Is steadily improving and before many months is bound to become a dividend paying property. The same can be said of the CROWN POINT and COMMANDER. All these properties are under excellent management, and this fact alone should give confidence to those who are in doubt. Spokane people are making money through investing in this stock, why shouldn't the Seattle people do the same?

UNDER THE FIRST NATIONAL BANK

Policy No. 171,734, in the Mutual Benefit Life Insurance Co. of Newark, New Jersey, on the life of Mr. Isaac W. Entz, of Seattle, Washington, was issued in 1891, at age 29, for \$2,000, with an annual premium of \$2.50. He paid 45 premiums amounting to \$112.50. He did not pay the premium due in February, 1896, but instead of taking a paid-up policy for \$850, he allowed his insurance, including dividends, to be extended for 9 years and 281 days for the sum of \$3,100, making in all 14 years and 83 days' insurance at an average yearly cost of \$2.35 per thousand.

Mr. Entz died in April, 1896, 2 months after the lapse of the policy, which, however, was promptly paid in full by the Company. ANGIS W. YOUNG, State Agent, 117, 119, Washington Block, Seattle, Wash.

MINERALS RECEIPTS

A Strong Letter on Campaign Issues.

VIGOROUS, PLAIN WORDS.

Protection, Money and Reciprocity the Questions.

A LONG SILVER DISCUSSION.

The Candidate Unalterably Opposed to Free Coinage.

Peril in the Democratic-Populist Plank Favoring Irredeemable Paper Money.

The Effort to Array Class Against Class Reprehensible in the Highest Degree—Comparison of the Condition of the Country Under the McKinley Law and Today.

Can'ton, O., Aug. 26.—Mr. McKinley's letter of association was issued today. It is a plain, practical, sensible and strong presentation of the principal issues of the campaign from a Republican standpoint, of easy comprehension and of great interest. It is devoted principally to the discussion of what he considers the great questions of the campaign, protection, money and reciprocity. About one-third of the message is devoted to a consideration of the free silver question. He announces that he is unalterably opposed to free coinage. He shows that the new Democratic plank, the pending campaign is no new departure, but silver and free coinage, which has been the policy of the Republican party since 1853. He says it has inaugurated no new policy, but it has inaugurated an old policy, and that it is in circulation and as good as all of the silver paper money, which are now included in the currency of the country. It will maintain their parity with the gold dollar, and will protect the future as it has always done in the past. It will not consent to put the United States on a silver basis, which would immediately reduce the value of the gold dollar, and would cause the expulsion of gold from our circulation. He says that the farmers and laborers would suffer most by the adoption of free silver.

The silver question in his judgment is not the only issue affecting our money in the pending campaign. He considers the declaration of the Democratic and Populist party for unlimited, irredeemable paper money as the most serious menace to our financial stability, and one which could be conceived, and appeals to every patriotic citizen to promptly meet and defeat it. He condemns as in the highest degree reprehensible the effort to array class against class, the classes against the masses, section against section, labor against capital, the poor against the rich, or interest against interest.

He considers protection as an issue of supreme importance, and observes that the peril of free silver is a menace to be feared, which is already experiencing the effect of partial free trade. The one he would avert, the other correct. He recommends the restoration by congress of the reciprocity sections of the tariff law of 1890, with such amendments, as in any, as time and experience sanctions, and the understanding of the principle of this legislation, he declares, should be strictly observed. This he explains to "afford new markets for our products without loss to the American laborer of a single day's work that he might otherwise have secured."

He discusses foreign immigration briefly but forcibly. He commends legislation that will prevent the coming here of all who make any profit from the sale of their labor, and who are engaged in the sale of their labor for profit by public disquiet and turmoil. He favors liberal pensions for the soldiers and sailors.

MAJOR MCKINLEY'S LETTER.
"Mr. John M. Thurston and Other Members of the Republican National Convention: Gentlemen: In pursuance of the promise made to you when I was nominated for president, I beg to submit this formal acceptance of that higher and more important duty which has been placed upon me in the pending campaign. Perhaps this might be considered unnecessary, in view of the fact that I have already been elected to the office, and upon the right of which rests largely the financial honor and prosperity of the country. It is proposed by one wing of the Democratic party and its allies, the Populist party, to inaugurate the free and unlimited coinage of silver by independent action on the part of the States, and to issue a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold. The new declaration of this purpose is a menace to our financial stability, and to the welfare of the people of the United States. It involves great peril to the credit and business of the country, and everywhere is breaking away from their other party associations and uniting with other patriotic citizens in an assault upon the faith and honor of the government, and the welfare of the people. We have had few questions in the lifetime of the republic more serious than the one which is now before us.

