

F. A. Tritle, governor of Arizona, is home again. He was cordially greeted by the people of Southern Arizona and warmly welcomed by those of Prescott, upon his return.—Courier.

Baker & Hamilton, Hardware & Agricultural Implements Manufactory.

BENICIA AGRICULTURAL WORKS. EASTERN OFFICE: 88 Wall St., New York. SACRAMENTO OFFICE: 9 to 15 "J" Street.

SATURDAY, JUNE 2, 1883.

Hereafter ads. in this column will be charged for at the rate of 10 cts. a line.

LOCAL MATTERS.

Black Rock Smelter a grand success. Bah!

More teams are to be put on to haul Clip ore.

Ore body in Clip mine is 18 feet wide, and all pay.

Dr. M. J. Quinlan, of Tucson, was in Yuma on Friday.

The Mohawk Rangers are a body of solid men, you bet.

Mr. Jesus Monroy returned from Tucson on Sunday morning.

Mr. Curtis of San Antonio, Texas is registered at the S. P. Hotel.

The well in Poorman's District is down 200 feet, and no water found.

The Amelia mine is holding ore for the smelter at Norton's Landing.

School census shows 25 children at Norton's Landing of cholastic age.

The school trustees advertise to-day for an assistant teacher for this district.

Mr. M. E. Babcock one of the owners of the profitable gold mine of Peacho is in town.

Faded hair recovers its youthful color and, silky texture by the use of Parker's Hair Balsam.

The poor a. a. has the SENTINEL on the brain. Were it not for us he would have to use a patent inside as well as the out.

Soused Spiced Pilchards—An excellent breakfast dish—in one pound cans. Red Cross Packing Co. San Francisco, and all Grocers.

Mr. Henry Shumaker and family left Yuma this week to take up their residence in Phoenix. The latter city has gained by the change.

Mr. Fred Hubbell goes up on the steamer Gila as purser. Capt. Godfrey has made an excellent selection in obtaining Mr. Hubbell as his clerk.

Thursday the 30th, inst. was Decoration-day. A day replete with sad memories of the past, and one that must be remembered and held sacred forever.

Judge Anderson's magnificent speech in Tucson, on Decoration-day, was a gem of eloquence and a true reflex of the minds of the people "way down South."

Mrs. Yap, sister of Messrs. W. T. and C. K. Lambie, accompanied by the wife of the former gentleman, passed through Yuma on Thursday, evening en route to Virginia, to visit their old home.

That versatile gentleman and active mining man, Mr. Arthur Douglass is disabled by a serious wound in the foot from a pick-point. The accident occurred in the Amelia mine Poorman's District.

FOR RENT.—A dwelling house of five rooms, on Main street, half way between the post office and the depot. The house has recently been re-plastered and has new floors. Enquire at the SENTINEL office.

Col. John R. James died in Tucson on Sunday May 26th, after a lingering illness, with disease of the kidneys and liver. Mr. James was always a warm friend to Silver district, being the first expert to report favorably upon the mines in that section.

Open cut on the Alberta tapped the foot-wall which is as smooth and hard as an Arizona politician's cheek. After cutting through seven feet of black spar some streak of riable iron quartz and calcite, on which Clip pay ore is located was encountered, four feet in width Fifty feet of shafting will be sunk on this streak.

Doc. R. W. Masters a prominent merchant of Norton's Landing is on a visit to our burg. Doc. is a well known and popular citizen of this County, and reports everything prospering in his section. Mr. Masters has been in business in Silver District for a long time, and truly deserves to reap a rich harvest in return for his energy and pluck.

Following is a "verbatim et literatim" copy of a postal card sent East from here by an emigrant. As a specimen of orthography it will bear study:

"Wednesday morning we are now in Yuma on the Colorado river have at ten o'clock will be in losanges at ten to moraw this is the fort card frost. Did you ret them all rite to losangles rite awa."

Just Who Did it, How it was Done, and All about it.

Such a diversity of opinion existing as to the exact manner in which the recent escape from the penitentiary was effected, a representative of the SENTINEL interviewed the Superintendent of that institution this week, so that in the future no mistakes should be made. On meeting that functionary the scribbler said:

"Considerable criticism has been made regarding reports of the recent escape, said to have come from the SENTINEL office. In order to place both you and ourselves right in the matter I wish you would give me a correct statement of the affair for publication."

Superintendent—I won't do it.

