

The Daily New Mexican

THE NEW MEXICAN PRINTING CO.

Entered as Second-Class matter at the Santa Fe Post Office.

RATES OF SUBSCRIPTIONS.
Daily, per week, by carrier \$ 25
Daily, per month, by carrier 1 00
Daily, three months, by mail 3 00
Daily, six months, by mail 5 00
Daily, one year, by mail 10 00
Weekly, per month 75
Weekly, per quarter 2 00
Weekly, per six months 3 50
Weekly, per year 7 00

The New Mexican is the oldest newspaper in New Mexico. It is sent to every Postoffice in the Territory and has a large and growing circulation among the intelligent and progressive people of the southwest.

ADVERTISING RATES.
Wanted—One cent a word each insertion.
Local—Ten cents per line each insertion.
Reading Local—Preferred position—Twenty-five cents per line each insertion.
Displayed—Two dollars an inch, single column, per month in Daily. One dollar an inch, single column, in either English or Spanish Weekly.
Additional prices and particularly given on receipt of copy of matter to be inserted.

SATURDAY, JULY 2.

What a 4th of July the 4th of July of 1898 will be?

Our brave soldiers are fighting in the baking atmosphere of Cuba. They are fighting for liberty, justice, humanity and their country. May success attend them.

It is almost a foregone conclusion that the evening on which Admiral Camara reaches the Philippines, if he has really started for that part of the world, will be Dewey.

The recruiting officers in Kansas are said to be rushing the work through in order to get the two negro regiments filled and on the road to the front before watermelons begin to ripen.

Shafter's program may be a bloody one, but it looks as if it would be successful. War means blood, death and destruction and the taking of Santiago de Cuba with its strong fortifications is no easy task, but it will be accomplished and that as rapidly as it can be done.

Even in these exciting war times it should be remembered by all good citizens, that taxes must be paid as they are necessary for the support of the county and territorial governments. The collectors in the several counties should hustle about and do their duty in the matter of the collection of taxes.

It is to be hoped before two weeks more are past and gone, that the people residing in cities along the Spanish coast be given to understand what war with this country means and be also extended an opportunity to judge of the marksmanship of American gunners on American warships.

Premier Sagasta says Spain will consider no peace propositions until the proper time comes. Time passes very quickly sometimes, and it will not take Commodore Watson's raiding squadron long to convince the doughty Spaniards of that fact after the Spanish coast is reached.

The official reports of the treasury department indicate that the exports of manufactured articles for the past year will be the greatest in the history of the country, and will exceed the imports of such articles by at least \$50,000,000. This is a great showing for the present administration and for the Dingley law. He who runs may read and profit by facts and the logic of the situation.

It is time that some of the enormous quantities of gold promised from Alaska were arriving. Many of those who went after their share have returned and are thinking of enlisting in order to recoup the losses of the journey. New Mexico goes right on turning out the yellow stuff just the same as if Klondike had never been heard of, and not a single miner in the territory has been killed by snow-slides, died of starvation or been frozen to death.

The next thing in order is to recruit the battalion of the territorial volunteer infantry regiment to be furnished by this territory. Governor Otero has started energetically to accomplish this and the captains named for the several companies are hard at work recruiting. It is believed that within ten days the companies, to number 424 enlisted men and 12 commissioned officers will be sworn and mustered in and ready to be sent to Whipple Barracks, the regimental rendezvous. In the company to be recruited there will be from 30 to 40 young men, natives of this county and of Spanish descent. The good work is going on well.

Facts About Cuba.
Robert T. Hill, a well informed and reliable official of the United States geographical survey and who has traveled extensively in Cuba, contributes to the June Forum an article on that island that has dispelled many popular illusions and delusions concerning it, and shows the conditions there to be very different from the ideas hitherto entertained concerning Cuba by many people in this country.

