

LOCAL NEWS.

Plant trees. Dan Ming was in town this week. The Gila river is running bank-full. The public school opens on Monday next. Judge Porter's alfalfa is growing finely. Mr. Goldman, a Tempe merchant, is in Globe. Ten thousand fresh cigars at Chapel's. Alonzo Bailey has sown his lawn with blue-grass seed. Col. J. C. Tiffany is registered at Porter's Hotel, Tucson. Five thousand pounds of pure Early Rose potatoes at Chapel's. The mail was nearly four hours late on Wednesday morning. Judge McCabe is back from the Supreme Court session. A fresh lot of choice Oregon apples just arrived at Chapel's. California-made doors and windows for sale by H. A. Anderson. Spend the road money from the band stand to Bohse's brewery. Ten thousand pounds of assorted merchandise just received at Chapel's. Emor Chilson has set out some grape vines, and fruit trees in his garden. G. T. Webster has our thanks for a late copy of the New Orleans Times. Ten thousand pounds of assorted merchandise just received at Chapel's. The house built by Cicero Grime, is being fitted up, but not for his accommodation. Doc. Stallo has been confined to his house for several days, but is on the street again. "One-eyed Dick," a notoriously bad Apache, was in the party that stole Sloan's property. Chapel's is the place to go for fresh, sweet oranges and choice Lisbon lemons. Doc. Stallo has 90 pot plants, and in his garden are 50 rose bushes, just budding out. G. A. Chapel and his assistant, are always affable and anxious to accommodate and please their customers. Anderson's new house is finely finished inside, and all the rooms have been let to desirable tenants. The stope in the Old Dominion, from which the miners are taking the ore from the smelter, is twelve and a half feet wide. David Horst got a drove of cattle—twenty-five head—from Andy Pringle, this week, and they are excellent beeves. John Jones is having the finishing touches put upon his house at the south end of town. Charley Prather is the contractor. Alonzo Bailey's grape vines are budding, and in anticipation, we are sitting on his veranda helping him to eat their fruit. The oldest inhabitant does not remember seeing more water in Pinal creek at this time of the year, than there is now. Mr. Showalter, trader at San Carlos, and son-in-law of the Agent, and his wife and child arrived at the Agency this week. Eastern sellers who want to reach Arizona buyers, should advertise in the Silver Belt, the official paper of Gila county. John Hise is knocking grocery business galley west and crooked. Just think of seven pounds of sugar for a silver dollar! Mr. Griffith manipulated the key and turned the lightning loose Wednesday and Thursday, while Maek was down the line. Mr. Robb will leave for Pinal tomorrow morning. He lectures on "A bit of a New York street," in that burg, on Monday evening. For the past few weeks, although we have steadily increased our issue, we have not had enough papers to supply the demand. One hundred and sixty acres of choice farming lands, with a good irrigating ditch for sale. G. A. Chapel will give the particulars. The mail matter shipped from the office of this paper for New York alone, last Sunday morning, was twenty pounds greater than ever before. Geo. W. Sterritt, proprietor of the Globe Chronicle, is off for a vacation to San Francisco. We do not know how long he will be gone, but hope he will enjoy himself and come back to his home in Globe thoroughly re-

Board of Supervisors. Globe, A. T., Feb. 26, 1883. A special meeting of the Board of Supervisors was called for the purpose of making out a list of all persons in the county qualified and liable to serve as jurors. Board met pursuant to call. Present, Westmeyer and Graydon. The jury list was made out and the clerk of the Board directed to furnish the District Court Clerk with a certified copy of said list. On motion Board adjourned. (Geo. W. Sterritt, Clerk.) They had a little Tehachapi out at the Takoma mine a few days ago. The workmen had pulled up, over the gravity tramway, a new wooden ore car, and as the landing was narrow, shored its rear end up to keep it from slipping. The shore slipped, the car started, and away it went down the grade—an angle of thirty degrees—like a stone out of a catapult! The wooden track rang like huge bells, the sleepers woke up, dust flew from the sides of the track—the men watched it in a fever of excitement! There were cabins by the side of the track on a little bench below, what if it should hit one! As they thought of the possibility of such an occurrence, the car bounded from the track, knocked down a chimney, caromed upon a ridge-pole, went through a huge cedar tree, and landed "out of its hinder end" with a here-we-are-again manner like the clown in a circus. It was not injured by its mad race, and the house that was knocked into a cocked hat, belonged to the man who so imperfectly secured the car at the top of the grade. The