R. Why not? The statement will be as beneficial to yourself as to us.

S. All the same I won't do it. When the proper time comes I will make my statement, and not before.

R. But the Advance had a statement last week which it claims as authentic. Why can't we have the same privilege?

S. The Advance didn't get nothing of me.

R. Then you didn't give the editor of the Advance the facts upon which his statement is founded.

S. No; I did not.

The reporter retired, and sought the editor of the Advance, of whom he asked, in substance, where he could get an authentic account of the recent escape from the penitentiary.

"The last issue of the Advance has it," rejoined the editor, with becoming modesty.

R. What assurance can you give of its authenticity? From whom did you get the facts?

Ed. A. From the superintendent.

R. But the superintendent says he has made no statement yet.

Ed. A. Well, I got most of it from the guards, but some facts which they were not familiar I obtained from the superintendent himself.

The above interviews, which we have reproduced from memory, are given to our readers not with a view of injuring any person therein named, but to show the difficulties under which we labor in collecting news. We make no comparisons and draw no conclusions.

Col. James M. Barney accompanied by his wife and ward arrived in Yuma on last Saturday. Mrs. Barney has been an invalid for some time, and we are pleased to learn that the lady's health has already been benefited by our generous climate.

Col. Barney, the Silver king of Arizona, is an old time citizen of Yuma, and the entire community is glad to welcome him back to his pleasant home, which forms a pretty background to a beautiful and luxuriant garden.

On the edge of town Mr. Pablo Figueroa has a splendid garden. Six months ago the site of his miniature farm was a sand lot. Mr. Figueroa fenced in the place built a neat family residence, and irrigated the land. Now he has a garden that he may well be proud of, and a goodly income it brings him too. One by one, our citizens are getting to cultivate the rich soil in and about Yuma, and every experiment made that way has so far proven successful.

One of Chris. Horner's magnificent ore wagons has been purchased by the Royal Mining Co. of Peacho. The same company has also purchased a number of fine mules in Phoenix.

These teams along with the ones now in charge of the oil veteran, Fred Meyer, will keep the Robance mill well supplied with ore. We are glad to chronicle the successful working of the ores of the immense Peacho mines.

The steamer Gila, Captain Joe Godfrey, F. N. Hubbell, purser, left yesterday for Mohave, with the following freight: Castle Dome, 5,160 lbs; Peacho, 15,501; Norton's, 35,930; Clip, 12,010; Blythe, 215; Ehrenberg, 10,850; Col. Res., 405; Mohave, 43,701; Hardyville, 310; El Dorado, 32,700. Total, 157,132. The Gila also took eight cabin and two deck passengers.

The "old boss of the river" Capt. I. Polhamus goes up on Gila as a passenger. It will be a safe bet to make, that he will entertain the passengers with some of his interesting stories and adventures. The ladies on the boat will be sure to receive a large portion of Capt. Polhamus' attention.

If you send the money in advance for anything you order, you need not pay any freight or express charges, Uncle Harris will pay that for you. 221 Kearny, bet. Bush and Sutter.

Prescott, Tombstone and Tucson are rapidly depopulating themselves in behalf of Yuma's reformatory institute.

Hon. Geo. Coats, was a passenger on the East bound express Tuesday evening.

Meteorological Summary.

Reported by W. S. Delano, Sergeant U. S. Signal Service, Yuma Station.

FOR THE WEEK ENDING MAY 31, 1883.

Table with 2 columns: Meteorological data and values. Includes Average barometer, Highest do, Lowest do, Average temperature, Highest do, Lowest do, Greatest daily range of temperature, Least do, Average relative humidity, Average dew point, Number of days clear, fair, cloudy, on which rain fell.

Prevailing wind, S.E. Maximum velocity of wind 22 m. per hour Total movement of wind 1,579 miles.

On last Tuesday morning a most lamentable accident occurred near the Round-house Mr. Adam Bousung a well-known and respected citizen of this village, whilst engaged in his employment in the repair-yard let a large water pipe slip from his hand, and fall on his right foot.

The sharp flange on one end of the pipe cut through his shoe, and carried with it two of his toes. Mr. Bousung was a guard at the Territorial Prison for very near seven years, and unfortunately lost his place in the above institution a month ago; he was always a faithful and energetic officer and his dismissal was occasioned by some outside disagreements of which no notice should have been taken. He immediately sought other employment, and but a short time after succeeding, met with the above mentioned accident. Mr. Bousung's many friends hope for his early and rapid recovery.

