THE TREATMENT THAT CURES.

How Doctor Copeland's Wonderful Medication Does Its Beneficent Work for Suffering Humanity. It Reaches, Soothes and Heals Every Part of the Mucous Membrane, Curing Invariably All Forms of Catarrhal Diseases of the Nose, Throat, Vocal Cords, Bronchial Tubes, Lungs and Deafness.

The Treatment That Cures. Doctor Copeland's new treatment, that has lifted the darkness and blight of the word "incurable" from hundreds of thousands of these cases of catarrh in the ears, bronchial tubes and lungs, works its curative action for two reasons:

(1) It reaches every sore spot from the orifice of the nose to the deepest part of the lungs, to the innermost recesses of the middle ear. (2) Instead of irritating, inflaming and feeding the fires of the disease, it soothes, quiets, heals and cures. What is this treatment that cures these conditions, once regarded incurable? By what process does it restore the diseased membrane, remove the poison and relieve the soreness of patients cured and being cured?

How It Cures Common Catarrh.

Here is a patient taking treatment for catarrh of the head. He breathes the soothing medication through his nostrils and the nasal channels open up, the stuffed-up feeling in the head leaves and he can breathe naturally through the nose again. The dull pains across the front of the head fade away, and the nasal membrane softened until the inflammation affected by the poisonous mucus is removed. The odor of the breath passes away and the lost sense of smell returns. The drooping in the throat is checked, the nose does not stop up toward night any more, the sneezing and sniffing have ceased, and the discharge from the nose grows less and less, and finally stops altogether. The disease has been checked and eradicated from the system before it even reached his throat. It had not been driven down into his throat or into his lungs or into his ears, as so often is done by other treatments.

How It Cures Catarrh in the Throat.

Here is another patient who had catarrh in the head. He caught cold after cold, and the disease spread down into his throat. He breathes through his nostrils, but he cannot get rid of the membranes of his head and throat. The irritation of the throat becomes more and more acute, and he becomes less and less able to swallow. The sense of taste is lost, and he has no more gurgling and vomiting. He has no more sleep, and he is unable to do his work. He has a constant cough, and he is unable to get rid of the phlegm that comes up from his throat. He has a constant feeling of heat in his throat, and he is unable to get rid of the burning sensation. He has a constant feeling of dryness in his throat, and he is unable to get rid of the parching sensation. He has a constant feeling of tightness in his throat, and he is unable to get rid of the constriction. He has a constant feeling of soreness in his throat, and he is unable to get rid of the pain. He has a constant feeling of weakness in his throat, and he is unable to get rid of the fatigue. He has a constant feeling of nervousness in his throat, and he is unable to get rid of the anxiety.
