W. L. Colegrove, Pharmacist

—Bridgeport As It Was—

100—50—20 YEARS AGO.

(Taken From The Files of The Bridgeport Farmer)

TWENTY YEARS AGO.

Danbury barbers are discussing the Sunday closing movement. Their opinion, all men could be shaved Saturday night if they wished, and thus give the barbers Sunday for themselves.

Thomas Conley was fined \$25 and costs and sent to jail for six months by Judge Kane this morning. He was charged with assaulting Phoebe Vaughn, colored. Attorney Lynch defended him and he appealed under \$500 bonds.

Col Fitzgibbon and his assistant John Hope, are kept busy getting the isolation and smallpox hospitals at the town farm into condition for immediate use. The number of contagious diseases is somewhat less than usual, especially so with diphtheria.

The Bridgeport Liquor Dealers' association met at Madison Hotel yesterday afternoon and for several hours discussed the license question. Disappointment and anger were expressed at the action of the County commissioners in refusing to reduce the license fee and it was voted to petition the commissioners to reconsider.

T. J. Murphy of the local association, is quoted as saying: "It is all wrong to say that any large number of liquor dealers in Bridgeport want to see a high license law passed. If they were sure that they would get the license they might, but they don't know which way the plums are going to fall. High license don't work anyway. It occasions too many unlicensed groceries. It did in Springfield, Mass., where I came from and it will here. It makes a monopoly of business. I believe in giving everybody a chance." On the other hand it is doubtful if any other thing done by the commissioners has received such unqualified endorsement as their refusal to lower the license. On all sides they are receiving words of commendation, even "mass" liquor dealers speaking approvingly. The commissioners mean to see that the law is obeyed to the letter. The following was received at the Farmer office to-day:

To the Farmer:—In an interview in the Union I am represented as saying that the Liquor Dealers' association voted to leave nothing undone to have the license fee of \$400 reduced in this city; also that a petition similar to the one presented to the county commissioners at Norwalk yesterday would be presented to them by the local association. I have been misquoted. The association has never taken such action and I know nothing of a petition to be presented to them. In reference to the statements made by the State street dealer, I wish to say that they are falsehoods. I think they must have been made by some one who probably gets to a meeting of the Liquor Dealers' association once a year and then knows it all.—T. J. Murphy.

FIFTY YEARS AGO.

Rumor is prevalent about town today that Sherman has reached Macon, Ga.

Union gunboats and transports on the Tennessee River near Johnsonville. Four gunboats, fourteen steamers, and thirty barges are claimed to have been burned up, consuming an immense amount of valuable stores. As he claims the burning of immense warehouses at Johnsonville, we may doubt his story, as we still hold Johnsonville, and but little, if any army supplies have been destroyed there.

Our readers will bear in mind the fact that Campbell & Castle's English Opera troupe will appear at Franklin Hall, to-morrow night. Balfe's beautiful opera "The Bohemian Girl."

Somebody who knows says that when two or more women approach you on a narrow walk, fall behind one another to let you pass, you may be sure they are ladies of uncommon politeness and consideration. This is a charge all abraast, sweeping everybody into the mud.

The "failure of the 27th" says the N. Y. News, was one of the greatest victories and successes we read about before election. The Army of the Potomac continues to be the graveyard of Federal Generals.

Information from Spottsylvania and Stafford Counties, Va., shows that the rebel conscripting officers are securing now in all directions, and every man under sixty and boys over fifteen are impressed into the rebel service.

ONE HUNDRED YEARS AGO.

Highly Important. The following message was yesterday sent to both Houses of Congress, by the President of the United States. The sentiments it excited in both Houses were purely national and almost unanimous.—National Intelligence.

To the Senate and House of Representatives of the United States. I lay before Congress communications just received from the Plenipotentiaries of the United States, charged with negotiating peace with Great Britain, showing the conditions on which alone that government is willing to put an end to the war.

The instructions to those plenipotentiaries, disallowing the grounds on which they were authorized to negotiate and conclude a treaty of peace, will be the subject of another communication.

JAMES MADISON, President of the United States of America.

Washington, Oct. 10, 1814. Broke into the enclosure of the subscriber, in the month of September last, a dark brown BULL; two years old; has no ear mark. The owner is requested to prove property, pay charges and take ye BULL away. EBENEZER COLEBY, Ye town of Weston, Oct. 6, 1814.

