SALOONS MUST SHUT DOORS CHRISTMAS REGISTRAR'S SOFT BERTH SOON TO BE NO MORE

(Special from United Press.) Hartford, July 20.—In concurrence with the House, the Senate today passed the bill closing saloons on Christmas Day.

COUGHLIN—HAMILL

A marriage license was issued yesterday afternoon to Capt. Patrick Hamill of No. 1 Chemical Co., to Miss Cecelia Coughlin, daughter of former Mayor Patrick Coughlin. Capt. Hamill has purchased a fine home in Noble avenue near Roosevelt street, which he and his bride will occupy after an extensive honeymoon.

Many people with chronic throat and lung trouble have found comfort and relief in Foley's Honey and Tar as it cures stubborn coughs after other treatment has failed. L. M. Ruggies, Resonor, Iowa, writes: "The doctor said I had consumption and I got no better until I took Foley's Honey and Tar. It stopped the hemorrhages and pain in my lungs and they are now as sound as a bullet." F. E. Brill, local agent. P 135

DIED.

SMALLEN.—In this city, July 19, 1909, Alice B., daughter of James and the late Mary Halpin, aged 18 years, 7 months.

Friends are invited to attend the funeral from the residence of her father, No. 616 South avenue, on Thursday, July 22, at 3:30 a. m., and from Sacred Heart church at 9 a. m., with solemn high mass.

Interment at St. Michael's cemetery. P 20 b *

HOWLAND'S

Entrances on Main street, Fairfield avenue, and Cannon street.

The Weather—Fair tonight and tomorrow.

There's reason for this 23d Mill End success.

A temporary success can be won by almost anything. But there must be solid reasons for such success as has been won by the Mill End sale.

And there are such reasons, plenty of them. It almost seems unnecessary to point them out. You know them as well as we do. In fact, you almost know them better, for you look at the Mill End sale from the outside and see these reasons from the buyers' stand-point.

The merchandise of the Mill End sale is varied. It is useful. It is tasteful. It is equally acceptable in every home. It is dependable. It is worthy in every sense. It is of sure satisfaction for the store stands back of every bit of it.

The prices of the Mill End sale are unique and of compelling power. They are always lower than regular prices. They are always as low as it is possible to have them. Often they seem almost absurdly low—but that is the Mill End way. And never are they yoked with undesirable merchandise.

Then service of the Mill End sale is sure. The store stands right in back of every article in the sale with its usual rule of satisfaction or money back. It says: Everything in this sale is all right and everything connected with it must be all right. We will not have it otherwise.

And so the Mill End sale is a bigger and ever a bigger success. It is growing larger and stronger. And the reasons why you can read far better at the sale itself than here in your paper.

BAIL FIXED AT \$3,000

Deaths and Funerals.

Many sorrowing friends and relatives attended the funeral yesterday morning of Thomas Whelan, held from his late home, 139 West Avenue, at 8:30 o'clock and thence to Sacred Heart church where Rev. Patrick Mulloy, Bernard Flynn, Thomas Touhey, John Ennis, Peter Markey and James Coleman, all life long friends of the deceased, the interment was in St. Michael's cemetery.

The funeral of Francis H., the 14-year-old son of John and Mary Rogan, was held this morning from the home of his parents 171 Jones Avenue at 8:30 o'clock and thence to Sacred Heart church where Rev. Patrick Mulloy officiated. The number and attractiveness of the floral offerings showed the esteem in which the little fellow was held by his chums and associates. The pall bearers were Frank Farrell, James McLaughlin, Leo Roy, Kelsey, Burley Campbell, John McCormack and Augustus Fagan. The interment was in St. Michael's cemetery.

In the death of Edward B. Presbrey, who died last evening at the Bridgeport Hospital of liver trouble, the city loses one of its most valued citizens and his acquaintances a sincere friend. He had been in poor health for over a year, but would not give up his work until a few months ago. He afterwards was taken to the Bridgeport Hospital. He was 68 years of age, being a native of Litchfield County, and served as a member of the Civil War on the Union side, being station for a part of the time at New Orleans. After the war he entered the employ of the railroad company. He is survived by a widow and son, Alfred E. Presbrey.

Alice B., youngest daughter of James Halpin, doorkeeper at police headquarters, passed away last evening at her late home 616 South avenue, aged 18 years. The deceased was a graduate of Sacred Heart School, where she was highly esteemed and loved by her classmates. She was a devout attendant of the Sacred Heart church and a member of the Children of Mary, connected with that congregation. Besides her father, two brothers, James and John, and two sisters, Misses Mary and Nellie Halpin, survive.

