. But for the accident of location near the sea coast where settlers first landed, those sterile hills and rocky fields, whence by hardest toil the husbandman wrings scarcely more than a bare subsistence, would have been today comparatively uninhabited.

ELLENBURG, Oct. 14.—Arrangements were partially completed today for the beef packing establishment, which will have a capital of \$150,000.

ELLENBURG, Oct. 14.—This afternoon about 1:30 o'clock C. A. Baudier's flouring mill, an old landmark, about three-fourths of a mile from the city, caught fire from a steam thrashing machine engine which was used in ransacking the mill on account of low water.

WALLA WALLA, Oct. 14.—Alfred Loftus, who was examined before Justice of the Peace Hall at Milton, on Saturday, for assault with a deadly weapon on Mr. Bryant, was put into Milton city jail, but effected his escape Saturday night, with the aid of a confederate, who broke the lock off the door with a crowbar.

WALLA WALLA, Oct. 14.—The report widely telegraphed from Ottawa, that the Dominion government had censured Admiral Hodge for his action in removing the German bark Hustel from anchorage in Biquinat harbor and urging the admiral's recall, is contradicted on the highest authority. The Dominion government has taken no action in the matter, it being one of imperial concern only.

WALLA WALLA, Oct. 14.—A dead man was found this evening by sectionmen near the railroad track about four miles from the city. He has no papers on him for identification, and has the appearance of having been dead for some time.

WALLA WALLA, Oct. 14.—A large body of iron ore of the finest quality, has been discovered four miles south of the city. This, together with the large quantities of coaling coal found six miles north of the city, is giving a great impetus to subscriptions of stock for iron furnaces and rolling mills to be built at Ellensburg.

WALLA WALLA, Oct. 14.—At the annual meeting of the directors of the Astoria & South Coast railroad, held this evening, the following officers were elected: President, William Bell; first vice-president, Dr. Alfred Kinney; second vice-president, C. H. Page; treasurer, I. W. Case.

WALLA WALLA, Oct. 14.—Articles of agreement were signed today by James H. Faulkner and Charles Eytan, of Australia, to wed in Tacoma, catch-as-catch-can, before October 25. Eytan is a boyish-looking fellow, with a smooth-shaven face, and inclined to be round-shouldered.

WALLA WALLA, Oct. 14.—The oil schooner... of San Diego, E. S. Babcock, Jr., overboard here yesterday with 30,000 gallons of oil, broke from her moorings this morning and is now on the beach. She will probably go to pieces and be a total wreck.
