**CUTAWAY HARROWS**

The great efficiency of CUTAWAY double action harrows is due more to the rigid main frame than to any other feature. All four gangs are attached to the one rigid main frame. The rear discs cannot slide from side to side, following the course of least resistance, but cut just midway between the forediscs. Every particle of soil is thoroughly stirred. This machine is built compactly, with the weight uniformly distributed, and is excessively strong throughout. This is the original double action harrow. There are substitutes but at their best, they are only substitutes. Get our figures on these implements.