Of course Yuma is the hottest place in the world. Every body says it is, and it must be so. As the summer months are here our exchanges will be boiling over with insipid jokes and puns upon our climate, and no actor will have more to say than Tucson. As a matter of fact the temperature of the latter village is quite as warm as our own. On last Monday the thermometer in Tucson registered 105 and on Tuesday 103 degrees. In Yuma it was the same. When the relative humidity of the two localities is taken into consideration, it will readily appear to any sane person that Yuma's climate is much more desirable, being by far the more comfortable place in the summer.

On Monday a painful accident happened to the engineer on the work train near Mesquit station. The train was backing up, thereby throwing considerable dust on the guards, and the engineer, Mr. Moore, walked out on the side platform of the engine to oil them. While so engaged his foot was caught in the machinery and badly crushed. He was immediately brought into town to have the foot dressed, after which he was taken to Los Angeles.

Many of our citizens are compelled to work very hard in the field for their daily bread, and after harvest think nothing of paying \$20 more for a silver watch than they can get it at Uncle Harris. For instance, in those fancy jewelry stores, a good silver Waltham watch costs \$38; at Uncle Harris' you buy the same for \$18. N. 221 Kearny Street, San Francisco.

Hon. R. C. Brown, Assistant Commissioner of Immigration, left to-day for Albuquerque, New Mexico, on "business connected with the forthcoming book on "the resources of Arizona." The material for the book is about all collected, and will soon be ready for the printer.—Citizen.

Invigorating Food.

For the brain and nerve is what we need in these days of rash and worry. Parker's Ginger Tonic restores the vital energies and brings good health and joyous spirits quicker than anything you can use.—Tribune.

Decoration day (last Wednesday) was celebrated in Tucson with appropriate ceremonies. Speeches were delivered by Messrs. Jabrisky, Anderson, Poston Rollins and Baruhari, interspersed with music by the Fort Lowell band and the Arion Glee Club.

Sheriff Paul, of Pima County, was in Yuma on Sunday last, bringing two convicts to the penitentiary.

Sheriff Paul also visited Yuma on Wednesday, in charge of Doney and a Mexican prisoner.

In the District Court of Pima county, on change of venue from this county, Wm. Doney pleaded guilty to the charge of manslaughter and was sentenced to five years in the penitentiary.

Look out boys another car-load of extra fine Schlitz beer packed in ice, will reach here in a day or two.

Weaver has a number of magnificent magnolia trees en route from New Orleans.

Messrs. G. W. Raiton is contemplating a visit to her home in Canada this summer. She expects to start about the tenth of this month.

An engineer by the name of Moore had his left foot crushed by a locomotive, near Mesquit. He was taken to Los Angeles hospital.

The steamer makes the trip this month without a barge, the water being high enough to allow the tug to be loaded.

R. K. pay-car arrived this week and the boys are correspondingly happy.

Judge Purdy returned from the mines on Tuesday, evening.

To Mine Owners of Yuma Co.

I am arranging a collection of the different ores of this county, in my office. Any specimen sent to me will be thankfully received and placed in the cabinet. Please label specimens as to probable value, name of mine and district.

Jos. J. Strick, County Recorder.

How To Secure Health.

It seems strange that anyone will suffer from the many derangements brought on by an impure condition of the blood, when SCOVILL'S SARSAPARILLA AND STILLINGIA, OR BLOOD AND LIVER SYRUP will restore perfect health to the physical organization. It is indeed a strengthening syrup, pleasant to take, and has proven itself to be the BEST BLOOD PURIFIER ever discovered, effectually curing Scrofula, Syphilitic disorders, Weakness of the Kidneys, Erysipelas, Malaria; all nervous disorders and Debility, bilious complaints and all Diseases indicating an impure Condition of the Blood, Liver, Kidneys, Stomach, Skin, etc. It corrects indigestion. A single bottle will prove to you its merits as a health renewer, for it CURE LIKE A CHARM, especially when the complaint is of an exhaustive nature, having a tendency to lessen the natural vigor of the brain and nervous system.

NEW TO-DAY.

To Teachers.

APPLICATIONS FOR THE POSITION of assistant teacher in the 1st School District, Yuma county, will be received on Saturday, June 9th, 1883. Successful applicant must be qualified to obtain third grade certificate.

By order of the Trustees, C. K. LAMBIE, Clerk.