last of the smallpox patients is buried—three all told. The last two—Fraser—were brothers. McCleod has varioloid, and is entirely out of danger. The last one of the Fraser brothers could have been well to-day if he had not been subjected to an exposure from which he could not escape. He was on the way to recovery, when he got wet by the rain coming through the dirt roof of the house in which he lived, on him. Up to the time when he got wet, his body was able to throw off the poisonous humors which attend smallpox; when he got wet the conditions were altered and the man died. There should have been a decent house secured for those unfortunate fellows; they should have been isolated and cared for. Only one man seems to have done his duty, and he was the physician who attended them. Our local marksmen have been indulging in some target shooting lately, at short ranges. We give the scores made by some of them. The shooting was done at the 100 and 200 yard ranges—the only useful distances to practice at for men whose skill may be needed for the public safety. Regulation Creedmoor target used, with eight inch bulls eye. The score is for five shots, possible 25 points: Lohrgeran..... 24..... 20 yards. Hinch..... 19..... 19 Spence..... 22..... 15 Geo. Holborn..... 21..... 17 Chas. Holborn..... 22..... 20 Burns..... 19..... 16 Lacy..... 21..... 16 Cook..... 22..... 18 Loyd..... 20..... 7 Beach..... 23..... 16 Park..... 22..... 18 Beard..... 22..... 18 A former well known operator in Globe—Joe Lennon—is receiving a good deal of attention from the Financial and Mining News of New York. Joe was formerly superintendent of the Nugget mine, and spent \$18,000 on it a year or two ago, without reaching an ore body, though "it was supposed that as the vein was good, and the walls perfect, such a thing was probable. He also sold the Washington mine in New York, at a good figure, although it never gave promise of a mine. The mining editor of the Belt made an examination of it, in the interests of New York parties, and did not even find a copper stain fifteen feet below the surface. Joe paid his bills here so far as we know, if he is behind in New York, we commend him to the gentle mercy of his victims. Globe wanted and wants a water work system as a means of improving the sanitary condition of the town, and for the purpose of preventing the horrors of such a catastrophe as visited Tombstone a couple of years ago, when it was burnt. A few gentlemen, organized for that purpose, and sent a bill to the legislature asking a sole privilege to raise, store and sell water for a limited number of years, and issue bonds the proceeds of which should supply the necessary plant. The legislature refused. While there are objections to the sole privilege section of the bill, there certainly could not be any to the balance. Last Sunday evening, minister Calfee preached a thoroughly practical sermon from the text which refers to the dream of Pontius Pilate's wife. As the subject of his lecture was "dreams," we concluded that he would treat it from the standpoint of a mental phenomena, and "throw in the flowers of rhetoric about "dreamland" and all that sort of thing; but it was eminently practical and thoroughly

The cotton woods and sycamores are budding out, and the hills are turning green. A few weeks more and the country will look "fair as a garden of the Lord." The scores made by Messrs. Lomer-gan, Hatch and Spence—twenty-four out of a possible twenty-five, is hard to beat by off hand marksmen. The most beautiful specimen of crystallized carbonate of copper that we ever saw, is now in the office of the Takoma Copper Company in this place. Jim Pascoe, the popular proprietor of the down town restaurant, was presented, by his spouse, with a girl baby, this week. Congratulations from the Silver Belt. We have received an excellent lithographic map of the town site of Globe, stretched and framed. Any real estate owner can look at it, and see where his lots are. Supervisor Graydon is grading the ground immediately north of his present residence, and intends to build there a new frame home. He also intends to plant trees in front of it. The job department of the Belt has had an accession of new material, and people who want work in that line can get it done here as well and as cheaply as anywhere in the Territory of Arizona. All the way from Southern California came a box containing 150 big, yellow oranges, and they were sent to the Silver Belt, and were the thoughtful gift of Judge Porter. A thousand thanks. Every property owner who has taste and public pride, and whose lots abut on the street should plant cottonwoods along the front. One year care, and they will take care of themselves. Set them out. Dr. Lloyd, formerly at San Carlos, is now in Iowa City, Iowa. The death of his mother called him thither. The Dr. has the sympathy of the Belt's staff in his affliction, and their best wishes wherever he may