**For New or Old Homes**

Whether you intend to build or remodel, figure an ARCOLA as one of the best paying investments in your home. If you have a flat building each tenant may have a separate ARCOLA and run his plant to suit himself. Installation is very easy and quickly made, as pipes may be run through partitions or left exposed, thus helping to warm the rooms. No valves or accessories are necessary. The outfit outlasts the building.

**"Good Night" in Warmth and Safety**

A HAPPY, health-protected childhood is a priceless gift within the power of parents to bestow. To arise and dress in a comfortable room; to play throughout a house uniformly warm; to sleep soundly in fresh, pure air from the open window, tempered just right by the radiator. These are the wholesome comforts that build sound bodies and sunny dispositions.

Children, like flowers, thrive best in clean, vitalizing heat. Hot-water heat does not devitalize the air—it is health protecting.

**Lifetime of Low-Cost Comfort**

Day in and day out the ARCOLA faithfully serves your family with low-cost hot-water heating. It never wears out nor needs repair.

It is a profitable, paying investment, now within the reach of every owner.

**Greatest Fuel Saving**

Burns hard or soft coal, coke, or wood. Heats ALL rooms or less coal than heating a few rooms with stoves. Leaks no coal-gas—wastes no heat up the chimney.

**Reduced in Size and Cost**

The ARCOLA is made on the same principle and with the same guarantee as our large IDEAL Heating Plants. The only difference is in the smaller size and lower cost of the outfit. ARCOLAS are especially designed for small homes, new or old, with or without cellars. Ideal-ARCOLA Heating Outfits are sold by heating contractors everywhere.