THE DISPATCHES. We this day commence publishing ye documents of our Ministers at Ghent. It will be seen that Great Britain demands a great part of Ohio and Massachusetts, and the entire abandonment of the Great Lakes!!! Many articles intended for ye paper this day are unavoidably omitted.

THE INDOOR WINDOW BOX.

Washington, Nov. 18.—Indoor window boxes, properly planned and tended will afford much pleasure and satisfaction to the housewife who misses her out-of-door garden during the winter months. It is a mistaken notion that plants kept in flower-pots in rooms use up certain elements of the air in such quantities as to make it unhealthy for individuals using the room. It is much harder on plants to be in a room with people than for people to be in a room with growing plants. Plants indeed use a great deal of air but use such a small portion that the effect of the plant in the room is negligible if the room is ventilated. This also holds good for cut flowers or plants in a sick room, although the odor of some flowers may be depressing to the patient, and bad for that reason.

A good depth for an indoor window box is about 12 inches. The bottom of the box should be covered with stones and broken pottery to give drainage and this should be covered with a layer of moss to prevent the soil above from working down through the stones. drainage and moss should take up about three inches. The greater the body of soil above the moss the more uniform it may be kept as to moisture. The soil should come to within an inch and a half or two inches of the top of the box.

The indoor window box should be made to fit into the window. To get as much light as possible it should be level with the window. It may be fastened with brackets or placed on a table or have legs made for it. There should be a drip pan beneath the box water from soiling the floor. The box may rest directly above the drip pan with brackets or on a table or on a table or have legs made for it. There should be a drip pan beneath the box water from soiling the floor. The box may rest directly above the drip pan with brackets or on a table or on a table or have legs made for it. There should be a drip pan beneath the box water from soiling the floor.

The top of the soil should be allowed to become quite dry once in a while. The result of watering will teach the owner to regulate the supply. Boxes may be used watering sunny weather (especially toward spring) every day, or at least every other day, in cloudy-mid-winter weather not more than once a week. As a rule it is better to water lightly and frequently than heavily and infrequently. The specialists of the U. S. Department of Agriculture advise this, although just the reverse is considered best when watering is done out-of-doors in the summer.

Foliage Not Flowers for Window Box.

A large proportion of the plants in a window box should be of the same general character if the growing is to be successful. Plants of different character need different treatment. It is very difficult to raise flowering plants in a window box with the exception of begonias. Ordinary flowering plants are very exacting and will not find enough light in the ordinary living room, even though placed near the window, although they may do well in a conservatory. The main object of an indoor window box is to furnish the fresh appearance of growing green leaves rather than to raise flowers indoors.

The Department of Agriculture's specialist makes the following sug-

gestions for a window box: Begonias are one of the most attractive plants that may be used for an indoor box. Both flowering and non-flowering varieties will give satisfaction; in fact, the flowering variety is one of the few plants that will blossom indoors without special cultivation. The begonia is not very particular in its requirements, and will flourish with ordinary care.

Small ferns obtained from a florist will flourish. These are particularly adapted to house culture, as they do not require direct sunlight. (Care of ferns will be described in greater detail in a subsequent article.) Even more hardy than ferns is the foliage plant known as the aspidistra. This adaptable plant stands up to a measure of neglect, drought, and dust and still thrives. It does not require direct sunlight.

Geraniums may also be used as foliage plants, though they must not be expected to blossom in the window box. Kenilworth ivy may be planted along the edge. It will grow nicely from seed.

Smilax may be grown from the back of the box and trained up about the window to give the effect of an attractive border. The inexperienced grower of plants indoors cannot expect to do well with roses. These plants are most exacting and they probably will probably fail to flower, but also they will probably be affected by mildew, blight, etc.

The ordinary individual who desires other varieties of growing flowers, may supplement the begonia with flowering potted plants brought from outside, including bulbs raised as described in a previous article of this series. These will probably keep their bloom for a brief period only. People who are fond of plants will, of course, obtain better results with blooming varieties after many trials.

Some have dealt with very difficult problems, which they have solved successfully, but the present suggestions are meant for the novice as well as the more experienced grower.

"STAY-AT-HOME" SUFFERERS OF HAY FEVER AND ASTHMA—GET A BOTTLE OF FOLEY'S HONEY AND TAR COMPOUND

Restful sleep, relief and comfort from choking, sneezing, asthma and tormenting hay fever for those who take Foley's Honey and Tar. It spreads a healing soothing coating as it glides down a raw tickling throat and stops irritating coughs and summer colds. Hindle's Drug Store.—Adv.

