

### WETS PLANNING BIG RALLY HERE APRIL 6

#### Well Known Persons in List of Association Against Prohibition.

District Attorney Banton was still out of town yesterday and had not yet seen Mr. Anderson's letter asking him to investigate the Constitutional League, which the Anti-Saloon League leader declares has honed President Harding and many other prominent persons, in the interests of the wets.

W. H. Stuyton, vice-president of the Association Against the Prohibition Amendment, made the following statement in reply to Mr. Anderson's accusations:

"There is no reason why the Association Against the Prohibition Amendment should resort to devious methods in accomplishing the object for which it was organized, as it is big enough and direct enough to warrant its standing on its own feet. It has never found it necessary to approach its objective in a roundabout way. It is only when you want to deceive people that you resort to camouflage. Great truths do not need intrigueries to support them."

Mr. Stuyton said the association will hold a members' rally in Carnegie Hall on the evening of April 6. Among its vice-presidents are Gen. Daniel Appleton, Kermit Roosevelt, James Speyer, Dr. Richard Derby, P. Tecumseh Sherman, Stuyvesant Fish and Irvin Cobb.

Detectives Walsh and Sweetbaum of Inspector Cahalan's staff seized five stills in the basement of 317 East 109th street yesterday, together with five barrels of wine and twelve of mash. They arrested Dominic Marano, 2152 Second avenue; James Watson, 239 East 109th street; and William Ohrenberg, 1688 Madison avenue. They said Marano employed the three others in the manufacture of liquor. Federal Agent Kupperman arrested two men at 115th street and Lexington avenue, charged with illegal transportation. They had eighty-four barrels of wine on a truck. They were Samuel Earler of 334 Prospect place, Brooklyn, and Solomon Feiler, 312 Grand street, Brooklyn.

In Newark yesterday William "Squawk" Kelly, an alleged bootlegger, forfeited a \$10,000 bail bond under which he was held to appear as a material witness in a shooting case.

### DRY RAIDERS IN FLORIDA SEIZE 13 LARGE STILLS

#### Scour Country in Automobiles and Arrest Four Men.

Special Dispatch to THE NEW YORK HERALD.—JACKSONVILLE, Fla., March 14.—The largest raid ever undertaken by Florida authorities was staged to-day when 100 men, mostly volunteers, in twenty automobiles swept through the western portion of Duval county in search of stills and moonshiners.

The result so far is the arrest of four white men charged with violating the national prohibition laws and the seizure of thirteen brass stills, 200 gallon capacity. About 500 barrels of mash have been destroyed.

E. L. Bergstrom, national field agent of the Federal Prohibition Department, came here to assist Chief Deputy Sheriff Frank Edwards in organizing the raiding squads.

### TRUANT BOY DROWNED

Stewart Fraley, 10, of 570 Ogden street, Newark, was drowned in the Passaic River at Newark yesterday. He had been sailing chips of wood with his brother, Frank, 7. The body was not recovered. Two truant officers were waiting at the Fraley home to find out why Stewart had not gone to school when Frank came home alone.

### NEW PROHIBITION PLAN ANGRERS DRY LEADERS

#### Report From Florida Like a Bomb in Reform Camps.

Special Dispatch to THE NEW YORK HERALD.—New York Herald Bureau, Washington, D. C., March 14.—Dry leaders were angry to-day over the Administration edict which will destroy their supremacy in prohibition enforcement affairs.

Attorney-General Daugherty's declaration in Florida that prohibition enforcement machinery will be transferred to its logical place in the Department of Justice, to free it from domination of the Anti-Saloon League and other dry groups, fell like a bomb in the dry camp.

From messages that have reached Washington in the last twenty-four hours from the Presidential party in Florida, it is evident that the Attorney-General will take up the question of reorganization of Government departments soon after the President's return. The fight over transfer of the prohibition enforcement to the control of the Attorney-General in all probability will reach Congress.

### ST. STEPHEN'S ALUMNI TO RAISE \$333 EACH

#### Dr. Bell Tells Diners of Bishop Manning's Support.

The alumni of St. Stephen's College of the Episcopal Church at an endowment campaign dinner last night at the Metropolitan Hotel agreed to raise \$333 each for the \$500,000 fund to make the institution permanent. The speakers were the Rev. Bernard I. Bell, president of the college; the Rev. David Stuart Hamilton of St. Paul's Church, Easton; William J. Tully and George Oliver Tamblin.

"When I went to Annandale on Hudson less than three years ago to look over St. Stephen's," said Dr. Bell, "I had a faculty of only six and a membership of nineteen. Bishop Henry Codman Potter did not care whether the college lived or died. In fact, he took the attitude that the sooner it died the better. With Bishop Manning in the Bishopric it is entirely different."

A letter received from Bishop Manning said: "I feel that St. Stephen's is an indispensable institution to the church at large. It has given to the church more priests than any other single college in the country. It has won the right of receiving the unequalled support of the diocese and the church."

Among those present were the Rev. R. S. W. Wood, the Rev. H. E. W. Froelke, Haley Fiske, Abraham Harford, Dr. Philip S. Dean, Henry Young, Jr., and Edward A. Sidman.

### \$5,142,000 FOR JEWISH FUND RAISED IN STATE

#### All but \$600,000 Comes From New York City.

The total sum raised in New York State for Jewish war sufferers in the campaign just completed was announced last night as \$5,142,000, of which \$600,000 was from up-State. The total for the national drive was reported as being more than \$15,000,000. Announcement was made by Felix M. Warburg, chairman of the joint distribution committee that handles Jewish relief funds abroad, that as a result operations will be expanded particularly in the Ukraine.

The final returns from Brooklyn showed that borough to have contributed \$615,000, of which \$335,000 was in cash and the remainder in pledges.

### WOMAN'S CLUB CHIEF FOUND IN BELLEVUE

Mrs. Beatie Buxton, organist of the Universalist Church at Peabody, Mass., who had been missing since Friday, is in Bellevue Hospital awaiting the arrival of her husband, Herbert H. Buxton. She was taken to Bellevue from the American Women's Welfare Association of 220 Madison avenue.

### FRENCH GRAPE JUICE TO SUPPLANT WINE

#### President of National Growers Urges Shipments of Unfermented Article.

Special Cable to THE NEW YORK HERALD.—Copyright, 1922, by THE NEW YORK HERALD.—Paris, March 14.—"There is no good in France lamenting American prohibition. It would be much wiser to adapt itself to new conditions. It is my opinion that French vineyards may hope for a bigger transatlantic trade than ever."

Such is the opinion expressed to THE NEW YORK HERALD correspondent by Baron d'Anthonard, president of the American section of the national "wine week" organization, now meeting in Paris.

"The future is in favor of grape juice, which has been increasing steadily in consumption in the United States since prohibition. Already small shipments have been made, and there is no reason why in the near future the generous juice of French grapes should not stand as far above all others in American eyes as French champagne stood before the days of prohibition. As to the probabilities of a change in American sentiment in the future, that is in the hands of God."

"Personally I do not expect such a change," continued the Baron. "The majority of the stories about its failure suggest propaganda, and, anyway, it's no affair of France. In studying the official figures it seems to me that the longer the individual States have experienced prohibition so much the more unanimously they favor it. Our object at this present meeting is to consider the facts as they are, not to try to alter what we cannot help."

"Most certainly we must not consider for a moment the hope of getting the advantage of illicit methods of introducing French wines into America. There is only disaster that way. I foresee the biggest future exportation from French vineyards for the American trade if we adapt our processes to new conditions. In years to come the famous French trademarks will be just as prominent in American markets as ever, only they will be applied to unfermented instead of fermented grape juice."

"As to the future, whether the American people ever will change their minds regarding the benefits or the ill effects of the generous vintages of France, I repeat that it is for themselves and the future to decide."

Paris, March 14 (Associated Press).—"American day" of France's national wine week brightened up with the statement of M. Drouot, president of the Canadian section of the British Chamber of Commerce in Paris, that Canada's market might open up, and a report from Jules Lefebvre, Minister Plenipotentiary that South America was destined to become one of the largest fields for wine exports from France in the next few years.

Delegates representing the winegrowers, in open discussion after the reports had been read, were emphatic in their declaration that some way must be found to circumvent, piece by piece, the wall of prohibition surrounding the United States.

The most important move, in the consensus of opinion, would be "to teach Americans how to drink—then they would find some method of importing French wines."

A resolution was discussed "calling upon the associations of war veterans of France to get into touch with American Legion friends and former Canadian and American soldiers, who learned to appreciate French wine in the plains of Picardy, Champagne and the Artois, to tell their countrymen that wine is a much better beverage than syrup, sodas and near beer."

### FORD'S TITLE TO LINCOLN PLANTS CALLED VALID

#### Receiver Will Settle Any U. S. Claims Says Judge.

DETROIT, March 14.—Henry Ford has a clear title to the properties of the Lincoln Motor Company and any claims filed by the Government will be settled by the Detroit Trust Company, receiver of the old Lincoln Company, Arthur J. Tuttle, Federal Judge, announced to-day. The Lincoln properties were sold recently to the Ford interests under Judge Tuttle's jurisdiction in receivership proceedings.

