## THE THEATRES

### SMITH'S.

"Why Men Tempt Women" will be the offering for the appearance of clever little Clara Turner and her fine opera evening; to-morrow afternoon, "A Modern Lady Godiva," the strong play with which she opened her engagement yesterday afternoon, will be repeated, and to-morrow evening, "The Hains-Annis Tragedy," a play written around the recent occurrence in New York, will be presented. The offering for the entire week will be of an unusual order, and Miss Turner, who is really one of the most capable repertoire artists on the stage, should have the advantage of splendid audiences for all the remainder of the week. The bill will change with each performance, and each play presented will be handled with the same care and effectiveness. Saturday afternoon, the awards of prizes in the great spelling contest will be made, and there will doubtless be a large attendance of the children and their parents.

"The Time, The Place and The Girl," the great musical and dramatic society for the entire week, Monday evening. The company is headed by the well known comedian, Arthur Dunn, as "Happy Johnny Heck," and assisted by such well known artists as Marie Gray, Grace Lang, Wm. H. Fitzgerald, Eulalie Jensen, C. G. Scribner, William O'Day and others. "The Time, The Place and The Girl," a comedy with music, and of lively action, good sentiment, and what is more than either, a number of original and artistic character types. Though the music is an attractive feature of the production, the plot is so neatly and masterfully arranged, it would be an interesting play without the aid of melodies.

## SOCIAL AND PERSONAL

Mrs. John T. Sterling of this city has been appointed chairman of the Connecticut Branch of the Woman's National Rivers & Harbors congress. Mrs. Sterling's interest in the Daughters of the American Revolution and her experience in the affairs of women's organization splendidly equip her for the place. The country will soon witness a well organized body of women urging the opening of internal waterways and the use of the country's natural means for transportation of raw materials and manufactured products.

The T. G. D. club was entertained last evening by Miss Bessie Maloney at her home, 37 Beach street. The feature which caused a great deal of amusement was the serving of a "circular luncheon," consisting of hot, red lemonade, popcorn, peanuts and candy teddy bears. The club adjourned to meet on Monday evening of next week at the home of Miss Lavinia Hooper, 406 Pembroke street.

Miss Margaret Hicks entertained a party of friends Monday evening at her home in Barnum avenue, in honor of her birthday. Whist prizes were awarded to Miss Emily Dawson, Miss Jennie Meyers, George Thomas and William Kirk. A collation was served, and the following hour was devoted to vocal and instrumental music. At midnight the party broke up and the guests left for their homes, having had an enjoyable evening. Miss Hicks received a number of pretty and useful birthday remembrances.

Miss Alice Maloney celebrated her seventeenth birthday on Sunday evening by entertaining a score of her friends at her home on East Main street. Music and games helped to make the hours pass pleasantly and a fine collation was served the guests. One of the features of the musical program was the selections by a male quartette. Among those present were the Misses Alice Maloney, Lillian Wheeler, Julia McKeon, Bessie Maloney, Elsie Horkheimer, Lillian McCoy, Lavinia Hooper, Mary Fitzpatrick, Mabel Mooney, Alice Mooney and the Messrs. Russell Cohen, Albert Russell, Harold Horkheimer, Fred Wheeler, John Dennis, Fred Clark, Frank Donlin, Joseph Hardy and Joseph Foster.

Mr. and Mrs. Samuel Hall entertained a few of their friends with a supper at their home, 129 Seaview avenue, on Sunday evening. The guests assembled at 6 o'clock and all sat down to a most elaborate and prepared by Mrs. Hall, after which there was a musical program of much merit. Those taking part were Mr. and Mrs. Walter Schuler in duet, Miss Elsie Hull, who entertained with a classic soprano solo and Mr. M. McCarthy sang a number of comic selections. At 10:30 the merry makers departed for their homes, having spent a most delightful evening.

Mrs. Samuel Fox will entertain the members of the Wednesday Evening Whist club at her home on Burroughs street, this evening.

Mrs. Thomas Peace, of Park street, recently entertained the Friday Evening Pinochle club. Cards were indulged in for two hours and Fred Brill won the highest score, 5,860. A dainty luncheon was served by the hostess.

The third and last of the series of whist under the auspices of the Ladies of St. Charles' parish will be held at St. Charles' hall, East Main and Stillman streets, tomorrow afternoon at 3 o'clock.

