**How Cold?
How Dry?
How Clean?**

How Economical?

Decide these extremely important questions before you select a Refrigerator. If you will take the time to make a thorough investigation you will select a

BOHN SYPHON REFRIGERATOR

The Syphon System of rapid air circulation from ice to food compartments, and the heat-resisting walls (including "Flaxinum," the exclusive Bohn insulation), hold the temperature very low, and the air pure and absolutely dry.

Because of the Syphon System, no moisture condenses on the food. Condensing moisture contaminates foods, causing butter or cream to smell and taste like bananas, onions, cheese, etc. Foods come fresh and fragrant from a Bohn Syphon. You can strike matches anywhere on the lining—it is so dry.

The lining of one-piece, round-cornered porcelain fused into steel is easily cleaned by wiping with a damp cloth, and practically indestructible. The drain is in front, where it can be cleaned easily and frequently, without removing the contents of the Refrigerator.

Superior insulation and the Syphon System both contribute to ice economy. The Bohn Syphon is known everywhere as a great ice-saver.
