

WOMAN'S CLUB SECURES GREAT VOCAL ARTISTS

In Most Notable Engagement of the Season the Misses Fuller, Singers of Old English Songs, Will Be Heard Here March 22.

What will unquestionably be the most notable musical event of the season will take place at the Woman's Club on the evening of Monday, March 22. On that date, under the auspices of the Woman's Club, the Misses Dorothy, Rosalind and Cynthia Fuller will make their

Dorothy, Rosalind and Cynthia Fuller

first appearance in Phoenix, in a recital of old English songs and ballads.

The recitals given by these young ladies are so simple, natural and attractive in their names, coming to

this country from England less than a year ago, the charm of their performances have quickly made them known from coast to coast, and wherever they have appeared they have met with instantaneous and extraordinary success.

It is not alone the novelty of the performance which has been responsible for their popularity, altho it is altogether different from anything that has previously been heard over here. When they sing the delicious old English folk songs which they learned on the other side of the ocean there is a charm and sincerity about the melodies which is utterly lacking in more pretentious music. The distinctness and sweetness of their voices is well matched by the pictures they themselves make in the costumes of the early Victorian period.

Not only in New York and Chicago, but at Harvard, Radcliffe, Bryn Mawr and many other of the great colleges in the east, and in all the large cities of the West they have met with a success that is astonishing. During the trip to the coast, from which they are now returning to New York, their reception has been such as called forth comment

BISHOP PLEADS CHILD'S RIGHTS

Christian Home, Religious Instruction and Church Are Among Childhood's Possessions, Says Noted Preacher.

The rights of children to be well born, to be welcomed when they come, to be given the proper influences in nurturing and rearing them, to be properly taught, to a knowledge of God and a membership in his church, was made the subject of the sermon last night at Central church by Bishop E. D. Mouzon, who is here holding a two weeks meeting with the Southern Methodists of this section. The text chosen for the discourse was found in Malachi chapter 4 and verse 6: "And he shall turn the heart of the fathers to the children and the heart of the children to the fathers lest I come and smite the earth with a curse."

In laying the anity for the sermon the speaker explained that the Prophet Malachi who spoke the words lived in that period in the history of the people of Israel when Greek influence was uppermost and the ideals and traditions of the Jews were being departed from on every hand. Even the young men and young women were taking Greek names. At that time the very foundations of the home and the religious life of the people were being attacked by these insidious influences. At that time Malachi foretold of the coming of the prophet reformer who should do the things stated in the text.

The idea of turning the hearts of fathers to children and children to fathers was used to drive home the lesson of the rights of the children. In the days of King John the men insisted on their rights and placed them in a written covenant in Magna Charta; in these days much is heard of woman's rights, but above all these in importance to the life and prosperity of the race and the stability of the future is the full understanding and obedience to the rights of the children.

These he divided into: The right to be well born; the right to a welcome; the right to a Christian home; the right to religious instruction and a right to the church, and the expectation of his discourse he insisted upon the duties and responsibilities that rest upon the parents of children and the effect in after life of the proper influences and training upon the children. The training that must be given by the mother and father, the proper companionship of the parents to the children, and the expectations and promises that are held out to those parents who in the fear of God and love for their home bring up their children around the family altar.

The necessity of looking after the salvation of the children was stressed, and a demand that the school influence be proper and that the teachers for the boys and girls be chosen by those in authority with an earnest of their quality. Especially should this be true in the high schools of the country. Mother, home and heaven he said are the greatest words in the language. Children make paradise out of home, and homes are made for the children.

There will be another morning service this morning at 10 o'clock when Bishop Mouzon will again preach. The congregation last night comfortably filled the body of the church. Great interest was felt in the sermon throughout.

Y.W.C.U. CLUBS MAKE IT BUSY PLACE THESE DAYS

The Y. M. C. A. is a busy place these days, with the various clubs and classes. Monday night, the Spanish and Military classes, Tuesday, Miss Mount's Bible School Class, Thursday the High School club, Miss Claude Jones Bible class and the Art and Travel club, Friday the Senior Camp Fire and Thimble Club. In between are gymnasium classes, the junior girls club and many good times, social affairs, picnics and hikes. The latest outdoor affair was Saturday afternoon, when Miss Fern Cruden, guardian of the Camp Fire took the trail with the girls and held the first ceremonial meeting around the sacred fire. The afternoon was full of bubbling enthusiasm

Keep window spaces warm!

As a rule you'll find 20% of the exterior of a house consists of windows, and the heat leakage through the glass constitutes 40% of the total heat loss in or from the average home. Our ideal heating provides the only means of offsetting the heavy onslaughts of cold at the windows by placing the radiators directly under or alongside the glass, thereby keeping the window spaces at the same uniform temperature as every other part of the house.

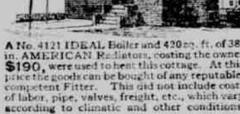

"The heat that brings contentment"

AMERICAN & IDEAL RADIATORS & BOILERS

No matter how fiercely winter rages at windows and doors, the faster will be the natural flow of warmth to the AMERICAN Radiators to offset the cold. That's the beauty of our way of heating—it is founded on natural laws. AMERICAN Radiators immediately meet the cold—unlike hot air registers which have to be placed in a protected corner of a room to coax the heat up, especially on windy days. A coal-economizing outfit of IDEAL SMOKELESS Boilers and AMERICAN Radiators will transform a moderate size bin of coal into extra months of abundant, sanitary warmth—and no fuel waste.

