Seattle, June 10, 1883.

## CAPITAL NEWS.

**The Woman's Suffrage Bill Laid to Rest—Another New County Heard From, and Other Items of Interest.**  
(From our own Correspondent.)  
OLYMPIA, Oct. 12.  
Instead of doling out stationery to the members each day or two in small quantities, Secretary Jones, at the commencement of the session, gave each member of the Assembly an abundant supply of paper, envelopes, pens, pencils, letter books, ink, blotting paper, and other stationery, which proved much more satisfactory than the old practice formerly in vogue.

In the Council today Mr. Burke introduced C. B. 18, appropriating \$2000 for the purpose of building a bridge across the Kalama River in Cowichan County, which was read and referred.

Mr. Hall introduced C. J. R. No. 7, for the appointment of a joint committee to examine the offices and accounts of the Territorial Auditor and Treasurer. Passed.

Council Bill No. 14, authorizing the Commissioners of King County to borrow money to build roads. Passed.

Council Memorial No. 2, for the support and maintenance of a snag-boat for the rivers of Puget Sound, was passed and referred.

C. B. 16, fixing the salary of the Probate Judge of Walla Walla County at \$300 per annum, and allowing him certain fees, passed.

**HOUSE.**  
Mr. Kuhn introduced House Memorial No. 2, praying for the establishment of a land office at Port Townsend. Adopted.

The Woman's Suffrage bill passed to its third reading, and was laid on the table, unless Mrs. Downey, who arranged the reading, can secure a sufficient interest on the part of the members to recommit it.

Mr. Kuhn introduced H. J. R. No. 9, praying for an act to amend an act passed on November 10th. If this passes, the session will be out for forty days instead of sixty, as allowed by law.

Mr. Landrum introduced H. J. R. No. 19, an act in relation to judgments and decrees in the District courts.

Mr. Clark introduced a bill to establish a commission to investigate the affairs of the State, and to report thereon to the next session of the Legislature.

Mr. Clark introduced H. B. 25, an act to create a county of Assasin out of a portion of Garfield county. The assembly, upon the reading of the bill, decided to refer it in favor of the passage of the bill, but to make the name Lincoln instead of Assasin. This proposal was taken in consideration, and the vote was taken, asking that the name given be Lincoln county.

Mr. Goodell introduced H. B. 23, an act providing for the districting of certain counties for the election of county commissioners.

**NOTES.**  
Mr. Blackwell, member of the House from Pierce county, is reported dangerously ill at his residence in New Tacoma.

Mr. Warner, of the House, has been quite sick at his lodgings in this city, but this evening is much better.

The postoffice here will be moved into its new quarters on Monday.

The Chinese New Year festival of this city celebrated one of the annual holidays of that organization this week.

Some of the papers here are going after the "nasal gland" of the people who are raking in cash here, Seattle, for a remedy for such evils by high prices. Would it not be well for the people of the Capital City to adopt the same plan?

The people here are still clamoring for a good hotel. An institution of the kind would be a paying investment judging from the indications. Mr. Everett, of New Tacoma, is here looking into the matter, and it is not unlikely that he will decide to take hold of it.

The Transcript tomorrow will say: On Wednesday evening, at a meeting of the board of directors, it was decided to purchase a new engine for the city, through Mr. W. F. Blowers, agent. It will be a fifth size Blowers, full model plated, with a capacity of 100 horse power, and will cost \$10,000. It will be delivered in sixty days. They also ordered 2,000 feet of iron pipe, and 100 tons of coal. Also two horse carriages carrying 100 feet of hose each, which will likely be built here. Great credit is due to the men who have been instrumental in getting the funds subscribed and collected for this object, particularly to Messrs. McCallan and Anderson.

John L. McDonald, a logger in Foster's Camp, has been injured by a log rolling over him, and is now in the hospital. He is a native of eastern Iowa, and is not unlikely to be remembered as the logger who won the first prize on the Fourth, in the logging match on the bay.

Harriet of Seattle is visiting her sister, Mrs. Captain G. H. Parker, in this city.

W. H. White and Wm. Cochrane are in town looking after the passage of a logging law bill, which will be introduced in the Legislature in a day or so. N. D. Symons of Lewis county fell from a platform on Monday at Tonno and fractured his arm.

## REMINISCENCES OF THE PAST BY A RESIDENT OF 1883.

(Written for the Post-Intelligencer.)  
CLEAR CREEK, Neb., Sept. 23, 1883.  
Thirty years ago I helped out a trail up around the south end of Lake Washington, along the Snoqualmie River, up by the falls, over Cedar River, around its falls, along the north shore of the lake, through the hills, over the Cascade Mountains and down to a stream, the outlet of a large lake, with waterfalls that we could hear. Our Indians, who were from the Tomamans lived in the lake, and that it had taken two Indians down in its waters. Judge Lander, Walker and the Indian guide went on ten or fifteen miles and came back by the Snoqualmie Pass. We re-crossed the mountain to our camp on Cedar River.

Before we commenced the ascent on our outward course here, we cut down the Cedar, crossed to the south side and around some steep buttes where it was very difficult to get our pack animals around; then on down the Cedar, and across to and down a branch of the Green river to that town, then lived in the valley and their canoes and descended the Green to the White river, and then down White river to our homes at the forks of the White and Cedar rivers. For a week or an absence of three weeks.

The people of Seattle found provisions; we took our axes and cross cut saw, and went on our way, crossing along back of Lake Washington, sawing off big logs, rolling them out of the way, cutting brush and fallen timber, etc. One day we got so tired that we were unable to go on, and we were obliged to go back to our homes at the forks of the White and Cedar rivers.

While in the hills we found chunks of coal along the little streams that we were following. Dr. Biegelow, our geologist, said that they were outcroppings of coal banks. The Indians at Squak Lake said that there were big banks of "pit stone" up on the stream they lived on. We camped on a little prairie between the Snoqualmie and Cedar rivers; killed a rattlesnake and named the prairie Rattlesnake Prairie. We saw a white bear, or perhaps a mountain sheep, on the mountain to the south of the prairie, walking on a ledge of rock, about 100 feet above the ground.