There is no case on record of a cough, cold or a gripe developing into pneumonia after Foley's Honey and Tar has been taken, as it cures the most obstinate deep seated coughs and colds. Why take anything else. F. B. Brill, local agent. \* 51

### RIOT FOLLOWS WEDDING.

Wilkesbarre, Pa., Jan. 20.—Wedding guests in jail, police and others nursing wounds and one man dying, is the score today of a nuptial event at Kingston, which ended in a riot early this morning. A dispute arose as to who should dance with the bride and in the melee which followed, Adam Rashinski was fatally shot by Officer Maslowski and Officers Ruscavage and Davis were badly beaten. Police reserves arrested eight of the guests.

### Busy people who do not like to lose a day and those to whom time represents money all of them recommend Cyrus Plaster for Backache.

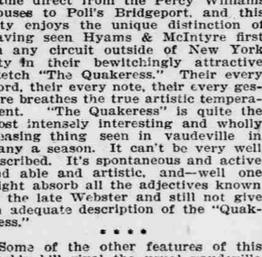

Many of them have used this plaster and know from experience and many others have learned from their friends that Cyrus Plaster gives relief when others have failed. Twenty-five cents will save a day's pay. Cyrus Pharmacy, Fairfield Ave. and Courtland St.

When Elsa Ryan, as "The Blue Mouse," in Clyde Fitch's play of the same name which will be seen here next Tuesday and Wednesday declares: "I'm just hungry for a little affectionate attention," there are few men in the audience who wouldn't gladly change places with the man whom she is addressing. It all comes about over the "temperament" of "The Blue Mouse," who, when she feels sympathetic, can't help being friendly. She has been engaged by Collett, secretary to the president of a railroad to impersonate his real wife, flirt with the president, and oblige for him (Collett) a promotion. Collett really loves his wife and is bored at the child-like affection that the "Mouse" would bestow on him. Quite to the contrary of what he is expected to do, Collett is married. But his wife—well, Mr. Fitch has drawn in her a character so entirely new to the stage that she cannot be seen to appreciate. This mind gives a basis for the plot but, not content with this, Mr. Fitch has drawn other characters into the turmoil so that before the three acts are over the audience has been treated to a variety of the kind of laughter that last. In the cast are Miss Ryan, Robert Dempster, who plays Collett; Sam Reed, as the Chief Clerk Morgan; Marie Gerard, Lily Hall, (widow of the late Mit G. Barlow, the famous minstrel, and well known in this city), John E. Fryer, Henry, Howard Morgan, Birdie Luttrell, Charles Ogilvie, John Jex, John S. Wick, W. M. Nugent, Myrtle Cosgrove and Charlie Cortland. A special matinee will be given Wednesday.

### THE NATIONAL IS scientifically correct

First: Because the gas and the air are thoroughly mixed in the long goose neck, thus insuring perfect combustion.  
Second: The gases are strongly heated before burning, thus increasing the luminosity.  
"The gas and air being thoroughly heated before combustion greatly increases the luminosity."—Quotation from Prof. C. C. Newth, Royal College of Science, London.

The National gives by test 100 per cent. more light per cubic foot of gas than any verticle or upright lamp on the market and the Automatic Regulator admitting a uniform supply of gas insures a steady, perfect light.

Briefly, the National Automatic Regulator allows just enough gas (not too much or too little) to pass through at all times to fill the mantle—a perfect light. No matter how high the pressure, this automatic regulator controls the supply and you do not consume any more gas than you need.

The words "National Automatic" stamped on every regulator. Remember, an inverted light to be a success must have automatic control of gas. No other light has an automatic regulator. You can see the pin point jump when the gas is turned on. Look for these features.

If you cannot come in and buy one of these lights, send in your order — or telephone it, and we will put up one on trial.

REMEMBER WE GUARANTEE the "National" to be superior to any light you ever saw,—you take no risk—you can get your money back if dissatisfied, thousands have already been sold in this city—Ask Your Neighbor.

## USE OF INJUNCTIONS ABUSED BY COURTS

So Says President of Federation of Labor.

Hartford, Jan. 20.—Yesterday saw the preliminary gathering of the annual congress of the Connecticut Federation of Labor. The report of the president was presented in open meeting. Mr. Donahue dwelt at some length on the action of the interstate commerce commission and the courts in their dealing with strikes and boycotts as interfering with interstate commerce. The abuse of the injunction also came in for rebuke and numerous learned legal authorities were cited in substantiation of the argument that the power of the courts thus exercised was unjust and without redress, since the judges held that their actions could not be invalidated. The state treasurer reported for the year ended December 31, 1908, receipts of \$2,478,86, disbursements of \$1,288,83 and a balance of \$1,190,03 a large increase over the preceding year.

