STOCK MARKET

New York, Jan. 29—Opening—Reactionary tendencies were again apparent on the resumption of trading on the stock exchange today, overnight developments, particularly international affairs, contributing to that end. U. S. Steel denoted pressure, with initial offerings of 1,500 shares and 1,000 shares at \$34 and \$34 1/2, fraction under its recent minimum. War issues moved irregularly, Crucible Steel scoring a slight advance, while allied shares were lower. New Haven, yesterday's weak feature, opened at \$9, a gain of a point, immediately falling, however, to \$7. Union Pacific also lost a point with minor changes elsewhere. Secondary quotations were lower.

Close—Professional traders, to whom today's small dealings were almost entirely restricted, again manifested their bashfulness by more or less successful attempts to depress prices of stocks. Leading shares, including United States Steel recorded lowest quotations of the week, some falling to the lowest of the month. War issues like Studobaker, New York Airbrake, the oils and high priced specialties yielded three to almost five points and Bethlehem Steel fell 14 to 48 1/2. New Haven and Canadian Pacific were heaviest of the rally. Variable rallies were followed by fresh selling later. The closing was weak. Bonds were steady.

(Henry Clews)

General business continues active and in satisfactory condition, and no present or cessation is in sight. Commodity prices continue to rise, chiefly owing to demands arising from the war and our financial leaders are wise in emphasizing the dangers of inflation and careless commitments. The outlook, though good, is full of hazardous possibilities and all financial operations should be guided by only the best judgment. The financial situation as a whole is sound and prospects hopeful. The last two months of liquidation have exerted a wholesome effect and will leave the market in better condition for a rise, when conditions again justify an upward movement. Prices frequently decline in January owing to liquidation based upon the rise at the first of the year. The successful sale of \$25,000,000 State bonds at 103.37 showed that there is plenty of capital seeking high grade investments and serving to strengthen the general market, as did the increase in St. Paul's dividend. There are strong factions in the market, and though the bears seem encouraged by recent success, new buying would probably be developed on any pronounced decline.

MARINE DRAFTSMEN'S DANCE SUCCESSFUL

The first annual dance of the local branch of the American Society of Marine Draftsmen was held last evening in Slocum's hall and a most successful gathering has never been held in this city. About 75 couples made merry until morning. The affair was an informal one. Refreshments were served during intermission. The programs, and the ship on a moonlit sea, designed by William Kolvig, were artistic and thoroughly appropriate to the affair. The members of the branch are connected with the Lake Toronto Boat Co. The organization extends throughout the country. The patronesses included the wives of the officials of the company. Mrs. P. E. Brill, Mrs. C. A. Ward, Mrs. E. E. Bartlett, Mrs. J. E. Denny, J. L. Denny and R. F. Hill; the aids were: J. E. Schmelzer, J. M. McDonald and A. L. Alling.

The officers of the Bridgeport branch of the American Society of Marine Draftsmen are: President, C. E. Stumcke, Jr.; vice president, W. T. Bailey, and secretary, J. E. Bulkeley.

A handbag containing some valuable articles and found by the police on January 15 is awaiting a claimant at police headquarters. It is believed to be the property of a New Haven woman. In it was found the card of a New Haven optician.

STILL COUGHING AND NO RELIEF?

Why don't you try some other remedy? Frequent coughing increases the irritation of the bronchial tubes and often becomes chronic. Try Cyrus Cough Specific, it has relieved others and will help your cough. It is not sickening sweet and does not constipate. It is worth your trial.

THE CYRUS PHARMACY

Fairfield Avenue and Courtland Street

PLAN NEXT STEP IN CONTEST FOR DUNN'S FORTUNE

Son's Widow Confers With Counsel in Question of Sharing Estate.