Full military honors were conferred upon Frederick Butterfass, the young man drowned near Westport on Saturday, while with a camping party. His funeral took place yesterday afternoon from the residence of his parents, 558 Howard avenue. The remains were escorted to the Mount Carmel cemetery by his comrades of Co. D. U. B. of A. The company marched behind the hearse with reversed arms, while at the grave a roll call was held and three volleys were fired across the grave, while the bugler of the company sounded taps.

"SAINT" IN HARBOR.

The 65 foot yacht, "Saint" belonging to Commodore Frank W. Webb of the Fall River Yacht club is moored in the local harbor, having arrived from Fall River this morning.

BISHOP RHODE TO VISIT BRIDGEPORT

Is Vicar General in Chicago Diocese for Polish People.

MUCH WORK IN EAST

The church of St. Michael the Archangel, the Roman Catholic house of worship for the Polish people of the city, will be visited next Sunday evening by the Right Reverend Paul Rhode, D. D., auxiliary bishop of Chicago. Bishop Rhode is the vicar general in the Chicago diocese for the Polish people who number over 250,000 souls, and is well known throughout the Middle West where he has become one of the most popular of the Catholic prelates. He has recently dedicated a Polish Catholic church in Chicago worth \$200,000. He will preach the sermon at 8 o'clock in the evening and will give benediction. Monday morning he will celebrate mass in St. Michael's church. The Bishop's visit to this city is one of many he is making to the Polish parishes of the East.

Next Sunday morning he will officiate at the dedication of a new Polish church in Chicago, Mass. Sunday afternoon he will spend in Springfield, Mass. coming here late in the afternoon. He will be escorted by a number of priests from Springfield and will be met at the station by many local priests and will be escorted to the church in Sterling street by several societies of the church, among them being the St. Joseph Society, the St. Stanislaus, Bishop and Martyr, and the St. Stanislaus Kostka, which is made up of the young men of the parish.

On Monday Bishop Rhode will visit New Haven, going from there to Derby on the following day. On Wednesday he will go to Riverhead, L. I., and will spend the end of the week in Brooklyn. The Sunday following he will dedicate a church for Polish Catholics in Rochester, N. Y.

The pastor of the church of St. Michael the Archangel is the Rev. Father Felix Baran, who has been in charge of the parish for the last two years and a half. A year ago in May the new church was built at a cost of \$85,000, and is a very beautiful structure. The interior looks today as if it were fresh from the workmen's hands, so well has it been cared for. It has a seating capacity for 900. There are 1,200 souls in the parish. Father Baran has shown great industry in erecting this church and in establishing a school which now has an enrollment of 125 pupils. Four of the Franciscan sisters are in charge, teaching both in Polish and English. The school, which has been in existence for two years, is located in a frame building in Burroughs street directly in the rear of the church. The headquarters of the teaching order of sisters in charge of the school are in Buffalo, N. Y.

"Sam" Harris' Will Leaves All to Children

The will of the late Samuel Harris was admitted to probate this morning. In the document the testator directs that his brother-in-law, Louis A. Cowan, of Hartford, be appointed executor. He directs that his property, both real and personal, be divided equally among his three children, Sylvia, Leo Roy and Delmore, who have resided with Cowan since the death of their mother five years ago. He directs that the executor conduct his business in this city in the interests of his children. The Harris property includes \$5,000 in insurance money and the clothing store in Main street.

MUSICIAN'S ESTATE.

An inventory of the estate of the late Pierre Hoyer, the veteran musician and formerly a member of the Wheeler & Wilson band, returned to the Probate court this afternoon, shows \$1,300 in real estate and \$2,463.89 in personal property.

WOULD PREVENT PROCREATION BY ALL DEFECTIVES

House, on Motion of a Physician, Passes a Drastic Bill Giving Awful Power to Medical Men.