In 1894, Mr. Hill says, the population of Cuba was 1,631,400, or about the same as that of Alabama, Virginia, North Carolina or Wisconsin. This population had steadily increased from 715,000 in 1825. "Sixty-five per cent of the people," writes Mr. Hill, "were descendants of the aristocracy or sturdy peasantry of Castile, Andalusia, Catalonia, and other provinces of Spain, who, while of Spanish blood, had, through adaptation to environment, developed into a race as distinct from the Spaniard as is the Virginian from the Englishman." The remainder were mostly

of African descent. This population averaged about 36 to the square mile—equalling that of Michigan. "Contrary to what has been represented, they were as a class neither ignorant nor lazy. The higher classes, as in New England, Pennsylvania, Minnesota and Louisiana, were gentlemen of education and refinement, skilled in agriculture, and often learned in the arts and professions. Some dwelt in picturesque cities, the largest of which, Havana, with the refinement and gaiety of an European capital, had a population numerically equal to that of Washington."

At the other end of Cuba lies Santiago, the city of picturesque villas. In the whole island is to be found but a small proportion of unilluminable declivities and rocky areas, such as are found in New England; no fields of sterile, volcanic debris, such as occur in the central American lands; no arid areas, like those which make up so large a proportion of Mexico and the western half of the United States; no stretches of sterile, sandy lands, like those of Florida and other coastal southern states. Its proportion of swamp lands is less than that of the average American seaboard state.

"The whole island," according to Mr. Hill, "is mantled with rich soils—fertile, calcareous loams, which, under constant humidity, yield in abundance every form of useful vegetation of the tropical and temperate climes." It is most important to bear in mind that the island is naturally healthful; its plague spots of disease are those towns whose soil and immediate vicinage have been infected by centuries of Spanish occupancy. The battle of Cavite, as Mr. Hill very properly remarks, not only marked the end of four centuries of Spanish colonial rapine, but aroused the American nation to the appreciation of its own place as one of the great factors in the Anglo-Saxon civilization of the world.

New Mexico Volunteers at La Quasina.
Major General Joseph Wheeler, in his official report of the engagement at La Quasina, June 23rd last, says as follows of the eight troops of the 1st U. S. volunteer cavalry engaged in that action: "Col. Wood's regiment was on the extreme left of the city and too far distant from me to be a personal witness of the individual conduct of the officers and men, but our estimate of those of our troops, and the energy and determination of his officers, which has been marked from the moment he reported to me at Tampa, and I have abundant evidence of his brave and good conduct on the field, and recommended him for the consideration of the government. I must rely upon his report to do justice to his officers and men. I desire personally to add that all that I have said regarding Col. Wood applies equally to Lieut. Col. Roosevelt."

I cannot state positively as to the size of the Spanish force which we engaged or the extent of their casualties, further than that the force was much greater than ours and the information I have would indicate that their killed and wounded exceeded those of our troops, but our estimate on this can only be verified when we have access to the reports of the Spanish commanders. The engagement inspired our troops and must have had a bad effect upon the spirits of the Spaniards. It also gave our army the beautiful and well watered country in which we have established our encampments. It has also given us a full view of Santiago and the surrounding country and has enabled us to reconnoiter close to the fortifications of that place.

The casualties in the engagement were:
First United States volunteer cavalry, strength 500, killed 8, wounded 34.
First United States regular cavalry, strength 234, killed 7, wounded 8.
Tenth United States regular cavalry, strength 230, killed 1, wounded 10.
Total strength 964, killed 16, wounded 52."

In this connection it is well to remember, that three of these troops hailed from New Mexico, namely: Troop G, under command of Captain Llewellyn; Troop F, under command of Captain Luna, and Troop E, under command of Captain Frederick Muller.

