### DAMAGING EVIDENCE

Board of Inquiry in Possession of Submarine Cable Used in Setting Off Mines.

### OUTSIDE FORCES PROVED

Significant Presence of Cuban Representative at Banquet—United States After Another Battleship—Germany Has Not Been Interviewed.

New York, March 15.—A press dispatch from Key West says: A shattered section of a submarine cable, containing seven conductors for setting off mines, is in the possession of the board of inquiry. The cable was made by the divers at work on the Maine wreck. This proves that the mine which blew up the Maine was connected with a switchboard ashore, which was in charge of a trusted and responsible agent of Spain.

Report of Naval Board Nearly Finished. The world's correspondent at Havana telegraphs today that the report of the naval board of inquiry will be ready to forward to Washington in two or three days. The drawings and plans based on the divers' investigations are nearly finished. The divers are only working now to verify points already suggested by previous discoveries and to take accurate measurements of certain important port plates of the wrecked cruiser and twisted ram, which the correspondent asserts lies in such a position as to prove that outside force destroyed the battleship.

Mr. Quesada's Presence Significant. Tomas Estrada Palma, of the Cuban junta, said today: "I consider Mr. Quesada's presence at the President Hobart's reception to the Bulgarian prince in Washington yesterday, a matter of great importance. He was invited as the accredited representative of the Cuban republic, together with the Spanish minister and other members of the diplomatic corps."

Submarine Mines at Sandy Hook According to the War, submarine mines are being placed in the channel at Sandy Hook by a corps of engineers under the direction of Colonel H. M. Robert. The greatest secrecy is maintained by the officers in charge of the work.

It is the present intention to have the San Francisco convey the Amazonas across the Atlantic.

Cimarron, Kas., March 15.—With the wind blowing 40 miles an hour a prairie fire has been raging within sight of this place, sweeping everything before it. Thousands of acres of pasture have been burnt off, and reports are coming in of losses of live stock and buildings. Rye, a speculator whose home is in the west, on the street. The pope, it is added, is ready to do all in his power to prevent hostilities "which might be fatal to the Spanish dynasty." The dispatch further says: "The vatican has especially exerted its influence in Washington and has tried directly and indirectly to dissuade the United States from plunging into war with Spain. According to all information, if the offices of the pontiff are accepted, he will propose that Cuba remain under the domination of Spain, but to be ruled on the lines of an English colony."

### Cutting A Fray at Fruitland.

The full facts connected with the cutting fray at Fruitland, recently, did not come out in the preliminary hearing Saturday, February 28. The affair was much more serious than the testimony introduced would indicate. Allen Hunt, who cut M. Grady on the face and arm while the latter was shielding two innocent girls from insult and violence, was bound over to the next grand jury by Justice Locke. Failing to give the required bond he was placed in the county jail to await action of the jury. If Hunt should be let out to society for many months he "never would be missed." He is a bad character.—San Juan Times.
