

STUDENTS TO ADORN THE ARTS PALACE.

Pupils in Various Parts of Country Will Prepare Canvas and Lay Base Colors.

FRIEZE TO COME IN ROLLS.

First Bids for Mural Painting Will Be Opened in a Few Days by the Director of Works.

Art pupils in large cities throughout the country will aid in making the grand professional frieze which will adorn the screened wall of the Liberal Arts Palace at the World's Fair.

Ordinarily, the painting of such a work would require several years, but Louis J. Millet, Chief of Color of the Exposition, has planned to have art institute pupils from various cities lay on the base colors and prepare the canvas, so that the artist will need simply to do the figures, which are the important part of the frieze.

The painting will be done in studios and ateliers in various parts of the country during the winter. The completed canvas will be brought in rolls to St. Louis next spring, when they will be fixed in place. The frieze is part of the building's decoration as planned by its architect.

First bids for mural painting at the World's Fair have been placed in the hands of the Director of Works Taylor, and will be opened in a few days. The bids are for the painting to decorate the west central entrance of the Varied Industries building. Plans for it were drawn in Mr. Millet's office.

The entrance shows a great arch, behind which is a square courtyard, leading into the building proper. To the right and left are passages, the high in the center, left a flat expanse of plaster. Here the painting will be fresco work, not painting on canvas.

Full size drawings of this feature have been made by the Department of Mural Decoration. It shows an Italian conventionalized tree, the branches curving symmetrically in scrolls. The interesting feature is the face of a woman, occupying the center of the composition just above the eye of the spectator.

A complete color treatment plan for the frieze of all but two or three of the big Exposition buildings has been worked out by Mr. Millet. The roof coloring is of the utmost importance, because it will either enhance or mar the beauty of the view over the grounds to be had from Art Hill, and other elevations of the Exposition.

Mr. Millet has suggested the use of metal and tile colors. For instance, he suggests for the towers of the buildings, which has a domed roof, a copper hue as the base color. The staff ribs, crossing the roof transversely, are to be weathered bronze in color.

One the Mines and Metallurgy building is of the most brilliant and effective coloring will be put on the building, especially adapted for such treatment. Mr. Millet proposes to paint the Spanish tile roof of a red color.

The Agriculture, Horticulture and the Forestry, Fish and Game buildings, have little applied ornament, will be dressed out with color at the entrances. Beeches have been made, which use the ordinary farm products of the temperate zone in garlands and festoons to apply on buildings.

LEIPSIG WILL SHOW HER ART. City Council Arranges for Special Exhibit at St. Louis.

Leipzig, Saxony, Oct. 31.—The City Council has decided to make a special exhibit of the St. Louis University Exposition to emphasize the city's artistic and musical reputation. Professor Max Klingner, whose statue of Beethoven has been pronounced the greatest piece of German sculpture for the century, will contribute busts of Wagner and Liszt. Another artist will send a bust of Schumann. The artist Kollie, who has painted portraits of Bach and Johannes Hartmann.

The plan of the hall in which the exhibit will be displayed is the work of Fritz Drechsler, the architect.

Georgia to Erect Building. F. B. Gordon of Columbus, Ga., president of the Georgia Industrial Association, has advised the World's Fair management that the recent meeting at Macon in the interest of Georgia's participation.

ONLY A SUGGESTION. But It Has Proven of Interest and Value to Thousands.

Common sense would suggest that if one wishes to become fleshy and plump it can only result from the food we eat and digest, and that food should be selected on a health-forming food, like eggs, beefsteak and cereals; in other words, the kind of food that makes flesh, the food which forms the greater part of our daily bill of fare.

There are thousands of such who are really continued dyspeptics, although they have no particular pain or inconvenience from their stomachs.

If such persons would lay their prejudices aside and make a regular practice of taking after each meal one or two of Stuart's Dyspepsia Tablets the food would be quickly and thoroughly digested, because these tablets contain the natural peptones and diastase which every weak stomach lacks, and by supplying this want the stomach is soon enabled to reach its natural tone and vigor.

