

THE PASSING THROUG.

Miller Freeman, editor of Ranche and Range, the leading agricultural paper of the state, has returned from the Spokane fruit fair, which he characterized as an unequalled success. Mr. Freeman says that the fair will be an annual harvest festival picnic, and the most pretentious arrangements are being perfected for making it wider in its scope.

Spokane is in the midst of the greatest agricultural district in the state, easily reached by several railroads, and with but a moderate continuance of the prosperity which now prevails among the farmers the district is bound to grow, and eventually will be the greatest agricultural, horticultural, viticultural and pomological display in the state.

A couple of weeks or so ago Thomas Sanders, president of the Bryant Lumber and Shingle Company, came back to Seattle after some experiences in Rossland and Nelson, from both of which places he was warned by typhoid fever, Bona Tahoma, and cholera, not to be outside, come out, and the citizens of Spokane are making with cholera. The citizens of Spokane voted that if they ever caught the disease which they lived they would string him up to the nearest tree.

His glasses gave me instant relief. I shall recommend Mr. Klodt wherever I go."

It is also stated that Mr. McGinnis is interested in a steamship transportation line that will be operated in connection with the Canadian Pacific.