No Benefit to Labor.
"The character of the money which shall measure our values and exchanges and settle our balances with one another and with the nations of the world, is of such primary importance, and so far-reaching in its consequences as to call for the most painstaking investigation, and the most emphatic expression of opinion on the part of the people. We must not be misled by phrases nor deluded by false theories. Free silver does not mean that silver dollars

were to be freely had without cost of labor. It would mean the free coinage of silver by independent action on the part of the States, and the issue of a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor.

The Double Standard.
"On the 22d of August, 1891, in a public address, I was asked to issue a national ratio which all the leading nations of the world would adopt, and the true ratio would be established between the two metals, and all agree upon a standard of silver which should constitute a dollar, then silver would be as free and unlimited in its issue as gold. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor.

What Free Coinage Means.
"The meaning of the coinage plank adopted at Chicago is that anyone may take a quantity of silver bullion now in the hands of the United States, and have it coined at the expense of the government and receive for it a silver dollar, which shall be legal tender for the payment of all debts, public and private. The owner of the bullion would get the silver dollar. It would belong to him, and he would be free to use it as he pleased. It would be his property, and he would be free to use it as he pleased. It would be his property, and he would be free to use it as he pleased.

More Silver Than Any Country.
"We have more silver in use than any country in the world except India and China. There are, however, 32,000,000,000,000 more than Germany, 32,000,000,000,000 more than India, and 125,000,000,000,000 less than China. The United States has more silver than any other country in the world. It has more silver than any other country in the world. It has more silver than any other country in the world.

The Dollars Compared.
"We have coined since 1873 more than 40,000,000,000 silver dollars, which are maintained in circulation by the government, and are a full legal tender for the payment of all debts, public and private. How are the silver dollars now in use different from the silver dollars which were issued under free coinage? They are of the same weight and fineness, they are of the same value, they are of the same weight and fineness, they are of the same value, they are of the same weight and fineness, they are of the same value.

They Could Not Be Kept at Par.
"These dollars, in the particular I have named, are not the same as the dollars which would be issued under free coinage. They would be the same in form, but different in value. They would be the same in form, but different in value. They would be the same in form, but different in value. They would be the same in form, but different in value.

Metallism.
"Metallism is the doctrine which holds that the value of money is determined by the amount of metal which it contains. It is the doctrine which holds that the value of money is determined by the amount of metal which it contains. It is the doctrine which holds that the value of money is determined by the amount of metal which it contains. It is the doctrine which holds that the value of money is determined by the amount of metal which it contains.

We Now Have More Silver Than Gold.
"The quantity of silver in circulation, during the year 1895, was 32,000,000,000,000 ounces of silver, or 1,280,000,000,000 dollars. The quantity of gold in circulation, during the year 1895, was 1,280,000,000,000 ounces of gold, or 1,280,000,000,000 dollars. We now have more silver than gold. We now have more silver than gold. We now have more silver than gold.

It is Proposed by One Wing of the Democratic Party.
"It is proposed by one wing of the Democratic party and its allies, the Populist party, to inaugurate the free and unlimited coinage of silver by independent action on the part of the States, and to issue a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold. It is proposed by one wing of the Democratic party and its allies, the Populist party, to inaugurate the free and unlimited coinage of silver by independent action on the part of the States, and to issue a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold.

The So-called Sherman Law sought to use the silver in the hands of the United States for money at its market value.
"The So-called Sherman law sought to use the silver in the hands of the United States for money at its market value. It sought to use the silver in the hands of the United States for money at its market value. It sought to use the silver in the hands of the United States for money at its market value. It sought to use the silver in the hands of the United States for money at its market value.

The Character of the Money which shall measure our values and exchanges and settle our balances with one another and with the nations of the world, is of such primary importance, and so far-reaching in its consequences as to call for the most painstaking investigation, and the most emphatic expression of opinion on the part of the people.

The Congressmen Renominated by Acclamation.