Stuart's Dyspepsia Tablets digest every form of food, and are especially adapted to bread and potatoes, and this is the reason they so quickly build up, strengthen and invigorate thin, dyspeptic men, women and children.

Invalids and children, even the most delicate, use them with marked benefit, as they contain no strong, irritating drugs, no cathartics and any harmful ingredient. Stuart's Dyspepsia Tablets are the most successful and most widely known of any remedy for stomach troubles, because it is the most reasonable and scientific of modern medicines.

Stuart's Dyspepsia Tablets are sold by every druggist in the United States and Canada, as well as in Great Britain, at 25 cents for complete treatment.

Nothing further is required to cure any stomach trouble or to make thin, nervous, dyspeptic people strong, plump and well.

VERY REMARKABLE "ONE-DAY" SALE

tion in the Exposition was a success. The State is to have a pavilion and will be represented in several exhibit buildings. Mr. Gordon states that about \$5,000 will be raised in that Georgia pavilion, a creditable structure on the Plateau of States.

CONSTRUCTING RELIEF MAP OF PHILIPPINE ISLANDS. Plan Suggested by Native Priest Will Show Geographical Peculiarities of the Country.

Work on a large relief map of the Philippine Islands, which will form part of the Philippine exhibit at the World's Fair, has commenced. The map will be elliptical in shape and 110 feet long by 75 feet wide. Every geographical feature of the islands will be shown.

A native priest of Manila suggested the map idea to the Philippine Commission. The plan in the chart he proposed to use, it was adopted at once. When the foundation work has been completed, it is likely that several priests from the Philippine Islands will be brought here to execute the fine color and plaster work.

AWARDS PUSH CHAIR CONCESSION. Major T. S. Clarkon Gets Contract for the World's Fair.

To Major T. S. Clarkon, who owned the seat concession at the Pan-American Exposition, has been awarded the push or roller chair concession at the World's Fair. The concession entails an expenditure of about \$20,000.

Yesterday Major Clarkon submitted for approval to the Concession Department a plan of the chair he proposes to use. It is a four-wheeled, rubber-tired wicker chair, capable of seating either one or two persons. The chair is an improvement on those used at Chicago and Buffalo. It is comfortable and easy, and smooth when in motion. The front wheels, which guide the vehicle, are casters with an improved swivel, which permits of a sharp turn.

HALF RATES TO ARKANSAS. And Texas Tuesday, November 3, via Cotton Belt Route. Through chair cars, sleeper, cafe cars. See Cotton Belt ticket agent, 909 Olive street.

Burns Cottage Association. John W. Dick, president of the Burns Cottage Association, which will reproduce at the World's Fair the cottage of the famous Scotch poet, says that correspondence has been established with leading societies and fraternal organizations throughout the country, with the view of arousing interest in the enterprise. Numerous suggestions and contributions have been received.

PROF. PRITCHETT TESTS GERMAN HIGH-SPEED CARS. Surprised at Smoothness of Motion When Going 100 Miles an Hour—First Foreigner to Make Trip.

Berlin, Oct. 31.—President H. S. Pritchett of the Massachusetts Institute of Technology, has the distinction of being the first foreigner to ride on the motor cars in the high-speed electrical experiments on the Marienfelde-Goszen Military Railroad.

After riding in both the Siemens and the Algemein cars to-day Mr. Pritchett described his experiences and observations to the Associated Press.

Both cars reached a speed of a hundred miles an hour. Mr. Pritchett was surprised at the steadiness of the cars, which did not create, so far as unevenness of movement was concerned, the impression of so great speed as American trains running at sixty miles an hour, and the engine he assured him that the impression was the same when going at the rate of 120 miles.

CARTER SUCCEEDS DOLE. Other Territorial Officials in Governor's Cabinet Resign.

Honolulu, Oct. 31.—On account of the change in the government of being the Territory of Hawaii, announced to-day in a cable dispatch from Washington, stating that Secretary Carter would succeed Governor Dole, H. E. Cooper, Superintendent of the Department of Public Works, has tendered his resignation, to take effect immediately.

