

FOREIGN NEWS.

ARRIVAL OF THE STEAMER EUROPA.

ADVANCE IN FLOUR, CORN and SUGAR.

New York, May 21.

The Steamer Europa arrived at Halifax yesterday. She left Liverpool on the 11th instant.

The political news by the Europa is generally unimportant.

THE MARKETS.

Flour has advanced one shilling. Baltimore and Philadelphia quoted at 23s. 6d. a 21c.; Canadian 23s. 6d.

Coffee.—The demand is chiefly for lower qualities. Better descriptions neglected, and slightly cheaper. St. Domingo 30 to 34s.

Cotton remains firm and prices unchanged since the Hibernia's quotations. The week's sales amounted to 50,000 bales.

In Provisions, not much doing. Beef is unchanged—three to four shillings per tierce. Pork quiet. Bacon firm.

DISCOVERIES AT NINEVEH.

A startling discovery, confirmatory of the truth of the book of Jonah, has been made by Mr. Layard. In excavating the city of Nineveh, he discovered the name of Jonah inscribed upon the ruins. That prophet, as our readers know, was sent to announce to the people of Nineveh the destruction of the city. His eloquence converted many of them, and "God repented him" of the doom he had pronounced, and spared the city for that time. Jonah then became the prophet of Nineveh, and was revered by the inhabitants. As was the Oriental custom, they doubtless inscribed his name in conspicuous places on the walls of the public edifices, and the inscriptions engraved by Assyrian hands, a thousand years before the Christian era, have been found by Mr. Layard. This is one of the most extraordinary demonstrations of the accuracy of biblical history we have ever heard of.

As yet we have only seen the beginning of the end. The city of Nineveh has scarcely yet been entered, and when the excavations shall have been completed, if Mohometan jealousy should ever permit that consummation, we may expect illustrations of the prophecies that will strike the world with awe and wonder.

Great credit is due to the British government for the munificent spirit they have exhibited in aiding the labors of Mr. Layard—placing at his command vessels for the navigation of the Euphrates, conveyance to England of the magnificent sculptures which he has discovered, and affording him every facility which money or British authority could secure. We should be glad to see a similar spirit exhibited by the government of this country, in reference to American antiquities.—*Nash's Sunday Times.*

A SHORT STORY BY DICKENS.

Dickens tells the following story of an American sea captain:

"On his last voyage home the captain had on board a young lady of remarkable personal attractions—a phrase I use as one being entirely new, and one you never meet with in his newspapers. This young lady was beloved in earnest by five young gentlemen, passengers, and in turn she was in love with them all very ardently, but without any particular preference for either. Not knowing how to make up her determination in this dilemma, she consulted my friend the captain. The captain, being a man of an original turn of mind, says to the young lady, 'Jump overboard and marry the man who jumps after you.' The young lady, struck with the idea, and being naturally fond of bathing, especially in warm weather, as it then was, took the advice of the captain, who had a boat ready manned in case of accident. Accordingly, the next morning, the five lovers being on deck, and looking very devotedly at the young lady, she plunged into the sea head foremost. Four of the lovers immediately jumped in after her. When the young lady and her four lovers were got out again, she says to the captain, 'What an I do with them now, they are so wet!' Says the captain, 'Take the dry one!' And the young lady did, and married him."

A German paper says that suspension of life, caused by prussic acid, is only apparent. Life is immediately restored by pouring acetate of potash and common salt dissolved in water on the head and spine. In this country rabbits have been at once recovered from the effects of prussic acid by this means.

A well known physician, in a certain city, was very much annoyed by an old lady who was always sure to accost him in the streets, for the purpose of telling him over her ailments. Once, she met him when he was in a very great hurry. "Ah, I see you are quite lenient," said the doctor, "shut your eyes and show me your tongue." She obeyed, and the doctor, moved off, leaving her standing there for some time, in this ridiculous position, to the infinite amusement of all who witnessed the funny scene.

DEATH OF THE POET WORDSWORTH.

Among the few important items of news brought from Europe by the last steamer, was that of the death of William Wordsworth poet Laureate. He breathed his last on the 23d of April, at Rydal Mount, his residence, near Ambleside, at the age of eighty years. The event was not unexpected, as he was attacked about a month previous with a serious illness, from which at his advanced age, he could not easily recover. He was born in the year 1770, at Cockermouth, in Cumberland, of respectable parents of the middle class in society. Entered St. John's College Cambridge, in 1787, where he graduated, and, upon the death of Southey, received the title of poet Laureate.—*Nat. Intelligencer.*

Human bones of extraordinary size, manuscripts on bark, idols, and Indian utensils of curious workmanship, have been found in a cave in the mountains of the Sierra Morena, Cuba.

Parents' School.

THE 3rd Session will be in the 1st Monday in July next, in charge of Miss Rebecca Fayer.

Miss Fayer is a graduate of Greenboro' Female College; and we have a very satisfactory testimonial of her qualifications from the President of that College, together with his cordial endorsement.

This School is made by Parents to educate their own children. But to do this successfully, aware of the importance of access to a competent Teacher, and anxious to produce the proper stimulus, they open it to others. These will share the benefits that may be produced by parental care and labor.

How to wash Clothes without Machines, Washboards or Pounding Barrels.

SEND ME ONE DOLLAR, Free of Postage, and I will send you, by mail, a printed circular, giving plain directions for WASHING CLOTHES, that will enable one person to do all the washing of a large family before breakfast, thus avoiding all the confusion of a washing-day. This method requires no machines, washboards or pounding barrels—no Turpetine, no Camphine, or other offensive article—NO RUBBING THE SKIN OFF YOUR FINGERS—no tearing of buttons, and wearing out clothes. This plan SAVES THE CLOTHES and makes them whiter, and never injures the finest fabric. The article used cost but a few cents, for a large washing, and can be obtained anywhere.

The circular also contains directions for CLEAR STARCHING, IRONING LACES, WASHING & CLEANING SILKS, KID GLOVES, removing Stains, Grease spots, Mildew from Linen, removing the Nap of Velvet, &c., &c.
