

SEASIDE PARK INCREASES IN BEAUTY AND AREA

New Breakwater To Fayerweather Island Under Way And Reclamation Projects Will Soon Give Added Space For Posterity

What Seaside park of the future will be, the magnitude of the work being carried out under the direction of the Park Board, as well as the vast benefit to be derived by Bridgeporters generally, through these improvements, is being a drawing conception to those visiting this beauty spot. A living testimonial to F. T. Barnum's love for the city of his activities and the devoted service of prominent Bridgeporters who have served on the Park Board, Seaside park has become famed throughout the country for its beauty. The work under way and planned for extending this area, is intended to make it of even greater value to the city than it is at present. The plans are to be carried out and the ambitions of the commissioners realized at a cost to the city far below what those in positions to know consider will be the value in years to come.

With \$15,000 appropriated to begin the plan of extending the boulevard across the marshes and salt water to Fayerweather's island, the commissioners have started work. They now have a magnificent drive from three and a half miles along the waters of the Sound and through one of the most beautiful parks in the country. With the completion of the boulevard Bridgeport will be given a magnificent drive from three to three and a half miles along the waters of the Sound and through one of the most beautiful parks in the country. With the completion of the boulevard Bridgeport will be given a magnificent drive from three to three and a half miles along the waters of the Sound and through one of the most beautiful parks in the country.

Formerly Barnum Dyke comprised the western boundary of the park, being a sheer drop of six feet into a morass of marshes, salt water pools and small creeks. As the building of the boulevard and seawall continues it is planned to keep step in reclaiming of the marshland. So that when Fayerweather's island is connected with and becomes a part of Seaside park it is planned to have an outer wall backed up by acres of grass and tree-bearing land where now there are only marshes. Many have believed that the sea wall and boulevard will make it necessary to bridge Ash Creek and Cedar Creek channels with a drawbridge. This, the commissioners point out is a delusion for there is no channel to speak of to the east of the island. Any draws are necessary, they would be between the island proper and the western mainland.

Comparatively few seem to realize the public spirited service that is being undertaken, the magnitude of the plans and the benefits resulting when they are completed. The reclaiming of the marshes and transforming them into an addition to Seaside park, where thousands will find enjoyment during the hot months, is being accomplished with a few small cuts. Many Bridgeporters having refused earth resulting from excavating of cellars, street repairs and the like have donated it to the park board for use in the work. A visit to the scene is the best means of bringing about a realization of what is being accomplished, there is no doubt but that, with the undergirding well under way, it will receive sufficient support to assure its being completed successfully.

Next to the wall is the roadway, which will be the boulevard extension. It will be 25 feet wide with solid foundation of concrete and stone. The "fill" is made from refuse in sewer and street work about the city.

NO FIREMEN TO GO IN LOCAL THEATRES Board Sends Chief to Convention and Buys Hose For Winter.

Because of the small number of firemen at the disposal of the board, the fire commissioners at a meeting last night declared that they were not in a position to enforce the ordinance requiring firemen being stationed in theaters unless granted an additional number of men in the department. A resolution asking for the enforcement of this order was put before the common council by Alderman Frank J. Clancy, and was adopted. The board of fire commissioners, in considering the resolution, declared that an limited was the number of firemen they would be unable to station in the theaters unless granted an additional number of men in the department. It was decided to grant Chief Monegan leave of absence to attend the annual convention of the International Association of Fire Chiefs at New Orleans, October 20-24.

The board decided to ask for the re-appropriation of \$300 devoted from the sale of fire hoses when additional motor apparatus was purchased. The funds are needed for other purposes. Because the tree in front of her home was slowly dying as the result of the No. 2 dumping ashes after a run, Mrs. Margaret Carty of 453 Lafayette street complained to the board. She also declared that she has to keep the doors and window closed because of the smoke. The board ordered ladders dumped elsewhere.

Lieut. A. E. Maloney of No. 7, injured at a fire some weeks ago, was granted five days' leave of absence. William McDonald, 177 Thompson street, had his application for appointment filed. One thousand feet of hose was ordered, purchased for the winter needs of the department. The hiring of a blacksmith or letting the work out on contract was considered by the board, as the department blacksmith is still ill.

RENTS—Some bargains in nice rents. Six rooms with all improvements on Wood avenue just north of North avenue, only \$26. Nice 4 room rent on Pacific st. for \$10. Five rooms with barn out Park avenue only \$14. Six rooms with all improvements on Parrell St. only \$15. Nice large store with rooms in rear at Bull Head on Main street only \$25. For these and other nice rents see J. F. Seltzer Jr., Co., Room No. 1, 1094 Main St., G 7 g o.

The earth being used by the board for "fill" thus costs practically nothing outside of the teaming expenses and puts to good use material that otherwise would be discarded or sold for a mere song. Some of the material from Park avenue, being stored on vacant ground until the board should become ready to use it. Bridgeport teams and men are now being given much work in carting it to the park. With the completion of the boulevard Bridgeport will be given a magnificent drive from three to three and a half miles along the waters of the Sound and through one of the most beautiful parks in the country. Men; We serve rather than sell.

First thought in this good-clothes store for men is service.

Come in any day; ask to see the new Autumn things.

We expect you'll be most-impressed by the unusual values and the great variety.

Next, you'll notice that you are not urged to buy. We'll show wide range of good clothes, tell you what we know about 'em,—and all the rest we leave to you.

Maybe you've heard of the famous artist who never sold a painting in his life. He let the pictures sell themselves.

We're something like that about men's clothes. They sell themselves. Why shouldn't they? They're best made in America—for they come from

Hart Schaffner & Marx and the House of Kuppenheimer.

Other good makers too—but these two are the pick of the land; in style and tailoring and value.