TODAY THE STATE TICKET.

The Minor Offices Still Depend Entirely on the Governor.

P. C. Sullivan or Eugene Wilson to Be the Nominee for the First Place—The Southwest Combine Holds Balance of Power—King County Delegates Get Together—Only Ten of Them for Wilson.

For Congressmen.
WILLIAM H. DOOLITTLE.....Of Pierce
SAMUEL C. HYDE.....Of Spokane

Tacoma, Aug. 27.—Special.—At 12:30 this morning the situation with respect to the governorship is rapidly being simplified. Indications point to the nomination by the convention tomorrow of P. C. Sullivan, of Tacoma, or Eugene Wilson, of Kittitas. These have been the two leading candidates before the convention, and they show that they still believe that any other candidate. As the situation is tonight, the following call will be carried through the convention today. The Southwest combine holds the key to the situation, and whichever of the two candidates is elected, it will be a matter of seven votes of this combine will be the nominees of the convention without a dissenting voice. The Southwest combine is all day for Ross and Forrest, and the combine is a power in the convention.

A new slate has been put up which may be carried through the convention today. It will have the effect of harmonizing the various interests, and if carried out will be a strong inducement to a convention which would be a cover-up for the party. It would have the effect of harmonizing the various interests, and if carried out will be a strong inducement to a convention which would be a cover-up for the party.

The day has been busy one, with caucuses hourly. The King county delegation is working more in harmony, and will likely unite in the convention. It will not consent to put this country on a silver basis, which would immediately reduce the value of the gold dollar, and would cause the expulsion of gold from our circulation.

Farmers and Laborers Suffer Most.
"The farmers and laborers suffer most by the adoption of free silver. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor.

They could not be kept at par.
"These dollars, in the particular I have named, are not the same as the dollars which would be issued under free coinage. They would be the same in form, but different in value. They would be the same in form, but different in value. They would be the same in form, but different in value. They would be the same in form, but different in value.

Metallism.
"Metallism is the doctrine which holds that the value of money is determined by the amount of metal which it contains. It is the doctrine which holds that the value of money is determined by the amount of metal which it contains. It is the doctrine which holds that the value of money is determined by the amount of metal which it contains. It is the doctrine which holds that the value of money is determined by the amount of metal which it contains.

We now have more silver than gold.
"The quantity of silver in circulation, during the year 1895, was 32,000,000,000,000 ounces of silver, or 1,280,000,000,000 dollars. The quantity of gold in circulation, during the year 1895, was 1,280,000,000,000 ounces of gold, or 1,280,000,000,000 dollars. We now have more silver than gold. We now have more silver than gold. We now have more silver than gold.

It is proposed by one wing of the Democratic Party.
"It is proposed by one wing of the Democratic party and its allies, the Populist party, to inaugurate the free and unlimited coinage of silver by independent action on the part of the States, and to issue a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold. It is proposed by one wing of the Democratic party and its allies, the Populist party, to inaugurate the free and unlimited coinage of silver by independent action on the part of the States, and to issue a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold.

The So-called Sherman Law sought to use the silver in the hands of the United States for money at its market value.
"The So-called Sherman law sought to use the silver in the hands of the United States for money at its market value. It sought to use the silver in the hands of the United States for money at its market value. It sought to use the silver in the hands of the United States for money at its market value. It sought to use the silver in the hands of the United States for money at its market value.

The Character of the Money which shall measure our values and exchanges and settle our balances with one another and with the nations of the world, is of such primary importance, and so far-reaching in its consequences as to call for the most painstaking investigation, and the most emphatic expression of opinion on the part of the people.
"The character of the money which shall measure our values and exchanges and settle our balances with one another and with the nations of the world, is of such primary importance, and so far-reaching in its consequences as to call for the most painstaking investigation, and the most emphatic expression of opinion on the part of the people. We must not be misled by phrases nor deluded by false theories. Free silver does not mean that silver dollars

were to be freely had without cost of labor. It would mean the free coinage of silver by independent action on the part of the States, and the issue of a new gold and silver dollar at a ratio of 16 ounces of silver to 1 ounce of gold. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor.

It would mean that labor would be made to pay for the money which it would receive in exchange for its labor.
"It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor. It would mean that labor would be made to pay for the money which it would receive in exchange for its labor.
