WILSON PROCLAIMS THANKSGIVING DAY THURSDAY, NOV. 25

Says We Have Been Able to
Assert Our Rights While
Preserving Peace.

Washington, Oct. 22.—President Wilson today, in a proclamation designating Thursday, November 25, as Thanksgiving Day, calls attention to the fact that the United States has been at peace while most of Europe has been at war. The text follows:—

"It has long been the honored custom of our people to turn in the fruitful autumn of the year in praise and thanksgiving to Almighty God for His many blessings and mercies to us as a nation.

"The year that is now drawing to a close since we last observed our day of national Thanksgiving has been while a year of discipline because of the mighty forces of war and of changes which have disturbed the world, also a year of special blessing for us.

"Another year of peace has been vouchsafed us; another year in which not only to take thought of our duty to ourselves and to mankind, but also to adjust ourselves to the many responsibilities thrust upon us by a war which has involved almost the whole of Europe. We have been able to assert our rights and the rights of mankind without breach of friendship with the great nations with whom we have had to deal, and while we have asserted our rights, we have been able also to perform duties and exercise privileges of superior and helpfulness which would serve to demonstrate our desire to make the offices of friendship the means of truly disinterested and unselfish service.

"Our ability to serve all who could avail themselves of our services in the midst of crisis has been increased by a gracious Providence by more and more abundant crops; our ample financial resources have enabled us to steady the markets of the world and facilitate necessary movement of commerce which the war might otherwise have rendered impossible, and our people have come more and more

to a sober realization of the part they have been called upon to play in a time when all the world is shaken by unparalleled distresses and disasters. "The extraordinary circumstances of such a time have done much to quicken our national consciousness and deepen and confirm our confidence in the principles of peace and freedom by which we have always sought to be guided. Out of darkness and perplexities have come firmer counsel of policy and clearer perceptions of the essential welfare of the nation. We have prospered while other people were at war, but our prosperity has been vouchsafed us, we believe, only that we might the better perform the functions which war rendered it impossible for them to perform.
