

REPORTS OF DWINDLING STOCKS LEAD TO A GAIN IN WHEAT

May Oats Firm, More Distant Future Weak; Provisions Active.

REPUBLIC SPECIAL

Chicago, Jan. 26.—Wheat had a strong uptick to-day, but business was transacted in a listless manner throughout the morning. Smaller receipts in the North-west seemed to change the aspect of the domestic situation, and the bullish mood prevailing in the local market was largely a reflection of the strength which developed at Minneapolis and other outside points. What was probably an explanation for the strength at Minneapolis was had in a message which stated that mill-ers had taken a half-million of cash wheat in that market during the morning.

This report, taken in connection with the claims made yesterday and yesterday that millers had sold in the neighborhood of 1,000,000 bushels, was considered sufficient testimony that the cash situation was coming out of the lethargy which characterized it for some time. The news from abroad was also more encouraging to bullish sentiment. Liverpool cables were higher, and a strong recovery of Argentine offerings was reported in that market, though it was recognized to have made little progress beyond the Province of Buenos Aires, and another report was received from the Province of Santa Fe, that the Buenos Aires market was again upon a strong basis for appreciation.

CORN ACTIVE.—Corn was active in response to a concerted movement on the part of the bull traders to bring about a market more suited to their liking. In the forenoon they sold between 20 and 25 cents, and the movement toward this market will no doubt be steadily maintained. The action of the Western roads in granting a lower tariff between the Missouri River and the Atlantic seaboard, and the fact that the cost at the moment is said to be depressed, with considerable accumulation of stock, were also factors.

OATS IRREGULAR.—Oats were irregular at the outset. May was weak, but the more distant future was strong. Covering of a short time by May was weak, but the more distant future was strong. Covering of a short time by May was weak, but the more distant future was strong.

PROVISIONS FAIRLY ACTIVE.—Provisions were fairly active and firm at the opening, but later the advance and price were not high. The market was active, but the advance and price were not high. The market was active, but the advance and price were not high.

Trading in Corn is Active, but of Professional Character.

REPUBLIC SPECIAL

Chicago, Jan. 26.—Reports of dwindling stocks of wheat in the hands of farmers in the Southwest raised a not path of the price of the May option here to-day. Corn is up 1/4 cent, oats show a gain of 1/4 cent and provisions are unchanged to the point.

What caused strong and higher. Receipts in the Northwest were reported to be the cause of the strength in future. May started with a gain of 1/4 cent to be at 1.12 1/2 to 1.13. Commission houses with selling orders around \$1.15 brought about a recession to \$1.12 1/2, but their offerings were eagerly absorbed by purchasers for short account.

Active receipts, both from Northwest and Southwest, were to the effect that the cash demand was improving and holders were inclined to sell for higher prices. A notice accordingly, both from Northwest and Southwest, was to the effect that the cash demand was improving and holders were inclined to sell for higher prices.

Early trading in corn was active, but almost wholly of professional character. As in wheat, light receipts and strong cables were the strengthening factors at the outset. May was unchanged to a shade higher on the opening transactions, at 40 1/2 to 41 1/2. Active covering by shorts was also reported, and the market was active, but the advance and price were not high.

COTTON GROWERS TO BE PERMANENT

Interstate Convention Adopts Reports and Adjourns After Organizing—To Embrace All States Producing Staple.

REPUBLIC SPECIAL

New Orleans, Jan. 25.—The following resolution was unanimously adopted and copies ordered sent to President Roosevelt and the Southern Senators: "We hereby approve the movement on foot to endow the Interstate Cotton Commission with full and complete control over all cotton products and abuses by railroads, with power to enforce their findings, and request all Southern Senators and Congressmen to support and aid in the passage of this measure."

Throughout the morning there had been a hard struggle in committee for ascendancy between the friends of Jordan and those of Peters in the permanent organization, but all differences were finally reconciled and a unanimous report was presented to the convention.

The feature of the forenoon session was the defeat of the modified Weston war plan, which had been reported by a majority of the committee. A committee of three was named to confer with the President in the matter of the engagement of the American cotton trade.

It suggested that every State Commissioner place himself in position to secure a complete return of all gins operated in his State and of the entire number of bales ginned of the crop of 1905 and 1906, and to furnish this information to the committee on or before September 1, 1906, and monthly to March 1, 1907.

MULVHILL WILL EXAMINE ALL LICENSE APPLICATIONS

New Orleans Commission Believes in Working With the Police Department on Saloon Matters.

REPUBLIC SPECIAL

Thomas E. Mulvihill, who according to reports from Jefferson City, has been named as Governor Folk's appointee for Excise Commissioner, said last night that he had received an official notification from the capital, but had information to the effect that he was appointed. Yes, he received hundreds of congratulations, both by telephone and from visitors.

Mr. Mulvihill stated that until he had heard direct from the Governor he would not discuss his probable appointment. He stated that if he became Excise Commissioner he would examine every application for a saloon license personally.

"I think it is the duty of the Excise Commissioner, in whom much power is vested, to examine all applications for licenses and to see that they are in close touch with the conditions throughout the State. I shall try to be in the office as much as possible to hear the responsibility, and not let it drift to the shoulders of the clerks."

When asked what his policy would be toward following up the Folk anti-liquor law, Mr. Mulvihill said that he did not believe in the use of force, but that he would appear before the courts if any saloon keeper could not be persuaded to comply with the law.
