REPUBLIC SPECIAL. Beaumont, Tex., May 24.—An effort is being made to interest holders of property in the Bullock survey, embracing 4,428 acres northwest of Spindletop Hill and adjoining Beaumont, in a project to sink a well 5,000 feet, with a view to defining the oil deposits.

Many companies control land in the Bullock and the promoters of the scheme to drill a mile into the ground believe that it will benefit all interests to put the thing through.

D. O. Lively, who is connected with companies having property in the Bullock, is pushing the project, and says there is a fair prospect for its consummation if a sufficient number of holders can be induced to share the expense, and this seems to be assumed.

In advocating the 5,000-foot well Mr. Lively points out that in the Russian field at Baku the greatest producing wells were drilled to a depth of 2,000 feet on property which had been declared non-oil bearing. It is also said that one of the largest wells in the Eastern field in this country is more than 3,000 feet deep.
