the country as one excellently adapted for a great thoroughfare, being most of the way of a high table land of excellent quality. The Telegraph is exceedingly anxious that the government funds should be economically disbursed. Of course this is all, for he disclaims all personal interest. In regard to that we will only say that if he will sell aimest a continuous lie two columns long for nothing what will be do if well paid for it? He certainly must be one of those fellows who from continuous

There is an urgent demand for the proplifying competing routes. He starts in by copying a "special telegram" to the Bos-ton Herald, from Deadwood, and compliments it as a fair and unpredjudiced state-ment. Now think a mement; who would locality in the Territory is suffering as ment. Now think a mement; who would much for the lack of surveys being made be to the trouble of sending a special to a swe are. Settlers are flocking into Mor-Boston paper for the purpose of lying up a particular route to the Hillsand lying lown another unless he were a party in nterest. Too thin, Mr. Sidney man, altocorrect locality, but there is not a town ship in the county subdivided, and they are an organized county and in running order. We would invite the surveyor genit naturally or at least has been paid for ple here are getting impatient and feel that

Who are seeking to seal the mail contract from Sidney, and tyre the C. B. maile!

Tais is refreshing coming from a town which, travelers who have been taken in and done for have cautioned the public to avoid, and yet while these stories were being told about Sidney we never repeated them through the columnsof the Tatrucuse or in any manner misrepresented, or said anything about the Sidney route further than to claim the Custer route as the best and most feasible and this claim was based upon the authority of old freighters who have tried all the different routes to the Hills. This charge of belying the route is purely fletitious as far as Bismarck is concerned, she has enough business of her own to attend to without meddling with others' routes, and this is, in our opinion.

concerned, she has enough business of her own to attend to without meddling with others' routes, and this is, in our opinion is simply a two column squeal because the cople and the government are fast learnone to the Hills. We are confident we are

"The Fools in Yankton."

The S daey Telegraph in concluding a long and well put article on the territorial question concludes as follows: "And right here in this new territorial scheme, the fools in Yankton, who are likewise, blind, are madly endeavoring to cut their own throats. Their delegates in congress were instructed to right to the very death the are many emeasoring to the their own throats. Their delegates in congress were instructed to fight to the very death the Territorial proposition, and everything that could be done, by private and public means, to prevent the bill organizing Lincoln Territory from becoming a law has been done by the people of eastern Dakota, and so far as the present season of congress is concerned they have undoubtedly succeeded. Now this plain texth stares them in the tace: "The mountain must come to Mahommet or Mahommet must, go to the mountain;" the Territorial government of Dakota must go to the Black Hills, or the Black Hills must go to Yankton, the present seat of government. Analyet the blind men of Yankton are expect. correct in this as we have picked up the first Deadwood paper within reach and

George Donaldson.

So it seems you got him. Our Sidney friend says that nine-tenths of the freight goling into the Hills goes over that route. Then why this squeal? We, havn't the freight records but we presume the above passenger lists are but a type of the freight business. These matters in a great measure regulate themselves; and if the Sidney route is such a lovely thoroughfare why don't it get the travel?

In regard to the charge of collusion with road agents, made againt the Northwestern Stage and Transportation Company, it is not worth while to waste breath to deny it. The man who would seriously make such a charge writes himself down a thoroughbred ass with ears long enough himself. The company have taken every means

The official survey made by the government is probably as good authority about the country through which the Custer route runs as the editor of the Telegraph, take place on the 28th of the present mouth.