And what an astonishing amount of drudgery is lifted from mother, wife and maid in the doing away with lugging and heaving of scuttles and ash-pans, the blacking, taking down and storing of stoves, the heavy after-sweeping and cleaning, and the consequent wear on the furnishings and decorations of the home.

Whether your building is old or new—store, school, church, farm or city house—put in at once an outfit of IDEAL SMOKELESS Boilers and AMERICAN Radiators and enjoy solid, clean warmth to the end of your days. These outfits do not wear out; purchasers always get full money back, sell property quicker, or secure 10% to 15% greater rental. They are an investment, not an expense. They reduce the cost of living and better the living!

Another great labor-saver—stationary Vacuum Cleaner, at \$150. You can wonderfully reduce house-labor and highly increase home health and cleanliness by use of ARCO WAND Vacuum Cleaner—sits in basement or side room; works through an iron pipe running to all floors; carries all dirt, dust, insects and their eggs, etc., to sealed bucket in machine; cleans carpets, furnishings, walls, ceilings, clothing. Ask also for catalog (free). Inquiry puts you under no obligation to buy.

STRICKLAND LECTURES BEFORE "CHEM." CLASS

Mining Expert Tells How Petrified Wood is Formed; Explains Many of Nature's Processes

Herbert Strickland of this city, delivered a lecture before the chemistry class of the Phoenix Union High School yesterday—concluding on topics relating to chemistry and mineralogy. Mr. Strickland, of an associate of the Royal School of Mines, of London, and has been for over twenty years engaged in mining operations in this country. He has specialized in mineralogy and engineering, with particular attention to the chemistry of mine processes.

He was escorted by J. R. Wilson of the chemistry department of the high school to explain the formation of the various siliceous and silicate rocks in the earth's crust. As exhibits, he produced a fine collection of rock specimens with which to illustrate his remarks. He explained the manner in which petrified wood is formed, showing how the silica, held in the water gradually displaces the carbon of the wood fiber, causing it to pass off as carbon dioxide. An interesting part of the talk dealt with the formation by natural processes of carbon dioxide pockets in rubies and other precious stones, and how, under pressure caused by heating, the stones may be made to explode. His discussion of and experiments on water glass were exceedingly interesting as was his lecture throughout.

FINANCES AND MARKETS

[ASSOCIATED PRESS DISPATCH] NEW YORK, March 3.—Stocks made further decided progress to and higher levels on a fairly large volume of business some of which are believed to represent investment inquiry. The new week began with numerous indications of general trade improvement, particularly in the steel and allied industries. Advances from the middle-west pointed to greater activity in leading manufacturing centers. The United States Steel Corporation reported an increase of output to seventy-five per cent of its capacity. Forecasts of the Steel corporations of unfilled tonnage to be issued Wednesday suggests a gain of not less than 212,000 tons over December.

United States Steel with several leading railway issues and Amalgamated Copper led the movement throughout the session. Coppers and the usual miscellaneous group of specialties were put forward at intervals. Rise in metal shares attended reports of large exports. Stocks and bonds of several railroads of the Gould group were active at higher prices, presumably anticipating favorable developments at tomorrow's meeting of the Missouri Pacific shareholders. A fair amount of business was reported in the new German notes. Total sales of stock for the day were 26,699 shares.

Bonds were strong despite further extensive selling for foreign interests. Total sales represented a par value of \$2,515,990.

Panama coupon three's advanced three quarters per cent on call.

CHARITY SHOW ADVANCE SALE

Tickets May Be Received at Various Pharmacies—The First Announcement Given to Notable Artists Who Are in Performance.

For the benefit of those who have already bought tickets for the big Associated Charities Benefit performance which is to be held at the Elks theatre on Wednesday night, the committee in charge of arrangements wishes to state that these tickets may be exchanged for reserved seats at the Adams Pharmacy, Adams Hotel building, at any time before seven o'clock tomorrow evening. As the advance sale of tickets has been very large, the holders of tickets are advised to lose no time in exchanging them if they desire to secure good seats. The indications all point to the largest sale of the season.

Among the many notable artists who will serve to make the program one worth remembering will be Mrs. Katherine Wisner McKinley, dramatic reader; Mrs. W. Galen Burgess, soprano; Helen Beatrice Crane, solo dancer; Rena Vivienne, the noted prima donna, will be heard in a duet with Maithland Davies, tenor, accompanied by Mrs. A. G. Hulett; Elton Ensing Hale, pianist; Mrs. Cromwell Stacy, soprano; Eugene Riviere Redewill, violinist; George Crowder, dramatic recitations; and Harry Nace and Harry Zerada will give a gymnastic exhibition that will prove one of the biggest novelties ever seen in Phoenix. In addition to these there will be several other numbers on the program, which will be announced later.

will be a special Knabe Concert Grand which has just arrived from New York to be used exclusively for concert purposes. It is the finest instrument manufactured by this great firm. The settings to be used during the performance have been loaned through the courtesy of John Murray Anderson. The hauling and trucking is done through the courtesy of the Lightning Delivery Co., and Morton, the florist, has donated the floral decorations. From top to bottom, everybody connected with this performance has donated their services, and unless all signs fall, there will be a record-breaking fund turned into the treasury of the Associated Charities. This is the greatest opportunity of the year to do good and at the same time receive no inconsiderable benefit yourself.