The Government, it has been reported, is planning to file a claim growing out of war contracts against the Lincoln Company, organized during the war for the manufacture of Liberty motors.

### HALEY FISKE IN LEAD

Haley Fiske, president of the Metropolitan Life Insurance Company, was declared to be the best worker for the cause of the Woodrow Wilson Foundation at a meeting held yesterday in the chambers of Judge Martin T. Manton of the United States District Court. Mr. Fiske has obtained more than 300 subscriptions for the foundation.

Judge Manton, who is chairman of the New York State funders' committee of the foundation, said that subscriptions of more than \$20,000 had been made through his committee. Those at the meeting included James W. Gerard, George Gordon Battis, Thomas W. Churchill, Thomas L. Chaddourne, George Foster Peabody, Harry Harbness Flagler and Justice Mitchell May of the Supreme Court.

BENJAMIN FRANKLIN says:  
"Drive thy Business;—and let not that drive thee."

## BUSINESS DEMANDS

IN these days of strenuous competition, the man who would advance finds it necessary to devote most of his time and energy to his business. The care of his securities may wisely be entrusted to this bank.

## To men who sell roofs and men who need them

There was a time when copper roofings were almost out of the question. It wasn't so much the price of copper. The method of laying copper in sheets made the cost of installation high. Now this is all changed. Anaconda Copper Roofings are made in a form that cuts down high installation costs to a figure that is reasonable. The standardized form permits manufacture on a large scale—another item in the lowered cost—and makes it possible for any roofer to lay a copper roof as easily as he lays any other roof.

Copper roofings cost less than tile or slate. They are the lightest of all roofing materials; therefore they do not demand an expensive construction to carry them. The first cost is of course higher than the cost of wood shingles; but wood deteriorates in a few years, while copper is indestructible. With copper, the first cost is the last. Not a cent need be spent for paint or repairs in ordinary service.

### Do you need a new roof?

Are you planning a new roof for an old house? Anaconda Roofings may be laid over an old wooden roof.

Are you planning a new house? Then by all means let your architect tell you the value of copper roofing. He will show you that the investment in a copper roofing will pay you in perfect service.

No matter what type of house you have, nor what the surrounding environment is, copper roofing of the right color or blended colors may be obtained. There are beautiful reds, browns, greens and blues of a rich, velvety texture with a quality due to the copper and the process of coloring—effects which paint could not give.

### Write to us

Tell us what you are planning and we will gladly give you all the reasons why copper roofing is best for you. Come in and see us or write for a free booklet on "Copper Roofings."

## We Pay

For a ten-day test for anyone who asks. Send the coupon for it. Let it show you what clean teeth mean, how white they look, how nice they feel. You will be surprised and delighted.

## Ask For Whiter Teeth

If you desire them—make this free test

You see glistening teeth on every side today—teeth you envy, maybe. Millions of people now employ a new teeth-cleaning method. They combat the film that dims the teeth. That method will be sent you for the asking—a ten-day test. It will bring to you its delightful effects. Won't you ask?

### Film makes teeth dingy

Most people find that well-brushed teeth discolor and decay. The reason lies in film, which ordinary brushing does not effectively combat. Film is that viscous coat you feel. It clings to teeth, enters crevices and stays. It absorbs stains, making the teeth look dingy. It forms the basis of tartar.

It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

Very few people who brush teeth daily have escaped those film-caused troubles.

### Now ways to combat it

Dental science has for years sought ways to combat that film. It has found two methods and

proved them effective. Authorities now advise them, and leading dentists everywhere urge their daily use.

A new-day tooth paste has been created, complying with modern requirements. These two methods are embodied in it. This tooth paste—called Pepsodent—has brought to millions a new conception of clean teeth.

### Its delightful effects.

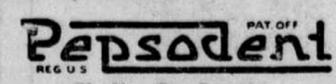

Pepsodent attacks that film, wherever it abides. It keeps teeth highly polished, so film less easily adheres.

It also multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise cling and form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for acids which cause decay. It brings all these effects twice daily, as modern authorities desire. Old teeth-cleaning methods bring just opposite effects.

Learn what a change it brings. Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear.

What you see and feel will quickly show you that this method is essential. Cut out the coupon so you won't forget this test.

## Pepsodent

REG. U.S. PAT. OFF.

The New-Day Dentifrice

A scientific film combatant, combined with two other modern requisites. Now advised for daily use by leading dentists everywhere. Supplied by druggists in large tubes.
