ISLAND OF CUBA.

TO INVALIDS AND PERSONS OF DELICATE HEALTH WHO VISIT THIS ISLAND—HAVANA, December 15, 1842.—It has long been a matter of regret to the inhabitants of this city, that on the arrival of invalids from the United States with letters of introduction, it has never been in their power to recommend them a suitable residence in the country. It has therefore been necessary for such persons, either to take up their abode in the hotels in town, where the noise and bustle of a crowded city, and the want of the pure atmosphere and calm retirement of a country life, prevent their deriving that benefit from the change of climate which they naturally expect, or they are compelled to go to places in the country where no adequate preparation has been made to receive them, and where the apartments, accommodations, and manner of living, are in no wise calculated for persons in a delicate state of health.

From a due consideration of this want, and of the great benefit that would be derived by invalids who desire to reside in the mild and beneficent climate of Cuba, if a suitable abode should be provided for them, the subscriber, a medical practitioner long established in this city, has appropriated his beautiful coffee estate called the Buena Esperanza, situated in the most healthy and romantic part of the country, so as to form a residence equally agreeable and attractive. In order to carry out this intention to the fullest extent that professional knowledge and a long experience of the effects of tropical climates could attain, no pains have been spared to form an establishment in which the invalids, as well as the healthy visitor, every rational enjoyment that can be derived from dwelling in the mildest climate, surrounded by the most picturesque vegetation. The grounds, laid out in the beautiful style of a coffee estate, comprise about five hundred acres. The Buena Esperanza is situated on the south side of the island, in a large measure, sheltered from the north winds which now and then blow from the north during the winter months. The district in which it has been, from its extreme beauty, termed the Windsor of Cuba. The house has been built with every view to the comfort and convenience of the invalid, and of which the buildings of this country are so destitute. All the rooms have boarded floors and glass windows. The establishment is on the footing of that of a private family, in which the guests form part, making themselves quite at home, without being confined to those regulations which are necessary at hotels. In this establishment the invalid has it in his power to vary his amusements, by walking in the shady avenues of mango and palm trees, riding on horseback or in a volante, or visiting the neighboring estates, so thickly spread throughout the country. A large summer restaurant, which affords an opportunity of drinking the hot cane juice, while the surrounding woods furnish amusement to the sportsman.

The subscriber's numerous family resides constantly on the premises. The Buena Esperanza is situated about thirty-five miles southwest of Havana. The route, which crosses a most lovely country, is as follows: From Havana to Bejucal, fifteen miles on railroad; from Bejucal to Buena Esperanza, twenty miles on a carriage road. It occupies about five hours. By application to the subscriber at his residence, or to the land agent, No. 95 O'Reilly street, the party can be forwarded to the estate without delay.

All persons applying are expected, if not previously known, to bring an introduction from some respectable mercantile house of the city.

EDWARD FINLAY, M. D. Calle de O'Reilly, No. 95.

I have visited and spent a short time at the estate of Dr. Finlay, described in the above letter, and most fully concur in every statement there made as to the Buena Esperanza. It is no surprise for me to find it to be a healthy location in any place which has been in Cuba, and the invalid will find the numerous family of Dr. Finlay most agreeable and intellectual; and the English, French, and Spanish languages are all spoken by several members of the family.

AMERICAN CROWN WINDOW GLASS

manufactured in the village of Redford, county of Clinton, and State of New York. The Crown Glass made in the State of Maryland, and enjoyed the first Premium of the American Institute in the city of New York for five successive years, and has received a gold medal, in commendation of its superior merits. This Glass is made from white flint sand, obtained in the vicinity of the works, and is the only Crown Glass made from that species of sand. It is capable of standing every change of climate, nor will it lose its lustre by age.

The Redford and every Crown Window Glass are distinguished from ordinary Glass by the uncommon evenness and beauty of surface, the superior transparency and lightness of color, the great thickness, and the general excellence of the materials which compose them. The surface not being thickened after being blown, retains the enamel, brilliancy, and hardness, and is not subject to the objection so often applied to Plate Glass, of being easily defaced and permanently bedimmed by dust; being made of extra thickness, will, without injury, withstand violent winds, hail storms, jars of cannon, &c. Its use, in the end, will prove more economical, independent of its adding so much to the beautiful appearance of buildings.

