Hoke Smith's Expert Finds Only a Trace of Gold in School Section 16, Tacoma, and His Report is Destructive to the Claim of McBride and Swinford.

Tacoma, July 29.—Special.—It would seem that the Paul Schulze defalcations are almost without end. New ones come to light in every quarter.

Ten days ago General Land Agent Cooper, who has been in charge of the land department since Schulze blew out his brains, reported the defalcation to Land Commissioner Phelps.

Some time ago the mill company laid claim to a section of timber land across the Sound. As the Schulze investigation was going on at the time it was concluded it was one in which the price of lumber was engaged.

It is common talk about town that the \$4,000 detective bill owed by Schulze was due for the shadowing about the country of a well-known actress of whom Schulze was enamored.

The ingredients in a pound of Royal Baking Powder have been determined to cost 50 per cent more than those in a pound of any other brand.

SECTION 16 NOT ACERIFEROUS.

Hoke Smith's Expert Reports Against McBride and Swinford.

Olympia, July 29.—Special.—A Daniel has come to judgment at last in the McBride case, and the state geologist has attended so assiduously to the people's interests in this matter, now feel little fear that the ultimate result will be entirely favorable to the state.

The result of the geologist's search shows fairly well a regular proportion, approximately of one color to every other pan. The report further says: "Considering the enormous bodies of gravel in this vicinity, which are reported to have been transported, it is from a geological standpoint very unlikely that any part of them contains enough gold to pay for the cost of the hydraulic process."
