ALWAYS THE LOWEST PRICES.

G. A. NEWHALL,

Corner Second and Madison Sts.

From Mr. Cleveland for relief in another direction.

"First—He was nominated in 1884, and certainly the Democratic party did not agree with him on his civil service policy which he enforced during his first term, did they?"

"Second—He was nominated in 1888, and certainly we do not agree with him on the money question? This remains to be seen. If present indications can be relied upon, I should say that the Democratic party will declare for free silver."

"Third—We nominated him in 1892, and do we now agree with him on the money question? This remains to be seen. If present indications can be relied upon, I should say that the Democratic party will declare for free silver."

"How would it be for us to nominate for president Hoke Smith, of Georgia, for vice president, Joseph K. Toole, of Montana? Allow me, through the columns of your paper, to throw out the suggestion of Smith & Toole as the shibboleth for '96. It can not result any more disastrously than many of my suggestions of your paper to throw out relief in this, then what is the next thing to be done?"

"The DEMOCRACY."

"Where are you going from here?"

"I am on my way to New York and Washington City."

"What, again?"

"Yes, again."

HAZARD GOES EAST AGAIN.

His Views on the Silver Question—Smith and Toole for 1896.

Spokane, May 23.—An Associated Press reporter Secretary Carlisle today expressed himself as astonished at the magnitude of the sound money demonstration.

"I don't want to say that I am in town, just let me sink into that obscurity which I crave. How is the silver question?"

"It is pretty warm in this section. How have you found it, George?"

"Well, down at Colfax, where I was yesterday, the silver question seemed to be alive with silver advocates—Republicans as well as Democrats. The understanding down there is that Warren and I will have the biggest meeting there next Wednesday evening held in the Palouse valley. "Martin Maloney, the Palouse collector at New Whatcom, came to the city and he is here to see me. He rode from Ellensburg to North Yakima on the same train with the late Democratic candidate for governor, H. S. Givens. He was informed Maloney that the whole Yakima valley, without regard to party, is for silver. All the public talk, so far as I hear, is for silver. However, I think it has not been understood before we made up our minds finally, that so far there has been but one side of this question discussed, and that is the free coinage side."

"What appears to be now the most unanimous demand for free silver is the expression of determination on the part of the sound money advocates of the West to have relief of some kind, which in the end is bound to come, even if through revolution. There is no doubt of the ability of the sound money people since 1874 have allowed themselves to be misled by Mr. Cleveland regarding the question of taxation. I suppose the sound money advocates of the West have a plan that my Democracy on the subject of taxation is based upon the policy formulated by Thomas Jefferson and practiced by every President since James Monroe, Andrew Jackson, Martin Van Buren, James K. Polk, Franklin Pierce, James Buchanan and Samuel J. Tilden. It is the sound money doctrine of incidental protection—collect no more revenue than was necessary to defray the expenses of the government economically administered. I sent this from the custom house only, and get it in such a way as to benefit America, the most and foreign countries the least of 1887. Mr. Cleveland sent an unwise, uncalculated, and injudicious message to congress proposing in effect, to overthrow this ancient and honorable Democratic doctrine of incidental protection; and on that subject ever since, until the adjournment of the last congress, he kept the country in a turmoil, only to have it happen in the end that we are to have congress pass a bill which he not only refused to sign but which he denounced on the floor of congress in his letter to William Wilson and in his letter to his letter to Representative Catchings as a "monstrous iniquity," as a gross violation of a sacred trust. And yet he would not veto it, but allowed it to become a law without his signature. "The great body of suffering mankind in America, the debtor class, who led up to the proposition by Mr. Cleveland of overthrowing the precedents of 169 years, thinking they could get relief through the tariff, are now suffering disappointment. Today what principle is more firmly fixed in America, aside from the integrity of the Union, than this ancient and honorable Democratic doctrine of incidental protection? In fact, there is so much protection in the Wilson bill that it is quite acceptable to a large number of Republicans. "Now the great debtor class see away