Specimens of this deservingly popular Glass may be seen in the New York Exchange and Custom House, Howard's Hotel, Bronson's Buildings, Broadway, Centre Market, and a great many private residences and stores in various parts of the city; also, in the Exchange and Custom House, Boston; Girard College, Philadelphia; Exchange Hotel, Baltimore; in the public buildings at Washington city; the Capitol at Raleigh, North Carolina, and in many both public and private edifices throughout the United States. It has been used in a great number of steamboats and rail road-cars, and given entire satisfaction. It is believed that the above will suffice to prove that the Glass stands pre-eminent, and that it deservingly merits the approbation of builders and consumers of Glass.

The Saranac Crown Glass is most used in stores and buildings of the second order, green houses, &c. Its strength and clearness are particularly desired, and it is used in the construction of domestic and foreign light-houses, and is taken by the true economist for sky lights, steamboats, ships' cabin windows, &c.

Ground Glass for sky lights, churches, and artists' windows, is furnished to any pattern or size. The Glass is carefully packed in boxes, nailed, and secured so as to be transported with safety to any part of the United States.

For the more complete satisfaction of persons at a distance, who may not have an opportunity to examine this valuable article, the following testimonials are respectfully offered for consideration. Extract from the report of the committee of the American Institute, October, 1837: "For richness of lustre and brilliancy of surface, as well as thickness and strength, the Redford Glass is the most beautiful article of the kind that has ever fallen under our notice, either of domestic or foreign production; and it affords a proud specimen of the skill and enterprise of American manufactures."

The following gentlemen, Architects, have permitted us to use their names in commendation of the above Glass: Robert Mills, Architect of the Public Buildings, Washington. Thomas U. Walter, Architect of the Girard College, Philadelphia. Isaiah Rogers, Architect, New York. John T. Town, Architect, New York. Calvin Collins, Architect, New York. Gannal King, Architect, New York. Thomas Thomas, Architect, New York.

The subscribers have spared no pains to make this one of the best establishments in the United States. Orders from any part of the United States for any sizes, from 1/2 inch to 30 inches, square and oblong, dwelling houses, stores, light houses, green houses, sky lights, &c. addressed to them or CHARLES GORR, Agent, New York, or to any of their selling agents, will be executed with care and prompt attention.

PROSPECTUS OF THE TWELFTH VOLUME OF THE BALTIMORE SATURDAY VISITER.

A weekly family newspaper of large size, published every Saturday morning in Baltimore, Maryland, at \$2 per annum, in advance.

J. EVANS SNODGRASS, Editor. The "Visitor" is the only literary family paper published in the State of Maryland, and enjoys a wider circulation than any other paper in Baltimore. The first number of the twelfth volume was issued on the 15th of January, 1842. To those who have found this paper a welcome Visitor for eleven years, it is unnecessary to describe it. For the benefit of others, we may justly say that it is a LARGE FAMILY NEWS-PAPER, devoted to Morals, Science, Literature, and General Information, including a due quantity of Agricultural facts, gleaned from the best agricultural publications of this country and Europe. It contains Foreign and Home Correspondence, Essays, Poetry, Tales, &c., written expressly for the paper by the pens of some of the most popular writers in America. The productions of the ablest Authors in Europe also, will be found in its pages.

The following are among the contributors to the "VISITER."

Besides articles from regular Contributors, the Publisher will be prepared to give re-publications of the choicest tales, &c., from the popular foreign magazines, as they arrive monthly. We are determined to render the "Visitor" the most interesting and useful country. To this end, we will avoid the re-publication of every thing like the poisonous trash some of the mammoth sheets are forced to print, merely to fill up time. Such matter is unfitted for the family circle, and, therefore, has no business in a family paper. Our aim is to do good, not harm.

In order to render the "Visitor" a favorite paper for natives of Baltimore, and others desiring to take a paper containing the city news, we shall constantly keep an eye to "news about town," and shall do what the daily prints cannot accomplish, viz: give a full record of all hyemal and social news.

PREMIUMS.
