

REBEL GEORGE STARTS

DUNKO MAN FORCED TO LEAVE FOR LOS ANGELES.

Known to be Very Angry at Finding Himself Hunted for the South-State Officers Cleverly Elude the Attorneys for the Prisoner—An "Oregon Boat" is Fitted to His Feet and He Departs in Charge of a Detective.

Special Dispatch to the Post-Intelligencer. SPOKANE, July 17.—Rebel George Knowlton left here this night in custody of Detective J. A. Stradford of Los Angeles, bound for that city, where he will be tried for working his peculiar line of business. Knowlton was a mad man when he left here. His attorneys had tried in every way to secure his release, being balked at every turn by the prosecuting attorney and police.

When Knowlton was almost sure of freedom an information was filed against him. This seemed to please him, as it would put off his undesirable trip to California. Yesterday the detective arrived about dark, and prosecuting attorney Pierce dismissed the information. Judge Frater attached his signature, an "Oregon boat" was put on Knowlton and before his attorneys had the slightest intimation of what was going on Knowlton was on the train, reaching it just as it pulled out. The attorney's name is not known. The train is greatly charged today at the way they were outwitted.

PAVING TO BE DONE CHEAP.

Rival Contractors Bring the Price Down in Spokane.

Special Dispatch to the Post-Intelligencer. SPOKANE, July 17.—If this city really begins paving this year, and there is reason to believe it will, it will probably have the work done at a considerably cheaper figure than is ordinarily paid. When the paving question first came up there was a considerable demand for the use of home material, but at that time no vitrified brick had ever been manufactured in this county. The city engineer recently prepared estimates for the cost of paving Main avenue with vitrified brick on foundation concrete foundations, there to be a granite curbing along each side of the street. He estimated the cost at \$2.71 per square yard.

Within a few days a California asphalt firm made an offer to lay a pavement of that material, guaranteed for five years, at a price which was to be less than \$2.71. The following day J. H. Spear, a local brick manufacturer, informed the council that he was engaged in burning his first kiln of vitrified brick, and that he had various pavements of that material at prices ranging from \$2.15 to \$2.50 per yard, and enter into suitable guarantee as to wearing qualities and excellence of material.

It is expected an even lower bid will be made before the contract is finally let. The board of public works will probably call for bids within a short time.

BARBERS TO CLOSE ON SUNDAY.

Spokane Union Decides to Enforce the Law.

Special Dispatch to the Post-Intelligencer. SPOKANE, July 17.—Tomorrow will probably witness the revival of the enforcement of the Sunday closing ordinance, at least in the barber shops of the city. Most of the barber shops of the city are represented in a recently organized union. The union recently decided to have all shops closed on Sundays, and have announced that compliance with the law is a condition of membership. The union will file complaints against all shops that violate the ordinance tomorrow.

The mill will be erected by the company under the supervision of T. I. Mitchell, and will be running by December, turning out about thirty tons of concentrates a day. The average value is 50 ounces silver and 60 per cent. lead. The mill will be located on the south fork of the Kaslo creek, about two miles from the Kaslo & Spokane railway, and will be operated by water power. About thirty men will be employed in the construction work.

The Indians were scattered along the river from Hamilton to Marble Mount, and were unapprehended, believing that the party which took two guns and three ponies were given to the murdered man's brothers had hushed the matter up.

The accused Indians had their preliminary examination before Justice Barker yesterday afternoon, and the proceedings were direct and corroborative, the stories of the witnesses agreeing in almost every particular. Two of the accused, Johnnie Tommie and Johnnie Shuranger, turned state's evidence, and the other two, Charlie Moses and Johnnie Tommie, were also present.

It was decided to have a chief of police and two patrolmen, at salaries to be fixed by the council. C. B. Winton was elected chief, and R. A. Winkler and J. McKinnon patrolmen. Mayor Houston vigorously protested against the election of Winton, and the council would probably not pay him. Commissioner Crossdale, manager of the Hall Mines Company, Ltd., became indignant and said that when the council was to threaten the board by the use of a weapon of this kind, the board would take care to protect itself. Hostilities were then suspended and the board adjourned.

THE STRIKERS HOLD FIRM.

West Virginia Men on the Eve of Going Out—Signs of a Coal famine.

PITTSBURG, July 17.—District mining officials have come to a realization of the gravity of the coal miners' strike situation, as far as the shipments of coal from the district just east of Pittsburgh and the Clearfield and Cambria coal districts are concerned. They have come to a realization of the fact that the coal from these centers is playing havoc with the cutting off of the supply from the Pittsburgh trade, thus militating against the success of the strike. It is proposed to hold a number of mass meetings during the next week. An important message from West Virginia was received at miners' headquarters today. It came from a prominent state official, and stated that the situation has taken a change, with indications strongly in favor of the miners coming out. The miners' officials believe that the West Virginia miners will be out Monday morning. One operator was heard to say that if the West Virginia men came out there would be great danger of a coal famine.

The ranks of the miners are still holding firm, with no sign of a break at any point. A very large number of meetings will be held tomorrow to give encouragement to the men.

Arbitration Commissioner Schmidt, who is the only one of the commission in the city tonight, received a telegram from Commissioner of Labor Barton, of West Virginia, announcing that the situation in that state was entirely changed, and that he expects the miners to strike.

FISHERMEN'S UNION COLLAPSES.

Unable to Control Men on the Columbia River—Lowered by the Fishermen. ASTORIA, Ore., July 17.—At the mass meeting held yesterday by the fishermen, a committee of five was appointed to meet the directors of the new cannery and make arrangements to give the cannery their fish, and report at 5 p. m. today. A conference between the committee and directors was held at 5 p. m. today, and the committee reported that owing to the large amount of money needed for running expenses it would be impossible to handle the outside fish.

At 5 p. m. the committee proceeded to the hall to make a report, but found an empty hall instead of a body of restless fishermen, as most of them had gone to the cannery, where they were taking fish to their respective canneries at 3 cents per pound. Several of the most prominent fishermen on the river now admit that the Fishermen's Union is a thing of the past, and that it has practically no influence. They also state that the union has less than \$2,000 in funds on hand.

Miss F. Wilzinski Graduate Optician... 705 Second Ave. (Jos. Mayer & Bros.)

THANKS WAS ADOPTED BY THE CLASS AT THE SPECIAL MEETING AND PAINSTAKING PUT FORTH ON THE PART OF THE INSTRUCTORS TO MAKE THEIR WORK PROFITABLE AND INTERESTING.

State Superintendent Browne was present and gave a most valuable and interesting address on the proper care and training of pupils for the highest and best aims of life. His lecture, delivered in a most interesting and instructive manner, was rich in illustrating the superior knowledge of that writer on the training of the young and showing the wonderful range in professional work with which that great author was familiar.

The institute work was warmly commented upon, and while it may be noted that some disparity existed by reason of the general instruction not consistent with text books of the state regarding the same so far as topical work is concerned, and laid down by the authors of the text books, many of the work and a lasting benefit may be expected.

Another week of the cool weather will insure what against dry weather as far as development is concerned.
