Rainbow

FRICITION SURFACE RUBBER BELTING

It is the logical and recognized substitute for leather belting, at less cost, and at the same time giving proportionately more power and better service, for all driving purposes. Made of highest class materials, having minimum "stretch," and a wonderful pulley "hug." Rainbow gives nearer 100% efficiency than any other belting on the market. A trial will convince you that RED RAINBOW BELT is better and cheaper than leather. Get our figures.

NEW CAPITAL FOR LEADVILLE MINES

On Sunday there arrived in Courtland the following representatives of the United States Refining and Mining Explorations company: A. E. Anderson, manager for the Pacific coast division; S. J. Jennings, vice president and P. D. Weeks, geologist, says the development of the Leadville group, now under bond to the Needles Mining and Smelting company, a subsidiary of the United States company, which, under the direction of Frederick A. Earls, engineer in charge, has been pushed so energetically during the last three months.

As an immediate result of their visit, work was promptly started on cross cuts on the second and fourth levels of the Maid of Sunshine, under contract taken by Thos. Frazer. In anticipation of this, Mr. Earls has made all preparations for prospecting this development work, having air lines, pump connections, etc., in readiness.

In addition to the work mentioned as the outcome of their visit, the party while here, mapped out a comprehensive line of development that will be carried forward with the characteristic manner that has marked their progress since the first move was made in our camp—Arizona.

VERDE COMBINATION COPPER IS FINANCED

JEROME, Aug. 17.—Information from headquarters of the Verde Combination, the completion of arrangements for financing of which company James M. Layman, promoter, went east a few weeks ago, conveys the news of the accomplishment of this purpose and it is expected this week will see the completion of details. The Grand Island Mining Co., also being financed through Layman's efforts, will this week make application to the corporation commissioners to sell stock and there will be 100,000 shares placed on the market in the near future. The property is said to have a splendid showing. The completion of arrangements for financing of the Verde combination, which will insure a treasury fund for development purposes of \$200,000.

"This makes an admirable process," he further said, "and the recovery is surprising in the percentage shown." "The plant is handling at the present time 125 tons per day, and this output will be enlarged in a short time to 150 tons. With the plant now making a heavy recovery, the Copper Queen Gold company is preparing to begin mine work in a short time. It will also use the flotation mill under a joint agreement by which the works were built. Flotation in this instance has solved a vital problem for the future of both mines, Mr. Stoddard states, and the success of both properties is assured.

STODDARD TO SHIP SOME CONCENTRATES

Celora M. Stoddard, manager of the Stoddard Milling Co., says that experimental test runs of the new plant have given way to permanent operations, and the first product of a carload of exceptionally high grade concentrates would be shipped from the works on next Monday to Humboldt.

The initial runs are being made from Birmingham, Cochine county, last week in which mine he states, responds to the treatment given by flotation, without resorting to the tables in position. "This makes an admirable process," he further said, "and the recovery is surprising in the percentage shown." "The plant is handling at the present time 125 tons per day, and this output will be enlarged in a short time to 150 tons. With the plant now making a heavy recovery, the Copper Queen Gold company is preparing to begin mine work in a short time. It will also use the flotation mill under a joint agreement by which the works were built. Flotation in this instance has solved a vital problem for the future of both mines, Mr. Stoddard states, and the success of both properties is assured.

LOOKING OVER THE COBRIZA'S AFFAIRS

Halstead Lindsley, of the Goodrich Lockhart Co., of New York, visited Johnson, Cochise county, last week in company with E. R. Harmon, of Philadelphia, looking over the Cobriza Mines Development company's affairs, and it is rumored that some very large deals are under way which would insure a greater output for the camp. Shipments daily are steadily maintained at from six to eight cars of fine sulphide copper ores. A fine body of ore has just been struck on the 1500-foot level. H. S. Wren, of Wein & Stone, are shipping three cars of sulphide copper ore from their properties adjoining the Cobriza company, otherwise known as the Republic, and expect to increase the output soon.