## ROCKFELLER GIVES ANOTHER MILLION

Chicago, Jan. 20.—John D. Rockefeller has given another \$1,000,000 to the University of Chicago. The endowment fund of the university is now \$15,000,000 from all sources. Mr. Rockefeller's total contributions to the university aggregate \$24,800,000 for endowment and other purposes.

## SIMPLE REMEDY FOR LA GRIPPE.

Racking la gripe coughs that may develop into pneumonia over night are quickly cured by Foley's Honey and Tar. The sore and inflamed lungs are healed and strengthened, and a dangerous condition is quickly averted. Take only Foley's Honey and Tar in the yellow package. F. B. Brill, local agent.

HAMPTON'S MAGAZINE, New York. ADVERTISE IN THE FARMER.

## NEWEST NOTES OF SCIENCE

Norway imports nearly all of its coal from England.  
The escapement wheel of a watch makes 721,860 revolutions a year.  
Gas and gasoline engines are gradually driving windmills out of Holland.  
To eye defects are attributed 90 per cent. of so-called neuragic headaches.  
The year 1908 rounded out thirty years of telephone service in New York city.  
A combined carbon filament and mercury vapor lamp is being introduced in Germany.  
Almost ten per cent. of the population of Japan is dependent upon fishing for a livelihood.  
Government railroads in India are experimenting with cast iron cross ties made in form of boxes.  
France has withdrawn her objection to a proposed wireless telegraphy service between England and Italy.

A Connecticut paper mill has succeeded in making a tough paper with a fine grain from Texas sugar cane.  
A single body of iron ore in Lebanon county, Pa., has been mined almost without interruption since 1740.  
Under favorable circumstances the product of a single bacterium will total 15,500,000 bacteria in 24 hours.  
The Michigan Central Railway will electrify its Detroit terminals and its main line for 30 miles to Ypsilanti, Mich.  
An easy way to convert a measurement in inches into centimetres is to use this proportion: Inches: centimetres:: 100:63.  
Briquets of compressed calcium carbide, which the maker avers will not burn indefinitely, are a recent invention in Vienna.  
The first living walrus to be exhibited in England in nearly 40 years recently arrived at the London Zoological Garden.  
To secure a patent in each of the 64 countries issuing them would cost an inventor \$15,000 exclusive of the attorneys' fees.  
A peculiar feature of Tibetan incense is that its smoke ascends for a considerable distance before it is affected by air currents.  
Worms, the product of butterflies which were brought from Venezuela by a recent south wind, are destroying the corn crop of Curacao.  
The year 1908 will long be known in Great Britain as the "potato year," the record crop of almost 4,000,000 tons having been produced.  
The country's production of blister and Lake copper in 1908 exceeded that of 1907 by 50,000,000 pounds, being more than 900,000,000 pounds.  
Flasks or other vessels made of fused silica may be heated white hot and plunged into water without being cracked or otherwise injured.  
A single pair of rats, if allowed to breed unchecked and suffering no losses from death, would produce more than 20,000,000 in three years.  
The abandonment of goats' milk as an article of diet by all Europeans living on the island of Malta has completely eliminated a disease known as Malta fever and made the island one of the most healthful in the Mediterranean.

## LIGHTING EXPERTS

have for years been endeavoring to perfect a successful inverted gas light, well knowing that the old style verticle or upright burners must succumb to its superior merits.

The National Automatic Gas Light (Inverted) is the only perfect gas light, for the reason that it is made according to scientific principles.

The National regulates the gas you pay for—not the air, as is the case with all other gas lights—will give twice the light at half the cost of any verticle gas light, and five times the light at one-fifth the cost of electricity.

The hundreds of thousands of National Automatic Gas Lights now in operation throughout the world is a guarantee in itself of the satisfaction they are giving.

When we say the National Inverted will cut your lighting bills in two, we state facts. The net results of tests made by competent scientists are, that while the verticle or upright burners consume from 5½ to 8 feet of gas per hour, the National Inverted consumes from 2½ to 4 feet, depending upon the quality of the gas. Think what this saving of gas means. It is estimated that there are 90 billion cubic feet of gas used annually for lighting. At \$1.00 per thousand this would mean 90 billion dollars.

The National gives as much light as five electric lights (by test) and at one-fifth the cost. It is electric in effect and like the electric does not smoke or discolor the ceiling, as the Automatic Regulator prevents excess of gas when the pressure is high.

If you cannot come in and buy one of these lights, send in your order — or telephone it, and we will put up one on trial.

REMEMBER WE GUARANTEE the "National" to be superior to any light you ever saw,—you take no risk—you can get your money back if dissatisfied, thousands have already been sold in this city—Ask Your Neighbor.