A \$25,000 fire destroyed the building of Elisha Wells Co., of Philadelphia, manufacturers of marine engines. The fire was set by burglars who were unable to crack the office safe.

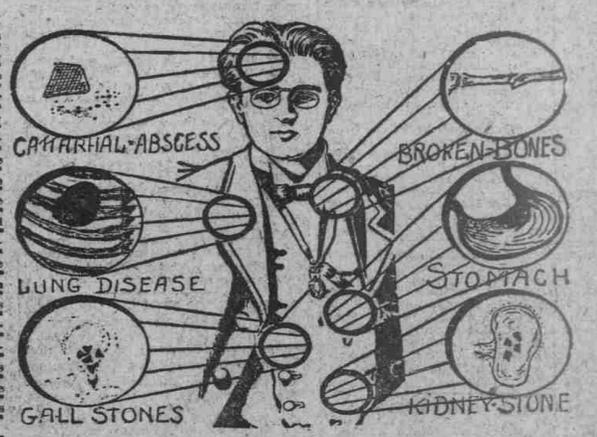

Charles W. Fickering, Jr., a member widely known in Philadelphia banking circles, died of heart disease while at breakfast at his home. He was assisted by trust officers at the United Security Life Insurance & Trust Co.

CURED FOREVER

Hundreds of Sick People Cured to Stay Cured

CAREFUL INVESTIGATION OF HUNDREDS OF CURES BY THE X-RAY
EXPERTS PROVE THAT SICK PEOPLE, WHEN ONCE CURED BY THEM, ARE CURED FOREVER

Everybody knows that a disease thoroughly understood is half cured and that many invasions remain sick because the cause of their illness was never thoroughly investigated and consequently never properly treated. The X-Ray Experts believe that it is better to take no treatment than to take the wrong kind of treatment, and they attribute their great success in healing the sick to the improved methods used by them in discovering just what is wrong. Many cases are decided at once with positive certainty by the X-Rays. Other cases require other methods which are also used free of charge all this week at 467 State Street.

READ THE PROOF

NEW LONDON WOMAN CURED OF DROPSY

MRS. MARY HICKS, 42 Mercer Street, New London, Says: For the past year my heart and kidneys were so bad that I could not lie down, I could not walk upstairs and my legs were so dropical and swelled up that I could not even move my toes. For the past six months I was in terrible condition, but the X-RAY EXPERTS put me right in two months. My legs have gone down to their natural size, the dropsy has all disappeared, and I am fine. In fact I am just great and get around everywhere.

WELL KNOWN TRAINED NURSE CURED OF TUMOR

MRS. FLOYD GREEN, Full Address at Office, Says: I had suffered everything with tumor for the past three years. Doctors said that nothing but an operation would do me any good. X-RAY treatment and medicine have entirely removed the tumor. I am in better health than I have been for five years.

WEST MYSTIC, CONN., MAN MAKES REMARKABLE RECOVERY AFTER 8 YEARS IDLENESS

West Mystic, Conn. Says:—To whomever is interested I would like them to know that I, W. Howard Nash, after having been ill and unable to work for eight years and now with only a little over a month's treatment from ASSO. X-RAY EXPERTS, am now and have been working for three weeks. Hoping that others may derive as much benefit from this treatment as I have, I am

SAVED FROM SERIOUS SURGICAL OPERATION

MRS. P. CAPULLO, Box 10, Bradford, R. I. Says: When I went to the X-RAY EXPERTS I was as good as a dead woman. I was so sick that I gave up all hope of ever being well. Doctors said nothing but an operation would save my life, but I began to feel better just as soon as I began the X-RAY EXPERTS' treatment, and today I don't look like the same woman and haven't time to tell what they have done for me. Hundreds of other women have been saved from operations by treating with the X-RAY EXPERTS in time.