go. The Tucson papers say that we folks in Globe "did not understand the narrow gauge railroad bill." If it had passed as originally intended, we would have had a pretty good knowledge of it in the next twenty years. A lady whose anxiety for a divorce from her husband had assumed the application form, went back to her husband a few days ago, and they both went back to Oregon, and a disconsolate friend of the lady thinks she went back on him. Rev. Mr. Calfee will preach at the M. E. Church, in Globe, on Sunday evening next, on "The Unhonored Prophet." Mr. Calfee's subjects are always "taking," and his treatment of them intelligent. Go and hear him. Doc. Stallo has purchased the lot next to the new house, on the south. As the bridge runs along in front of it, there will be a capital chance to get into the second story window, without "gettin' up stairs." Mr. Gibson, one of the owners of the Sloan ranch, says that there were 50 Apaches in the party that destroyed his property, and that one band of sixteen bucks were thoroughly armed. And yet Wilcox has disarmed the Indians. Somebody is an incorrigible liar. Mrs. W. E. Spence's soprano was a pleasing addition to the choir last Sunday evening. The choir, as it now stands, has excellent timber in it; Messrs. Hitchcock, Hanks and Brook-er doing the male parts and the lady above mentioned, the female. Mrs. Chas. Fish is excellent as an accompanist. Mr. Avery showed us some specimens of carbonate ore from a mine of his which is located about four miles southwest of the Dripping Springs, in this county. It is a large deposit, he claims, and the showing on the surface is three hundred feet high. The ore certainly looks well. A private letter from Mr. H. A. D. Lemon, informs us that Mrs. Graves, the wife of Gila County's representative, is still ill. We regret very much to hear it, and hope she will soon get well enough to return to this summerland of ours, where she will soon entirely recover. W. B. Breckon is going to start a tunnel on the side of the Hill, to tap the Albert Lea vein, far enough down to determine its value. We gave a description of the property some time ago. Breckon works by the day, till he gets a grub stake and then spends it on his mine. He deserves success. The El Capitlan mine, owned by Sam Low and Van Wagensen, is looking better than ever before. A tunnel has been run low enough to get below the old workings and drain them. It is now in 180 feet, and the ledge matter shows two feet wide. Some of the vein is very rich; samples just brought in, and on exhibition at Van Wagensen's store are full of specks of sulphurets and little nuggets of malleable silver. The El Capitlan was once one of the mines in this district, but little work has been done on it for the last two years.

Following are the Grand and Trial Jurors, drawn for the next term of Gila County Court: GRAND JURORS: M. W. Mathew, J. Mow, W. H. Duryea, T. H. Taylor, A. H. Wagoner, J. E. H. Eason, G. S. Van Wagensen, G. A. Allen, C. L. Leland, N. F. Balter, E. Liddell, J. P. Jewell, W. H. Johnson, J. H. Hines, M. Lane, D. Henderson, J. H. Jones. TRIAL JURORS: D. C. Cunningham, Lindsey, Lewis, Chas. T. Martin, S. C. Henderson, A. Love, J. Dempsey, D. Horst, Fred Nupton, C. A. McDowell, E. Middleton, W. Mallory, N. A. Wagoner, J. Gilla. "Uncle Eph," an old colored man who squatted on the edge of the bank, on the west side of Pinal creek, two years ago, has, through industry and thrift got himself one of the most desirable and best improved locations in the town. He has dug away the bank and used it as a filling in a stone wall which he built along the creek. On the inside land he has a fine frame house with a porch, and several grape vines and other plants in regular order about it. Several patches of vegetables are growing thrifflily. Uncle Eph says: "Pussy de Lord, ah! eat-ma-own peaches, growed on mah-own trees, dis yank in dis blessed Territory." The minister said in his lecture last Sunday evening, when he was delivering a glowing panegyric on Elisha's wife, that "the most potent power in the universe of God Almighty, was a woman's love." He never pleases our local editor so much as when he is paying some well deserved compliment to the opposite sex. It is better to get than scold them. No matter whether it is in an African kral, a Pima wickiup, among the doves of St. Mark or in the most elegant circles of society, old Boston women are never wrong in their intuitions, never fail where their affections are enlisted, and always gentle and kind. The Belt's cabinet of curiosities has received a valuable addition from J. J. Williams, Superintendent for the Old Dominion Copper Co. It is a root, petrified, and surrounded by a carbonate of copper. The root made its way from the surface through the opening in the talc substance by which it became filled with a silicious substance of copper. The fibre of the root is perfect, and the fracture shows three concentric