Justice for New Mexico Volunteers.
Seventy-five more recruits, in addition to the 100 men now being recruited, are wanted for the 1st U. S. volunteer cavalry, of which eight troops are now in front of Santiago de Cuba. If this number should be furnished the regiment would have drawn from this territory 550 men. It is not apparent that Arizona, Oklahoma or the Indian Territory have been called upon for more volunteers than originally furnished. New Mexico therefore, it appears, will furnish much more than its regular quota under the president's first call. This is very gratifying and complimentary indeed, but the territory should receive full credit for this patriotic course. Among other things, it would be but fair and just that more commissioned officers be appointed from New Mexico and in such number as to keep pace with the ratio of enlisted men from the territory. The number of commissioned officers from New Mexico now in the regiment is not in proper proportion compared with the number of enlisted men. More commissioned officers from New Mexico should be chosen to fill vacancies and what is more they ought to be taken from the ranks of the men now in active service in Cuba, who are gallantly and bravely fighting for flag and country and enduring untold hardships and privations. These men are entitled to recognition and promotion and should be accorded such as soon as vacancies among commissioned officers occur.

There are many brave and intelligent men now among our volunteers in the field, who are competent and fit for commissions, just as much, if not more, than some of the volunteers from New York or from Texas who joined the regiment. Let justice be done in this matter; that is all that is asked. New Mexico can and will furnish all the volunteers the federal government may call for from within its confines, but this course, on behalf of this territory, should be appreciated and recognized by the administration and promotion from the ranks

to commissions in the regiment should be made from the volunteers, sent by this territory until its proper proportion of commissioned officers is secured. The laborer is worthy of his hire. The courageous and gallant volunteers from this territory are entitled to all possible recognition and promotion. This should be given them.

A Prosperous Nation.
It will be remembered that at the time war was declared the financiers of note in the country were very much distressed over the financial ruin which threatened to overwhelm all business interests, and that wiseacres prophesied that money would go into such close retirement that the sight of a \$5 bill would cause a riot. At first things financially did assume a doleful aspect. Interest rates advanced and borrowers were compelled to make sacrifices in order to protect their credit, but that condition did not last long.

Bradstreet's latest commercial report throws an entirely new light on the situation, and refutes all charges of stagnation in business. According to the report in the single state of New York, 1,399 new manufacturing concerns started in business during the first six months of the present year, and 1,500 concerns which had been closed for lack of contracts, have resumed operations. Comparing this year's report with that of 1897, it is found that nearly 40,000 more persons are employed in various occupations than there were at work last year. These conditions, with slight modifications, apply to practically every industrial center in the country with, perhaps, one exception, that being New England, where depression is attributed to unsatisfactory conditions in the textile industry.

Undoubtedly the manner in which the new government bond issue has been taken up is the best indication of the condition of the people generally. The treasury department reports that \$40,000,000 in subscriptions to the loan in sums of \$500 and less have been received and accepted. That enormous amount of money is being invested by the very people who have been wept over by the pessimistic reformers as the most down-trodden classes in the land—the farmers, small tradesmen and thrifty mechanics. The total of the applications for the war bonds amounts to \$700,000,000. From these figures it is safe to infer that there is an abundance of money in the United States, and also that it is not in the hands of the few very wealthy individuals.

It is true that there are many poor, and many who are abjectly poor, in the country, but the improvement in business conditions is fast decreasing the number of those who have for some years past been compelled to wander up and down the land in search of employment, and the general situation financially is taking on a much more encouraging outlook. In place of the war producing disastrous to business it has opened new avenues for the investment of capital and increased the demand of labor. With the widening-out of commercial enterprises, which will surely follow a declaration of peace, will come still greater prosperity and for years to come the United States will be the most prosperous nation in the world.

MINING AND MILLS
Last Week's Production of Ore in Excess of Any Previous Week for 1898.

CHEAP POWER IN MOGOLLONS
Items of General Interest to the Mining and Investing Public Gleaned from Various Territorial Points.

A great many people in New Mexico are prone to regard the mining industry of the territory as a secondary consideration, but a glance over the notes gleaned from the current events of the past week in mining circles, will convince the most skeptical that the mining industry is no "one horse" affair, but a substantial, widely producing business of the highest order. New mills are being introduced with success in various localities and the "steady" production is increasing with regularity from the developed properties. The past week has shown a greater output than any preceding week during 1898.

The successful attempt of the Helen Mining company to generate electricity from water power for general use in the Mogollons is most important, and their operations will be watched with interest for the system is destined to become generally adopted ere long, and thus the cost of operating the mines and reducing the ores will be greatly curtailed.

Mining Notes.
The Kingston smelter is working on Brush Heap ore.
The Pinos Altos Gold Mining company is working 100 men.
The McGhee Mining & Milling Co. has started up work at Dolores.
Sinking has been resumed on the Wicks mine at Hillsboro.
The Weimer and Starley tunnel at Amizette is now in 350 feet.
The Confidence mine is the only property working at Mogollon.
Leasers will begin work on the Buckeye mine at Dolores next week.
Collard's Porter mill is working on Snake and K. K. ore at Hillsboro.
Henry Lynch has begun work on his Bitter Creek, La Belle district, properties.
A force of men is doing assessment work for the Mesa del Oro Co. at Hillsboro.
The Wildcat mine at Santa Rita was recently surveyed by Messrs. Ashton & Roach.
More mining work is being done in the Organ mountains this year than ever before.
Pat Green is working his Black mountain property, and running a drift to the supposed location of a rich vein which is indicated by fabulously rich float.

The Miner's Union, which has been organized in the Cochiti hills, is now being developed.
Oliver N. Zuckerman, manager of the Gila river spring, has been elected to gold per ton.
Keller, Miller & Co. have purchased the R. J. Pearce shaft on the Pecos Bluffs.
The annual meeting of the International Tunnel, Mining & Mechanical Engineers in Raton July 15.

C. T. Miley is working the Copper Queen mine at Coconino with a view of resuming operations.
E. H. Johnson, John Jaynes and John Jobson will work the Hammel shaft on the Carpenter district.
It is denied that the Ortiz Mining Co. operating at Dolores, has made a discovery of gold.
E. A. Franzen has opened a shaft for ore in a recently discovered prospect in the Organ mountains.
Each ten days' clean up of the land mill demonstrates that Lone Star ores are being treated successfully.
The Santa Rita copper mine ship from 600 to 700 tons of ore to the Pueblo smelter each month.

The Comstock mine at Mogollon is working 700 men regularly and producing 80 tons of copper per day.
It is reported that a mill and concentrator at the Pecos Bluffs, near the San Andres mining district.
The North smelter at Pecos, has made the shipment of its copper products from the trial run to Kansas City.
M. H. Kock, an employe of the Old Abe mine at White Oaks recently made 2 1/2 sets of timbers in eight hours.
Captain Thomas Brannigan, receiver of the Modoc group at Las Cruces, is now conducting the operations of the property.
William Greenfield has stocked up his ore hauling outfit with more horses. He is hauling ore from the Lone Star mine to the Bland mill.
Professor E. A. Drake has been visiting southern New Mexico points in the interests of the territorial school of mines at Socorro.

The Mystic, a Baldy mountain property, has been leased to M. C. Fort. It has a band of \$35,000. He agrees to work 50 shafts per month.
C. A. Dorn, F. R. Orr and Dr. J. R. Phillips, of Erie, Pa., are in Elizabethtown, where they will begin active work on the Cannon Ball property.
G. H. Chick has his Jicarrilla placer machines in working order. Two new machines with a capacity of 40 tons per day each will be constructed immediately.
Jeff Hirsch and Morris Berglin, of Hillsboro, have leased the Charter Oak mill and will treat ore from their Clinch mill. They have a large amount of \$100 ore ready.
The Texas mine at Central has been provided with a new hoist having a capacity of 1,000 feet depth. The shaft is now down 410 feet. A drift from the 400-foot level shows 30 feet of good ore.

Thomas H. Abbott has sold his interest in the Little Mollie claim, in the Cochiti, to Edwin M. Clark, of Chicago. It is proposed to develop the property extensively and erect a plant for the reduction of the ores.
D. B. Gillette, Jr., manager of the Pinos Altos Gold Mining company, has leased and bonded a large area of the Santa Rita Copper & Iron company's property and will work his new acquisition extensively.
The output of the Hillsboro mines during the past two weeks has been: Bond, 20; Happy Jack, 10; Snake Group, 50; Opportunity, 20; Sherman, 10; Prosper, 10; Rex, 10. Total output since January 1, 3,740 tons.
J. C. Denny has purchased the sulphur mines in New Mexico, north of Toyah, and recently sent a force of men and teams out with scrapers to begin work. Some samples have assayed 97 per cent, and if development shows it profitable, a plant for refining the article will be erected at once.

The new steam hoist of the Albemarle in the Cochiti is now raising ore from the lower level. Eight men are employed in underground development. Two of the cable bins are completed and are being filled. The ore crushers are in place and the cyanide tanks for the mill completed. The engine bed and cylinder, which are ponderous pieces of machinery, will be transported from river subsidies sufficient to render the undertaking safe.
The new water power system of the Helen Mining company, at Mogollon, is a pronounced success. It furnishes power for the mill, electric lighting plant and will soon be utilized by the hoisting works of the Confidence property. The cable three miles in length will carry power to the mine motors. Only about one-third of the power generated by the system will be used and storage batteries will be utilized later to hold and distribute the electric fluid to other mines in the district. It can be further extended to the Confidence mine. This will aid in lessening the cost of operations in general and will doubtless result in opening a number of new properties.

OFFICE FITTINGS.
Filing cabinets of every description, document boxes and files, pigeon hole cases, legal blank cases, office ticklers and every conceivable kind of office fittings and furniture can be had of the New Mexican Printing Company. Write for descriptive, illustrated pamphlets.
Half Fare Everywhere.
July 4, 1898, the D. & R. G. R. R. will sell tickets between all stations at one fare for the round trip. Tickets on sale July 3, good to return July 5.
E. H. Hill, General Agent.

LET YOUR NEXT TRIP BE SOUTHWARD VIA Mexican Central Railroad
You can reach the very heart of Mexico. The Mexican Central Railway is a standard gauge throughout and offers all conveniences of modern railway travel. For rates and further information address: G. A. MULLER, Gen. Agt., El Paso, Tex.

THE SEVENTH Best Sugar factory in the United States was located at Eddy, New Mexico, in 1898, and made 10,000 tons of sugar, beginning November 16th, 1898, and ending February 15th, 1897.

THE COMMENT OF "SUGAR in the beet" of the crop in the Eddy and Roswell sections of the valley is as good as any more uniformly high than any other section of the United States.

FORTUNATELY the land is blessed with just the ability to produce and high grade beets.

MORE FORTUNATELY the Pecos irrigation and improvement Co. and the Roswell Land and Water Co. have an irrigation system of great magnitude, covering a vast body of the BEST SUGAR BEET lands on earth. The water is applied to the crop WHEN NEEDED.

THE SUN SHINES more hours in Eddy and more days in the year in Eddy and Chaves counties, New Mexico, than in any other section of the west.

SPECIAL RATES, VIA THE SANTA FE ROUTE
INTERNATIONAL MINING CONGRESS AT SALT LAKE CITY, UTAH, JULY 6-9, 1898.
For the above occasion the Santa Fe Route will place on sale tickets to Salt Lake and return at a rate of \$3.00 for the round trip, valid until July 10, 1898. Tickets will be sold July 1, 1898, and will be limited to August 31, 1898. These tickets admit of stopover in certain places, and furnish the means of cheap traveling to California and other Pacific coast points.
NATIONAL EDUCATIONAL ASSOCIATION, WASHINGTON, D. C. JULY 7-12, 1898.
SANTA FE ROUTE.
Dates of sale from Santa Fe, July 2, 3 and 4, 1898, limited to July 5, subject to extension until August 31. Fare for the round trip \$3.00.
CHRISTIAN ENDEAVOR CONVENTION AT NASHVILLE, TENN., JULY 5-12.
Dates of sale, June 30, July 1 and 2, limited for return passage until July 15, subject to extension until August 1. Fare for the round trip, \$3.00.
BAPTIST YOUNG PEOPLE'S UNION, BUFFALO, N. Y., JULY 14-17.
Dates of sale, July 8, 9, 10 and 11, limited for return passage until July 15, subject to extension until August 1. Fare for the round trip, \$3.00.
The Santa Fe Route is the shortest quickest and best line to reach any of the above points. For particulars call S. LUTZ, Agent, W. J. BLACK, G. P. A., Santa Fe, N. M., Topeka, Kas.

Summer Tours In Canada!!
THE THOUSAND ISLANDS ST. LAWRENCE RIVER DOWN THE HUDSON
Before deciding on your summer holiday, you should write for the beautiful tourist folder published by the Watkins Railroad, the shortest line from Colorado Springs via Kansas City, St. Louis, Chicago and Detroit to all the pleasure resorts of the east and northeast. Ask your nearest Ticket Agent for rates or write to:
C. M. HAMPSON, Commercial Agent, Denver, Colorado.
Colorado Tourist Rates.
Commencing June 1st, 1898, the Santa Fe Route will place on sale tickets to Denver and return at a rate of \$28.50, Colorado Springs, \$23.85, Pueblo, \$21.05, these tickets will be on sale daily until October 15th, 1898, final return limit, October 31st, 1898, for particulars call on any agent of the Santa Fe Route.
H. S. LUTZ, Agent, Santa Fe, N. M.
W. J. BLACK, G. P. A., Topeka, Kas.

300th Anniversary of the Permanent Settlement of New Mexico, Chamblin, N. M., July 13, 1898.
For the above occasion the Santa Fe Route will place on sale tickets from all points in New Mexico and El Paso, Tex., to Santa Fe, N. M., at one fare for the round trip. Tickets will be sold July 1, good for return passage July 14, one fare or less for the round trip will be made from Santa Fe to Chamblin.
H. S. LUTZ, Agent, W. J. BLACK, G. P. A., Topeka, Kas.

194 separate analysis, chiefly carload lots, showed AN AVERAGE of 17.01 per cent sugar in beet; 84.1 per cent purity.

THIS REMARKABLE RESULT was accomplished by raw farmers, unacquainted with the culture of beet root, on new land and under very trying circumstances, as the factory was not assured until May, and a majority of the acreage was planted between JUNE 1st AND AUGUST 10th.

GOD SOIL makes the seed germinate.
WATER makes the plant grow.
SUNLIGHT puts the sugar in the BEET.
THE ONLY THING left to be desired is that the Pecos Valley be not so hampered by abundance in PEOPLE. We need thrifty farmers; 500 heads of families each on a 40-acre farm.
NO FAIRER terms or conditions of sale of beet and fruit lands were ever made.

C. M. HAMPSON, Commercial Agent, Denver, Colo.

194 separate analysis, chiefly carload lots, showed AN AVERAGE of 17.01 per cent sugar in beet; 84.1 per cent purity.

THIS REMARKABLE RESULT was accomplished by raw farmers, unacquainted with the culture of beet root, on new land and under very trying circumstances, as the factory was not assured until May, and a majority of the acreage was planted between JUNE 1st AND AUGUST 10th.

GOD SOIL makes the seed germinate.
WATER makes the plant grow.
SUNLIGHT puts the sugar in the BEET.
THE ONLY THING left to be desired is that the Pecos Valley be not so hampered by abundance in PEOPLE. We need thrifty farmers; 500 heads of families each on a 40-acre farm.
NO FAIRER terms or conditions of sale of beet and fruit lands were ever made.
WRITE for particulars.

THE SUGAR BOWL OF THE GREAT Valley of the Rio Pecos.
