account of lack of quality, but some  
better grade stuff from Colorado will  
be here the middle of the week. Utah  
stockers sold at \$4.20 last week, and  
a train of Old Mexico, grazed in  
Kansas, sold at \$3.75 to killers.  
Sheep and yearlings sold stronger  
last week, but lambs declined about  
25 cents, which was a legitimate  
equalizing of prices, the margin be-  
tween sheep and lambs having been  
too great heretofore. Utah stuff is  
moving freely; lambs today at \$7.00  
to \$7.25, Colorado yearlings Friday at  
\$5.50 to \$6.00, a new mark for year-  
lings this season; wethers worth up  
to \$5.00, ewes \$4.75. Feeder buyers  
are taking the full amount of the  
offerings in the feeding classes; lambs  
at \$8.00 to \$6.25, wethers and year-  
lings \$4.50 to \$5.00. The extra large  
amount of grain and forage crops  
this year in the corn area makes a  
place for an immense quality of thin  
stuff from the ranges.  
Not a minute should be lost when a  
child shows symptoms of croup.  
Chamberlain's Cough Remedy given as  
soon as the child becomes hoarse, or  
even after the croupy cough appears,  
will prevent the attack. Sold by all  
dealers.  
**GRAIN.**  
Chicago, Sept. 13.—Attention of  
traders in the wheat pit was diverted  
temporarily from domestic conditions  
which have been growing more bear-  
ish daily, to the situation in Argenti-  
na, where the growing crop of  
wheat is now said to be threatened  
by locusts. The market closed strong  
at almost the top, September being  
at \$1.03 1/2 and December 98c 1/2 3/4 c.  
Considerable weakness in the corn  
market was evidenced, but the later  
strength caused a firmer feeling in  
the final hour. The market closed  
steady with prices a shade higher to  
\$c lower, compared with previous  
close.  
**BACK FROM THE COAST.**—Mrs.  
W. S. Lawrence has returned from a  
delightful vacation in Los Angeles and  
at coast and inland points. She vis-  
ited friends in Los Angeles, Long  
Beach and Glendale, Miss Audie  
Lawrence also returned with her  
mother.

# S.S.S. CURES SKIN DISEASES

The cause of all skin diseases can be traced to some humor or acid in the blood; the cuticle is always healthy where the circulation is free from impurities. When the blood is infected with acid or unhealthy matter it cannot perform its natural work of nourishing the skin, regulating its temperature and preserving its normal softness, pliability and healthfulness. Instead it irritates and inflames the delicate fibres and tissues around the pores and glands and produces some of the many forms of skin disease. The itching and stinging so often accompanying skin affections are produced by the deposit from the blood of the acid humors with which it is filled, into the sensitive membranes lying just beneath the outer covering, and surrounding the countless nerves, pores and glands. This explains why scratching the outer skin affords no relief from the itching and burning. S. S. S. cures Skin Diseases of every character by purifying the blood. It goes down into the circulation and removes the humors or acids which are causing the trouble, builds up the weak, acid blood, and permanently cures every variety of skin affection. Local applications can only soothe; they never cure because they do not reach the blood. S. S. S. goes right into the circulation, reaches the trouble and cures it by removing the cause. Book on Skin Diseases and any medical advice free to all who write.

## KANSAS CITY MARKETS

Kansas City Stock Yards, Sept. 12.—  
Rains the middle of last week, which  
extended all over the Missouri valley,  
put the cattle market on a more  
stable basis than it has had and re-  
moved the encumbrance of the in-  
creasing volume of cattle driven in by  
dry weather. Receipts dropped down  
sharply after the middle of last week.  
Crop experts figure that the drought,  
which has now been broken, damaged  
corn 7 per cent in Illinois and Iowa,  
and between 15 to 20 per cent in  
Missouri, Kansas, Nebraska and  
Oklahoma. The good rains which  
have fallen lately have started the  
fall pastures, and demand for stock-  
ers and feeders is now at its height,  
and the market on those classes today  
is 15 to 25 cents higher than a week  
ago. Good killing grades are steady  
to firm with a week ago, medium and  
low grades a shade lower, including  
a decline of 10 cents today. A train  
of the Parsons' steers from Rifle is  
here today, 1118 at \$4.25, and a  
shipment from Grand Junction here  
today contained heifers at \$3.45, cows  
\$2.40, wet cows \$2.65, bulls \$2.85,  
stock steers \$3.75. Nothing in either  
shipment fully tested the market, on

## "1892" Pure Aluminum Ware

Will Not Rust, Crack, Break, Scorch or Burn

**Cheapest Because Best**

HERE, at last, is the ideal kitchen and cooking utensil—"THE WARE THAT WEARS"—made from Pure Spun Aluminum, and guaranteed by the makers to last 25 years with average usage. "Spun" Aluminum, mind you, not cast Aluminum, which will sometimes crack and scale. Spun Aluminum Ware will never crack, peel, scale or br. ak.

Costs a trifle more than ordinary enamel ware, but is many times cheaper in the long run, because of its wonderful durability and fuel saving. Enamel ware is iron coated with colored glass. Iron expands with heat. Colored glass does not, but chips off into the food with dangerous results to those who eat it.

That the use of enamel kitchen ware causes cancer is a view held by some eminent medical authorities. Dr. William H. Diefenbach of New York, in a paper entitled "Observations on the Etiology of Cancer," read before the Bureau of Sanitary Science and Public Health during the session of the International Homeopathic Congress at Atlantic City, discussed this subject.

According to a special dispatch to the Philadelphia North American, Dr. Diefenbach advanced the argument that chipping

**Will Last a Lifetime**

of the hard-coated dishes used in preparation of meals allowed minute but dangerous particles of foreign matter to become mixed with the food, these being taken into the stomach, where the cancerous growth is caused by abrasions which they make in the walls of the organ.

"1892" Pure Aluminum Ware saves doctors' bills. It enables you to bake bread, pies, pan cakes, etc., without grease, which is the great cause of dyspepsia and indigestion. Aluminum griddles require no grease; hence are smokeless and odorless.

"1892" Pure Aluminum Ware will not scorch or burn, is easily cleaned, will not rust, or corrode. Handsome in appearance. Looks like silver, but weighs only about one-fourth as much, and is light and convenient to handle.

The original and only genuine Spun Aluminum Ware is made by the Illinois Pure Aluminum Co. at Lemont, Ill. Every piece bearing their trade-mark, the Maltese Cross, and marked "1892" Pure Aluminum Ware is absolutely pure, wholesome and hygienic, and guaranteed for 25 years.