DOCTORS SAID INCURABLE AND GAVE THREE MONTHS TO LIVE—CURED

MRS. H. L. MILES, Potter Hill, Post Office, Box 55, Rhode Island Says: For some years I suffered continually without being able to get any relief, although I went to many doctors. I kept getting worse all the time and at last the doctors told me that I was suffering with Cancer of the Liver and that there was no hope for me. At last I got so weak and sickly, that they told me I could not live three (3) months. When I asked my people to take me to the X-Ray Experts, they did not believe that I could stand the exertion of the trip, and they took me there in an automobile and carried me up stairs for I was unable to walk. They firmly believed that they would have to take me home dead, and only took me to the Experts to please me because they thought I had only a short time to live anyway. I was truly in a terrible condition. I could hardly breathe. I had to rest over an hour before I could tell the Experts how I suffered. The X-Ray Experts promised to help me if possible and placed me under treatment for a month on trial. At the end of three months I was much better. At the end of three months I was entirely well, and I am perfectly well today. I have lived at Potter Hill, R. I., all my life, and all my neighbors and friends know that these statements are absolutely true and can be verified by writing me at Potter Hill, Westerly, R. I., Post Office Box, Number 55.

IS YOUR CASE WORSE THAN THESE? IF NOT WHY NOT GET WELL? DON'T GIVE UP HOPE—CALL THIS WEEK FOR FREE X-RAYS

Hours: 10 to 12, 3 to 4 and 7 to 9

ONLY OFFICE IN BRIDGEPORT

467 State St.

CURED, ALTHOUGH SIXTY YEARS OF AGE

MRS. M. NAGEOTTE, A Highly Respected Resident of Guys Mills, Says: I was taken sick last Fall and after months of unsuccessful doctoring I became so weak that I trembled and shook all the time and could hardly breathe. My heart beat so rapidly on least exertion that I was very poor, my lungs were weak and I was so run down that it was feared I would go into consumption. It was a month ago that I began treatment with the X-RAY EXPERTS, and in that time, although everything else failed, they have made a well woman of me. My circulation is good—my heart action is good—my lungs have gotten well, and I am all right again. I am giving this letter in hope that it may help others to get well. The results I received under their care are simply wonderful considering the fact that I am over 60 years of age.

NEW LONDON MAN SAVED FROM LIFELONG HELPLESSNESS

For 16 years I have had fits which the doctors, and I have had many, all told me were from nervousness. They have been so that I could not keep up any work in all that time. Now, when I heard about the many people the X-Ray Experts had cured in Westerly, New London, Stonington and nearby, I decided to give their electrical treatments a trial. I did this and am happy to say I am working now. I didn't believe there was a Doctor who could do for me what the X-Ray Experts have done, and I can't thank them enough.

ROBERT E. TALBOT, 57 Belden Street, New London, Conn.

STONINGTON, CONN. MAN CURED AFTER 3 YEARS SUFFERING

Over three years ago I became ill with severe headaches, and although I doctored with the best doctors I could find, I continued to get worse. Nothing I tried and nothing the doctors could do for me was of any use, and at last I became very alarmed. I could not do my work and was getting so that I knew I could not keep my business much longer. The doctors I went to had different ideas what was wrong with me, so at last I went to the X-RAY EXPERTS to see if they could help me, and I am thankful that I did. I placed myself in their care at once and today have the good health that I lost. I am hoping that this letter will help other sick business men who feel that they can't keep up and work as I felt when I first went to the X-RAY EXPERTS. (Signed)

MR. N. LOCKER, Box 70, Stonington, Conn.

DYING MAN GETS WELL

White Rock, Rhode Island, Jan. 8, '14. Three months ago I was a dying man. Today thanks to the X-RAY EXPERTS, I am strong and so well that I walk all the way from White Rock to Westerly to take my treatments. Everybody who knows me thought I was going to die. All the doctors I went to before the X-RAY EXPERTS came to Westerly could not help me at all, and I continued to get worse and worse until my case seemed so utterly hopeless that I gave up completely and just waited for the end. I will not try to tell the suffering I went through, but I do want to tell everyone who is sick to know how the X-RAY EXPERTS saved my life after all doctors had failed to help me. My case proves that the X-RAY EXPERTS do perform miracles for it is a miracle that I am alive and well today. To anyone who doubts these facts all I can say is for them to come to White Rock and see me, and ask my neighbors and friends about me. (Signed)

MR. DOCTOVE GOGNE

HUNDREDS OF OTHERS ON EXHIBITION AT OFFICES

Letters from a multitude of others living nearby may be seen at this office. These testimonials include rheumatism, catarrh, chronic heart, kidney, liver, stomach, lung and nerve diseases and in fact almost every other known disease. These letters give the full address of patients, so that any one who so wishes may write or go to see them personally.