Mrs. Jennie Dunn, widow of John F. Dunn, and daughter-in-law of the late William Dunn whose East Bridgeport property was sold at war prices to the Remington interests a few months before his death, was a visitor in Bridgeport today in connection with the probating of the elder Dunn's will. Mrs. Dunn, whose maiden name was Jennie Hall, conferred with her lawyer, Thomas C. Coughlin, former judge of probate, whom she has retained in the interests of her four children, Anna M., William R., John Leo and Margaret M. Dunn. Although it has been reported that the marriage of John Dunn had resulted in an estrangement of her husband and his family, it became known today that this report is erroneous. Pleasant relations with the elder Dunn continued between his son's family and himself. All the Dunn family attended the wedding following the death of the younger Dunn, 13 years ago. Mrs. Dunn went to work for the support of her four children. They are grown now, and she is living with them in New Haven. Sheerton makes her home with a daughter, Margaret. The estate is estimated at upwards of \$40,000.

Because John Dunn worked with his father, years ago, in establishing a milk business which furnished the cash to buy the property recently sold to the Remington interests, his widow believes her children are entitled to share in the fortune derived from the sale of the land. There are two other children besides the daughter, Margaret, and the deceased son, John. They are Nellie and William, who represented by Attorney Thomas M. Cullinan.

FRENCH ADDRESSES CHURCH MEN'S CLUB

An interesting lecture upon the growth and prosperity of the Remington Arms & Ammunition Co. factory was delivered before the Men's club of the Washington Park Methodist Episcopal church last night by John M. French, publicity manager of the company. Half a hundred stereopticon slides were used in illustrating the talk which was listened to with rapt interest by nearly 200 members and friends of the Men's club.

Freighter Captain Suspended

New London, Jan. 29—Inspectors of Steam Vessels William Stewart have ordered the suspension for 30 days of the license of Captain Grover W. Ingersoll, master of the freight steamer Mohawk, which struck on Bartlett's Reef, Jan. 23. The captain pleaded guilty to a charge of unskillfulness.

ITALIAN LINER CLEARS

New York, Jan. 29—Upon receipt of instructions from Washington the custom house today granted clearance papers to the Italian liner Verona.

Weather Forecast

New Haven, Jan. 29—Forecast: Fair tonight; Sunday unsettled, probably rain or snow, somewhat warmer.

Connecticut: Increasing cloudiness and slightly warmer tonight; Sunday rain or snow and warmer. Moderate to fresh northeast winds.

The disturbance which was central over Colorado yesterday morning has moved eastward and now forms a trough of low pressure extending from southern Texas northeastward to Wisconsin. It is causing unsettled weather with rain or snow in nearly all districts east of the Rocky Mountains except in the eastern portion of the lake region and New England. There has been a decided fall in temperature during the last 24 hours in the eastern districts. At New Haven the fall was from 65 to 22. Moderate temperatures prevail in the central districts but between the Mississippi river and the Rocky Mountains the temperatures continue low.

Temperatures of 60 below zero were recorded in places in Montana and western North Dakota.

New Almshouse Done; Money For Furniture All Spent on Building

Continued from page 1 of stone was placed for the plinths instead of the stone designated at first and other substitutions were made, including the elimination of certain desirable wiring. Firebrick walls were replaced with concrete where the walls were not of the retaining type.

According to Superintendent S. R. Gordon, the original contract with the Osceawanna Building Co. called for a payment in the neighborhood of \$113,000. Mechanical equipment was cared for in another contract of about \$44,000. Mechanical equipment including wiring but bulbs and fixtures cannot be paid for.

The original contract with the Osceawanna Co. has been so changed, with additions and deductions, an examination of the charities department books shows the figure to be in excess of the original.

Skinner & Walker, architects, said today that the Hillside home is practically ready to be turned over by the Osceawanna Building Co. to the board of charities. Official confirmation of completion of the work will be given Feb. 1, or as soon thereafter as the board meets.

A trip through the new institution today confirmed the statements made by the architects, for not only is all the building equipment installed with the exception of kitchen range controls and basement sterilizer, heat has been maintained in the building during the last three months and it is dried and ready for occupancy.