HOUSE AND SIGN PAINTING, Whitening, Wall Tinting in Oil or Water Colors, Glazing, Paper Hanging, etc. Orders promptly attended to. Prices to suit the times.

BAKER'S

MIN'G HORSE-POWER

THE MOST EFFICIENT AND PRACTICAL Machine ever invented for the service of Prospectors and others requiring the use of a Horse-Power. Possessing all the requirements of a first class hoist, and affording means for the continuous operation of a Pump or Blower without interfering with a hoisting apparatus.

It is made entirely of iron; no piece weighs over 350 pounds. At the ordinary speed of a horse a 1000 pound bucket of ore can be raised 120 feet per minute. The hoisting drum is under the complete control of the man at the shaft, and is capable of carrying 500 feet of five-eighths steel rope. The cost of erection is slight, as two men in half a day can easily put it in place ready for work.

While this power is more particularly adapted for mining purposes it is equally adapted to all other uses where animal power is required.

Send for Circular. Address

BAKER'S MIN'G HORSE-POWER

Attached to our store we have a new and complete BAKERY, conducted by a first-class baker. All orders filled at short notice. Mocha, Java and Costa Rica Coffee fresh roasted and ground on the premises.

Goods ARE DELIVERED AT DEPOT and all parts of the town free of charge.

Yuma, A. T.

July 23 1883.

The Champion Mower and Reaper.

The record of the standard Champion Harvesting Machines during the season of 1882 was a repetition of their record in the field during the last preceding years. The universally acknowledged superiority of the machines was fully maintained. Valuable improvements were made, satisfactorily tested and adopted for the coming season, which will sustain for the Champion its recognized pre-eminence over all other harvesting machines. The Champion No. 4 Light Mower. The Champion No. 4 Mower and Reaper and Self-Raker combined.

The HOLLINGSWORTH HAY RAKE. For the past sixteen years it has been a very popular and successful implement, and a great many thousands of them have been sold in all parts of the United States and Europe, and notwithstanding there have been great improvements in that time in this class of farm implements, the Hollingsworth, owing to its peculiar construction and decided merits, has maintained the lead in many sections of the country. We have now undertaken to manufacture it with many new features and improvements, as The New Hollingsworth and these improvements will be quickly recognized and appreciated by all who are familiar with the old Hollingsworth and the radical defects in its construction. The TIGER RAKE belongs to the class of self-operating or horse-drawn Rakes, being preferable to all hand lever rakes, as the labor of discharging the gathered load is transferred to the horse, instead of devolving upon the driver. It is constructed of the best selected materials of wood, iron and steel, by experienced workmen, with machinery especially adapted for the purpose. It has been awarded First premiums at the most important Field Trials of Hay Rakes in America and Europe.

The Celebrated Bain Wagon.

Combine great strength with lightness and easy draft. None but most experienced workmen employed in their manufacture. Especial attention is paid to the iron work, and only the best of iron used. Only the very best of selected lumber, which has undergone the personal inspection of the maker (E. Bain) is used. All timbers in the Bain Wagons have patent oil holes with cast iron caps in the timbers' skels. ECONOMY Portable Hay and Moss Press Power Combined, Patented Sept. 25, 1877 and Jan. 22, 1878. The Economy Hay Press has not only achieved a well merited precedence over all other Hay Presses, but it also retains its world wide reputation for pressing hay, etc., more compactly than any other press in the market; hence all kinds of railroad cars may be loaded with full weight of hay. The Economy is operated with but little force, and is sold at so low a price that any farmer can buy it—and more money is made in operating the press than can be done by any of its competitors, which fact can be fully substantiated in any locality where the Economy has been introduced. Being in use in every State and Territory in the United States and Canada, and having received the first premium over all its numerous competitors in 1881 and 1882 without exception, the claims of the Economy to superiority remain undisputed. For years one of these presses has been turned out daily, but such is the increasing demand that the works will be enlarged to accommodate the accumulation of orders. Parties desiring to purchase a machine for baling hay, straw, etc., would consult their own interests by investigating the merits of this Press thoroughly before contracting for any other.

Prices Reduced.

IOWA FOUR POINTED BARB WIRE, STEEL BARB WIRE, 15 FEET TO THE POUND. A good substantial fence for farms or railroads, can be put up for less than 50 cents per rod, including posts. It will never rust nor decay; secure against Fire, Wind and weather.

For further information send for circulars. Our new catalogue will be ready April 1st, 1883.