Hartford, July 20.—The House today established in Connecticut the principle of preventing the increase of defectives by providing against their birth. The Tomlinson bill, providing for operations for the prevention of procreation passed the House by a vote of 130 to 28. The bill provides that the operation of vasectomy shall be performed on criminals and the inmates of state institutions for defective classes where the physicians connected with those institutions deem it wise in the interests of the state to be permitted to breed other defectives. Dr. Knight of Salisbury made the speech of his career in the House in being the proposer of the bill which was eloquently presented to the House by Mr. Tomlinson of Danbury, its author. There were numerous other supporters of the bill, but the only one who spoke in opposition to it came from Letts of Enfield, who feared that to legalize this operation might cause it to be extended too freely. Mr. Ogden of Wilton introduced an amendment to include county homes for children among its provisions, but the House did not care to go as far as that. The House insisted on its action in providing seats for motormen on trolley cars and appointed Chandler of Rocky Hill and Dunn of Williamstown, House conferees on this matter, and also insisted on its favorable action on the reduction of trolley fares between Hartford and Manchester, Messrs. Burke and Johnson, the House conferees.

Among the matters passed by the Senate were the following: The act which deprives Secretary Hine from membership on the state board of education; \$75,000 for the maintenance and operation of three county tuberculosis homes which are to be built by the new state board and the act providing scholarships in state normal schools for students from small towns.

DIABETES Civilization's Gains and Losses

You said in an editorial on the 10th inst.: "As civilization gains one battle it may lose another, while on the whole we advance. Very true, but the medical profession gave the same attention to diabetes and cancerous diseases that it gives to consumption and diphtheria there would soon be much greater gains.

Diabetes is a very treacherous and dangerous malady. The cause of diabetes, like the cause of cancer, has hitherto baffled the skill of the faculty. Neither of them is curable by drugs but they may be prevented to a large extent and in most cases kept under control by diet. Especially is this true of diabetes.

Our civilization has brought about a new regime. In the modern practices of preparing foodstuff for the human body there has been introduced a system of overrefinement which has rendered nature's process of digestion incapable of changing the amylaceous

DIABETES Civilization's Gains and Losses

portions of the food. This mischievous skill of man's interference causes the starch to pass through the body as glucose, unoxidized, unappropriated and worse than useless. The starch must be rendered soluble for transference as a useful foodstuff through the system of either animal or vegetable life.

The lower animals are seldom troubled with diabetes. Before the present processes of refining, bleaching and spoiling flour and meal became common there were few cases of diabetes among men, women and children. But now the disease is rapidly increasing. The census returns for 1890 in this country, as given by an eminent authority, showed deaths from diabetes to be 73 per 100,000, and in 1880 they rose to 128 per 100,000 and have been increasing ever since.

The increased mortality from diabetes is chiefly due to our civilization being introduced through the channels of commerce and manufacture a cereal foodstuff which is singularly impoverished and wrongly made. It is pleasing to the eye but ruin to the stomach.

In wheat there is about 75 per cent. of starch, and combined with that starch are certain other most essential constituents which were naturally developed in the grain during its growth. Some of these elements which are combined with the starch in its formation are gluten, nitrogen, carbon, chlorine, calcium, phosphorus, sulphur, sodium, potassium, iron, magnesium and fluorine acid. These are all essential though infinitesimal in quantity compared with the starch.

Nature placed all these elements together, and where they are all retained together in the foods the starch is easily and naturally changed by life's processes, but to change the starch in flour from which the above mineral salts have been eliminated is impossible; that is, it is impossible to render it soluble so that the dextrose and glucose can be appropriated and oxidized by the various ferments of the digestive tube to yield up proper heat and energy to the body.

A new epoch in physiological chemistry has been opened up showing that the "diabetic centre" is not in the brain but in the stomach. The ample proof that diabetes is caused by abnormal digestion and bad assimilation. It may be accounted for chiefly from a large ingestion of impoverished cereal foodstuff which is deficient in mineral salts and so rendered incapable of supplying the waste in tissue.

In addition to this there is the alarming increase in the consumption of sugar from the moderate five pounds per head for each man, woman and child per annum to seventy-five pounds per head now. The sugar now in use is also refined to death by the removal of the very essential elements to health in order to make it white.

The confectionery factories of our country are said to have increased from 2,900 in 1890, with an output of about \$56,000,000, to 4,300 in 1900, with an output of \$3,000,000,000. How much glucose is used in these factories is difficult to determine.

It is no wonder that diabetes, Bright's disease, gout, rheumatism, indigestion and cancer increase in proportion to the increased quantities of starchy foods and sweets consumed. No wonder that 3,000,000 of the people are seriously ill all the time and three times that number are wincing at symptoms threatening to lead on to more serious trouble.

Good digestion means good health, but the digestion cannot continue good long when the saliva, gastric juices and blood are gradually poisoned by the constant, everyday use of starch and sweets. They are artificial and not natural food products and so the result is unnatural condition.