AGE AND CLEANLINESS. Old Lady (meeting two little boys)—Why, Johnnie, how very dirty you are! How is it that your little brother is so much cleaner than you are? Johnnie—Well, you see, he's three years younger.—Judge.

READY FOR ETERNAL SLEEP. A somewhat weather beaten tramp, being asked what was the matter with his coat, replied: "Insomnia; it hasn't had a nap in ten years."—Christian Register.

WITH WHEAT UP. Payton—We hear a great deal lately about the high cost of living and loving. Parker—Yes, and the high cost of loafing ought not to be sneezed at either.—Life.

FLEETS BATTER WAY

Known, Turkish officials from Constantinople, issued prior to the admiralty report, insisted the fighting in the Dardanelles was developing in favor of the Turks. It is stated no batteries were being destroyed and that the hostile ships were forced to retreat. Aeroplanes, taking wing from the decks of the besieging craft, are playing a notable part in the operations. One British machine became unmanageable and dived into the sea, another was hit by Turkish twenty-eight times.

the day's news was the report from Bucharest, Rumania, stating that the former Sultan Abdul Hamid of Turkey had regained freedom and was gathering his friends and supporters around him. It was asserted he may seek to play an important part in his country's affairs. More progress by the British fleet before Smyrna, by which the Turkish batteries were silenced, is announced in an admiralty statement. Another official says that the Turks loss in land fighting at the head of the Persian Gulf was fifty per cent larger than previously reported.

A Reuter dispatch from Athens says M. Saimis has declined to form a cabinet to succeed that of M. Venizelos, which resigned Saturday, and that King Constantine will summon M. Goumbas, a deputy for Patras, for the task. An admiralty statement tonight says: "Wing Commander Longmore reports an air attack on Ostend was carried out yesterday by six aeroplanes of the naval wing. Of these two had to return owing to their petrol freezing. The remainder reached Ostend and dropped eleven bombs on the submarine repair base, and four on Kursaal, headquarters of the military. All machines and pilots returned. It is probable considerable damage was done. No submarines were seen in the basin. The attack was carried out in a fresh wind."

DIPLOMATS ARE BUSY

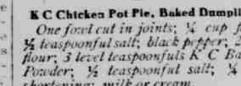

At once to occupy it and maintain order? The Carranza agency has a dispatch from San Antonio stating that word has been received there that Monterey has been captured by Gonzales. A dispatch to the state department from Monterey dated March 6 said fighting had been in progress there three days, "heavy cannonading was going on in the suburbs." The Carranza agency also claimed that their forces had captured Monclova, and that a battle with the Villa forces was expected at Allende, south of Piedras Negras. The following was received from Gen. Carranza in Vera Cruz: "Six thousand working men on

their way from Mexico City to join the constitutionalist army here. There is no occasion for any alarm in Mexico City, where the food problem continues to improve daily. The state department was advised that Duval West and George Carothers, representatives of the American government, arrived at Guadaluajara March 3, and that they had been courteously treated by authorities. They expected to leave March 6 for the border.

Chicken Pot Pie

The Chef's Favorite. By Mrs. Janet McKenzie Hill, Editor of the Boston Cooking School Magazine.

Some folks think that only "colored mammals" can cook chicken, but a trial of this famous chicken pot pie disproves that assertion. Every member of the family will thoroughly enjoy it.

K C Chicken Pot Pie, Baked Dampings. One fowl cut in joints; 1/2 cup flour; 1/2 teaspoonful salt; black pepper; 2 cups flour; 3 level teaspoonfuls K C Baking Powder; 1/2 teaspoonful salt; 1/4 cup shortening; milk or cream. Cover the fowl with boiling water and let simmer until tender, then remove to a baking dish. Mix the 1/2 cup flour, salt and black pepper with cold water to a smooth paste and use to thicken the broth. Remove the fat from the top of the broth if necessary before adding the thickening. Pour this gravy over the fowl, until it is nearly covered, and reserve the rest to serve apart. Sift together the flour, baking powder and salt, three times; into this work the shortening, and use cream or milk to make a dough, less stiff than for biscuits. Put this by spoonfuls over the fowl in the dish, which it should rest upon and completely cover. Let bake about 35 minutes. When young, tender chickens are scarce, this presents a most satisfactory way of serving old fowls. Veal or lamb prepared in this manner is more appetizing than when served as a stew. Try this and the 24 other delicious recipes in the K C Cook's Book, a copy of which may be secured free by sending the enclosed certificate packed in the 25-cent can of K C Baking Powder to the JACOBS MFG. CO., Chicago.