The following officials will also offer their resignations: A. G. Hawes, private secretary to the Governor; A. N. Kepolani, Territorial Treasurer; J. H. Fisher, Auditor; A. Atkinson, Superintendent of Public Instruction; E. B. Boyd, Commissioner of Public Lands; L. Andrews, Attorney General.

It is not known which, if any, of these resignations will be accepted. The appointments will be sent to the Senate soon after the convening of Congress.

President Roosevelt is well acquainted with both Governor Dole and Secretary Carter. As head of the provisional Government, after the overthrow of Queen Liliuokalani, and as Governor of the Territory of Hawaii after its annexation to the United States, Governor Dole was recognized as one of the foremost figures in the islands.

He is regarded as a man of great force of character and a lawyer of marked ability. His personal popularity among the people of the Hawaiian Islands has been attested often.

George R. Carter, who will succeed Judge Dole as Governor, is a long-time personal friend of the President, by whom he is held in high regard. It was at the President's personal request that he accepted the position. Mr. Carter was graduated at Harvard. He is now in this country for the purpose of floating a million dollars of Hawaiian bonds, which were authorized by the Territorial Government and approved by this Government. It is understood that the appointments were agreed on at the meeting of the Cabinet yesterday, although for reasons personal to the President, they were not announced until to-day.

Moran, Imperial, A. P. Davis and Mrs. Davis, Wansonia; H. Taylor, Grand

"UNNECESSARY" AFFIDAVIT CHARGED SMUGGLING CIGARS. Postmaster General Payne Puts Trial of Clerk Into Hands of Man He Accused.

Washington, Oct. 31.—Frank Bacon, an employe of the registry division of the Washington Post office, has been ordered to show cause why he should not be dismissed for making what the officials asserted was an "unnecessary" affidavit, charging that J. L. Bristol, Fourth Assistant Postmaster General, and Chief Inspector Cochran received cigars through the mails from Cuba without payment of duty.

When Louis Kemper, Chief of the Registry Division, was accused of receiving his position to smuggle cigars from Cuba, Bacon made the affidavit, in which he said that packages, which, to the best of his knowledge and belief, contained cigars, were delivered to Bristol and Cochran through the registered mail. Postmaster General Payne said to-day that the case is in the hands of Mr. Bristol, and Bacon will receive a hearing. Mr. Payne expressed the opinion that Bacon should be punished.

Neither Bristol nor Cochran will discuss the matter. The question naturally is asked, Why should Postmaster General Payne consider the charge against Bristol and Cochran "unnecessary"?

Bollman's Horse Show Showed. The Horse Show has aroused unusual interest in this city this season, and the display at Bollman's is exceptionally artistic. In their west window is seen the "Bollman" piano, decorated with hand-painted designs in the Horse Show colors of green and white, representing various articles emblematic of the Horse Show. On top of this decorated piano is placed a horse's head, from which radiate streamers of green and white ribbon, while the floor is covered in green and white bunting. In the east window there is a beautiful scene of a country road, on which are runabouts, trolley cars and other pleasure vehicles. This was painted by a renowned scenic painter, and is extremely realistic. The road continues into the window proper, on which is seen standing the figure of a gentleman in evening dress driving a "minnie," mounted on an elaborately decorated wagon, with the suggestion of a horse.

The ideas are entirely along original lines, and it is needless to say they hope to win the prize offered by the Horse Show for the handsomest and most artistic window.

Steamer Refuses to Be Launched. Philadelphia, Oct. 31.—The steamship Manchuria, built for the Pacific Mail Steamship Company, stuck on the ways as she was being launched to-day at the New York Shipbuilding Company's yard in Camden, N. J. Every effort was made to launch the vessel, but without success. At noon the tide receded and it was found necessary to postpone the launching.

Baptist Young People's Union. Harrisburg, Ill., Oct. 31.—The Baptist Young People's Union of Balline County began a two days' rally to-day. The attendance has been quite large for the opening session, members from all the
