A San Francisco lawyer has a pet hog, but it isn't trained so that it can make out the lawyer's bills.

In 1880 an order was established at Cleves entitled "The Order of Fools." It still flourishes under other names.

Thirty-five thousand non-bicycling voters at Indianapolis demanded an ordinance keeping bicycles off the sidewalks and requiring bells and lanterns of riders.

The electric street railroad between Newburg on the Hudson, and Walden, twelve miles distant, is used for the transportation of freight, and the experiment is declared a success.

God Almighty, says Governor Evans of South Carolina in a mighty fine outburst, "never intended that the blackbird or the crow should ever soar up to the mountain top, where the white eagle alone builds her nest."

Jules Verne undoubtedly thought he was writing of an altogether new and unique thing when he told his famous story of "The Underground City," but again truth proves to be stranger than fiction, as the Russians have discovered a big underground city in Turkestan, near the Bokharan town of Karkel.

Defects in development of the body of English city children are more common among boys than girls, according to Dr. Warner's report to the British Association, the proportion being 8.7 of boys to 6.8 of girls.

Dr. Karol Lewakowski, who represented the city of Lemberg, Galicia, in the Polish National Alliance convention at Cleveland, is visiting the cities of Minnesota and Michigan in the interests of Polish emigration.

The Salvation Army of Denver, Colorado, is decidedly progressive. It has added to the regular infantry a cavalry corps of young women. It is said that when the cavalry made its first public appearance the sight was most imposing.

Among "the great blessings to the country" which the Louisville Courier-Journal thankfully says have followed the enactment of the Wilson-Gorman law is the effect which free raw wool and the reduced tariff on woolen goods have had.

The returns of the English board of trade show that in August last the exports of worsteds to the United States amounted in value to \$418,834, an increase of over 300 per cent. over August, 1894.

worsteds goods to the United States were \$4,425,190 yards, compared with 9,473,590 for the first eight months of 1894; and the value of the worsteds exported from England to this country during these same eight months was \$3,234,960, compared with only \$794,698 for the same eight months in the previous year.

It only needs a minute's reflection to show what a great blessing to this country this condition of things is. If the same amount of money had been spent for goods made in this country we should have had both the goods and the money.

There has been so much going on on, or in, the street lately, that little attention has been paid to what has been going on on the sidewalk. But now that public spirit and sheet asphalt have prevailed on the street there is time to consider the condition of affairs on the sidewalk.

It is generally admitted, we believe, that the brick sidewalks of this city are uneven. Those who walk on them in the dark or in the rain, or in both, find them startlingly uneven. Those who walk on them "in liquor" find the unevenness of the pavement greater than they really ought to be in a well governed city.

There is a by-law against the laying and relaying of brick sidewalks in New Haven. In this law is the hope of future ages, even if the present age can't find much hope in it on account of the slow way in which New Haven changes from a village 'round the Green to a city.

It is one of the more simple circular capes that is added to this costume, and it has a collar and is lined with bright plaid silk. Its material is aubergine woolen suiting, and in the dress this is trimmed with black mohair, which borders the skirt as well as running down its front breadth.

an organization which is almost fanatically interested in old bricks, either of the human or clay variety. It is probable that he has been instructed by the society to see to it that no more of the old clay sidewalk bricks of New Haven are disturbed in the resting places wherein they have rested so long without disturbance as to become historical.

kind with Hussar braiding and a lot of frillery. Nothing is more jaunty, and if the girl is really young, has a good figure and is pretty, she does her observance a favor by putting herself into that sort of a garment. An attractive sort of fall coat has a box front, slightly lapped fastening in front and one row of buttons. It is short and fits closely at the back. There is nothing startlingly new about this, and the colors now established hold, but it is promised that they are to be offered in the new dresden shade and even in bright blues and dull greens. "Don't" is the word to have in mind in considering these shades for jackets.

frons. The latter are graceful, but it cannot be denied that either finish robs the shoulder cape of a certain jaunty youthfulness that a good many women do not want to dispense with. That means that the round shoulder cape, very full and very jaunty and without stole ends or pointed fronts, will remain in favor in spite of the attraction of novelty that the other sort possesses.

It is one of the more simple circular capes that is added to this costume, and it has a collar and is lined with bright plaid silk. Its material is aubergine woolen suiting, and in the dress this is trimmed with black mohair, which borders the skirt as well as running down its front breadth. The waist has a yoke and collar of white flowered silk and is trimmed with galoon and rhinestone buttons. A belt of striped ribbon confines the waist. Braiding is again among the fashionable trimmings, and some of the very stunning jackets suitable for very young belles are of the Hungarian