rings outside of it. The clay gouge, or talc, is itself impregnated with copper. It is a beautiful curiosity and we thank Mr. Williams for it. The colored man who does the chores in the bank, next door, borrowed an old gun of ours, that was presented to Admiral Coffin of the British Navy in 1815. He is "going to shoot quail," he says. "Our sporting editor says he would not take all the quail that Walcott ate in his 60 day performance and fire one shot out of it." The colored sport was cautioned about the gun, but he said: "Day ain't nuffin to be afraid of, I got de gunniff to shoot it off, fast." The survey for the Arizona Mineral Belt Railroad, will commence in a few days, all of the initial fund being paid in to the company's credit. There has not been much fuss made about this business, but Mr. Eddy and the "Bobbin of the Belt," as the notorious ink-slinger of the Tucson Star calls the associate editor of this paper, have done effective work. The read will be standard gauge, and not a track for go-carts. Somebody put a giant powder cartridge in an old coach, down at Harrrell's the other day, and when it exploded it made that coach look as if it had been used to dam the Ohio river. If there was a tramp loafing in it, an inquest will not be held, as there could not be enough of him got together for a squittal to sit on, much less twelve men. The Social Home Club will have their last party, for this season, on the evening of Friday the 16th inst. Thus far this has been the most successful series of social entertainments ever given in this place, and our society editor is sure this will not be an exception. Let all the votaries of the nimble goddess, Terpsichore, go. Alex Graydon is doing some repairs upon the bullion pots of the Takoma company. The thinness of the iron made it easy for them to crack when subjected to the heat from the molten metal, which are rivited through the pots. The holes are perforated by a machine which boras an inch in less than two minutes. Mr. Allison, the telegraph operator in Globe, has been down over the San Carlos line, inspecting it. He pronounced it in excellent order, and that Gilson and Stanford did an first class job of repairing on it. All of the posts have been straightened and stubbed, and several sharp turns made easier. The continued rains have made the roads heavy, and the consequence is that the snow-cars are making a rest.

The world renowned "Henderson" shoes positively cure all cases of rheumatism, and weakness of the locomotor organs. A varied practice of over thirty years in treating men's diseases has demonstrated that the "Henderson" shoe is not only a success, having sold during that time upwards of forty thousand pairs, and in no instance without success, when specifically used as directed. The "Henderson" shoe is pleasant to take and does not interfere with business pursuits. Sufferers may consult the following list for ready reference, one dollar per package, but for five dollars sent free of detection, securely sealed, by mail, on receipt of price. Address all communications to: Wagoner & Taylor, 10 East Two-seventh street, New York City. Preferred Locations: For choice quality of liquor by the gallon or bottle, go to Van Wagensen's. Empty casks, 5, 10, 25 and 50 gallons, sound and cheap at Hammon & Taylor's. Seaside Library—1000 copies at Hammon & Taylor's. Hammon & Taylor will sell old papers cheap. Robinson, the tinner, has a large supply of stone, granite and tin ware at his place in Central Arizona. He has brooms, wash-bowls, tin ware, coal oil and vapor, and all the things in that line at the lowest prices. In order to make room for a new stock of clothing, Van Wagensen, will sell his shoes at cost. Scissors, the shoemaker, is selling boys' boots at cost. Cheap corn at D. Henderson's. A complete line of ladies' and children's shoes just received, prices astonishingly low, call and examine, at Eaton & Bailey's. The best stock of gent's furnishing goods, boots and shoes at Van Wagensen's. F. W. Westmeyer is selling boots and shoes at greatly reduced prices in order to make room for a new and extensive assortment soon to arrive. Call and see the miners' perfect shoes hand-made and warranted, six different styles—at Eaton & Bailey's. New stock of choice cigars at Van Wagensen's. Dupree's Celebrated Sugar Cured Hams and English Breakfast Bacon at D. Henderson's. Eaton & Bailey have just secured a complete line of hand-made, polished and factory boots, which for quality and price are unequalled. Attention teamsters—Fine Yellow corn at four and a half cents per pound at D. Henderson's. Ten different styles gent's fine shoes of first-class quality and styles, tops, buttons and buckles; the finest ever brought to Globe; at Eaton & Bailey's. New Advertisements: A MEXICAN LAND GRANT California And Two Acres! CATTLE RANGES STOCKED—WANTED. Also, some box Developed Copper Properties. All for England. SILVER BELT—Globe.
