Right now is the time to buy some "close in" farm land or residence lots in Albuquerque. The general impulse throughout the country among the people of ordinary means is to hereafter invest in real estate instead of corporation stocks or bonds, especially in the growing western towns of which Albuquerque is no exception. The general impulse is to hereafter invest in real estate instead of corporation stocks or bonds, especially in the growing western towns of which Albuquerque is no exception. The general impulse is to hereafter invest in real estate instead of corporation stocks or bonds, especially in the growing western towns of which Albuquerque is no exception.

Two years ago outside residence lots sold at from \$115 to \$175, a lot. Now the same lots are reselling at from \$300 to \$500 a lot. There is no safer speculation or savings proposition than an investment in a few building lots here at the bargain prices we will offer for a short time.

While another big proposition is maturing, we have decided to clean up a few choice odds and ends at sure enough bargain prices, and which will enable every one who has a little money saved up to make a very profitable and safe investment by selecting something from the following list:
