**THE SYMPATHY BETWEEN LIVING AND DEAD LIMBS.**—A young friend in this town who lost a finger in a saw mill frequently feels that finger move, and he tells of a gentleman now living in Winston who was so unfortunate as to have a leg amputated. They buried the dismembered limb in a box too short for it causing the toes to be pressed uncomfortably against the side of the box. But the gentleman suffered such pain in the toes of the other foot that his brother had to have the box dug up and the leg buried in a box of larger size, and until this was done the sufferer was not at ease in his other foot. We have heard and recorded similar cases often, there must be some reason for it, but who can tell!—*Rockville Times.*

A Philadelphia man who has six little sons, went to the nursery the other evening and found them in a desperate melee. They were biting, kicking and pounding each other savagely, and the furniture was terribly broken up. He sprang in and stopped the combat. Then he demanded to know what the quarrel was about. "We weren't quarrelling, papa," said one of the youngsters, wiping the blood from his nose. "Then what were you doing?" cried the amazed parent. "Playing we were the Board of Aldermen."

Memory records services with a pencil, injuries with a graver.

**The Mormons in Surry County.**

It is announced that the Mormons are to have a conference near Caddie's Ford, in Surry county, on the 7th, 8th and 9th days of October. A number of their big men are to be present, and such a time as is anticipated has never before been witnessed in this country. It is a fact not generally known, perhaps, that Surry county has been a fertile field for the Mormons, and during the past ten or fifteen years a number of her people have been enticed into the Mormon church. The Mormon preachers have spent much time and labor among the people of this mountain region of the State, and have made many converts, particularly among the women, many of whom have moved to Utah. To the women, it is said, their attention has been most directly turned, and the younger ones have been especially objects of their missionary work. So bold and successful have they become in their work that our people talk of appealing to the next Legislature to check their operations by making it a felony to propagate Mormonism or attempt to make converts to it.—*Me. Arty Post.*

**Dinner in France.**  
Dinner in France is supposed to be the one great event of the day. So it is, but not because it is a feeding operation. On the contrary, this French meal is a domestic symposium, in which head and heart take precedence of the stomach. The French value of a meal in France depends more on the social than on the culinary element. Old Isaac Walton's dictum that the company makes the feast, and not the food, is of special significance in France. One rarely sees a Frenchman dining alone, not for the reason that he wants some one to look at, or to drink with, but because he wishes some one to talk to. Conversation accordingly, renders the French table unique. I am inclined to think that the modern French dinner table is the substitute for the old *salon* to which the "feast of reason and the fount of soul" used to be wholly confined. In any event, the chief attraction of the French table now-a-days is conversation.—*John Durand, in August Atlantic.*

**THE WIFE'S TEMPERANCE LECTURE.**  
Said she: "I want the chance to supply you with your drink. I want to sell to you and save the profit. I am compelled to go in rags and have the poorest to eat, while the saloon-keeper's wife has the grandest shawls and bonnets and silk dresses, with fine furniture, and the best for the table. Let me sell to you and I will have all this. I will get a keg of beer or a cask of whisky, whatever you may prefer, and sell to you at so much a drink. The same price you pay the saloon-keeper. My experiment was tried for a while, when the husband himself saw how much money he had been throwing away and concluded not to make any further purchase of any one. But his wife had already gained a nice bonnet, dress and other comforts of life.—*Not by Murphy.*

**What will you take to drink?** asked a waiter of a young lad, who for the first time accompanied his father to a public dinner. Uncertain what to say, and feeling sure he could not do wrong if he followed his father's example, he replied "I'll take what father takes." The answer reached the father's ear, and instantly the full responsibility of his position flashed upon him. "Waiter, I'll take water." And from that day to this strong drink has been banished from that man's home.

We hate some persons because we do not know them; and we will not know them because we hate them. Those friendships that succeed to such aversions are usually firm—for those qualities must be sterling that could not only gain our hearts, but conquer our prejudices.

**Trees and Prosperity.**

When we advised all owners of land to plant trees as an investment it had not been long that the forests have exerted much influence in localities as to health and prosperity. Communities have been made sick by the cutting down of certain woods. Diseases have been known to sweep districts where prior to the slaying of the forests health prevailed. A healthful town has been converted into a sickly one by cutting down bodies of woods that intervened between water courses and it. But there is still another idea connected with the forests. It is asserted that streams dry up because of the unlimited destruction of the trees. If this be so then thoughtful people should consider well the importance of restoring the forests along the water courses. This can be done only by a united action on the part of owners of lands and a general tree planting engaged in.

Mr. David G. Thompson, a Cincinnati investigator, has been writing concerning the evils of wholesale cutting down of forests. We copy an interesting paragraph. He says: "How terrible these results may be seen in the desolation wrought upon Babylon, Thebes, Memphis, and especially upon the people of the Chinese Empire, who have lost their existence as a nation. While the Government ought to protect its own forests, and especially the Chinese, it is the duty of farmers and other small land-owners who can effect the most good; and every influence possible should be exerted to induce them to re-plant a portion of their denuded lands. It is the duty of every citizen to be the press, particularly the agricultural press, and it is to be hoped that it will agitate the subject until the desired result is brought about."

If we regard the trees of the forests in an economical aspect they are of the greatest value. If we consider them from the standpoint of health we may attach the highest importance to their protection. We referred before to the value of North Carolina woods, viewed commercially—as providing the best of timber for building and manufacturing purposes. Now, we have considered briefly their value as health preservers and as preventives of the exhaustion of water-courses. We again urge every land-owner to plant hundreds, thousands, tens of thousands of trees according to means and opportunity. The forests thus planted will be found valuable hereafter to those who shall survive you. Do something for the dwellers which you will have to do for your people's health and prosperity.—*Wilmington Star.*

**Work for Boys and Girls.**  
Of idle hands and idle brains there is an over-growing number, and "What shall I do?" is a question which is disturbing many minds. It is bad enough for men, many of whom have loved a vague and indistinct aim for maintenance, but to women it is infinitely worse, because of the small number of avenues open to them. And to one class of women in particular this question is an ever-present source of trial and trouble. There are in this and in all other communities a class of young women who have enjoyed a good and elevating education, who have been sheltered in pleasant and loving homes, but who for some reason or other have loved a vague and indistinct aim for maintenance, but to women it is infinitely worse, because of the small number of avenues open to them.