For the first time in this country a special kitchen has been provided for the accommodation of old and respectable married couples without the necessity of separation, which has been the shame of charities departments the world over.

The building is so arranged that admission to the institution can be made without the applicant passing through any department until he has been shaved, bathed and his clothing entirely changed, sterilized, cleaned, mended, and pressed ready for his discharge at a moment's notice.

No living quarters are provided for the reception of the superintendent or the paid staff of attendants unless they are to live with the inmates. Dr. J. H. MacDonald and members of the board, when asked to explain this oversight today, seemed reticent to discuss it, merely saying that "they probably would be cared for later." It is the belief of builders, however, that an additional building will soon have to be erected if discipline is to be maintained.

Laundry and kitchen equipment to care for a regiment has already been installed and the facilities in these departments are equal to those of any hotel in this city. This equipment has been installed because of the possibility of enlarging the building at an early date. Accommodations for only 300 inmates are planned in the present building.

A most modern hospital is included in the building with an operating room that will be able to care for emergencies, and quarters are provided for such violently ill as cannot be accommodated in local hospitals. In the building with an operating room that will be able to care for emergencies, and quarters are provided for such violently ill as cannot be accommodated in local hospitals. In the building with an operating room that will be able to care for emergencies, and quarters are provided for such violently ill as cannot be accommodated in local hospitals.

Another special feature of the present almshouse system is the constant supervision of the dormitories both night and day, with systems of fire alarms. Special panic and fire escapes have been supplied throughout the many exits and fire hose is supplied in convenient places throughout the building. The care of the insane, infirm and aged is provided for in separate sections of the buildings, that they may not be annoyed by or annoy others.

In external appearance the building is a quadrilateral extending in three rows from the front section facing towards Boston avenue at the end of Bond street from the center and the ends. The foremost building is two stories and basement, the central section is two stories to the center where it drops to one story. The two L's with radiating wings built to the easterly section are two stories high, with one story passageways connecting them. At each angle stairways are arranged, so constructed of cement and iron with brass trimmed oak rails as to be ornamental and serviceable. Construction is of dark red brick trimmed with white terra cotta and marble lintels. The design of the doorways and windows in the colonnade. Ornamental staircases, approaches of the entrances and exits of brick and black iron conform to the Colonial appearance.

The interior is finished entirely in gray and white. The gray is confined to the cement floorings, while the walls and woodwork are finished in glossy white. Hardware is bronze throughout. The basement is devoted to reception rooms for men and women inmates. It is entered from the outside and from the various sections the large sterilizing room, laundry, storage rooms, and immense rooms that, it is proposed, will be used for industrial purposes, as far as the law permits. A weaving room for materials used on the farm, and a carpentry shop and paint shop are projected. A large boiler room, containing three high and low pressure boilers, supplying heat, ventilation and steam for the laundry and kitchen are in the center. Inclined runways to the outside connect with elevators, storage rooms and the mortuary room. The laundry is most modern in its appointments, large, roomy and equipped with "accident proof machinery." Immense cauldrons, mangles, dryers, ironing machines, centrifugals, etc., are so arranged that hand work may be done in the same space. It is estimated that the plant can care for at least 1,000 inmates. Incidentally, it is expected that the clothing, washing and bath system will aid the inmates, who are required to perform certain ablutions at stated times. Not only are baths recorded at the main office of the institution, but with the proposed system of three complete changes of clothing in lockers, one of which must be used after every bath, no chance of evasion will result.

On the main floor are the large dormitories, the dining rooms which are separate for men and women, the main office composed of three rooms, the lounging rooms, kitchen and refrigerating rooms. Special construction of corners

prevents the accumulation of dirt and dust, central drains assist in the washing and cleaning process, and ice-water faucets that will afterwards be run through the drains, are located when a complete refrigerating system is appropriated give fresh water, at fair distances apart. In the rear section of the building rooms for the aged, infirm and insane are located separately with reference to men and women inmates. Lavatories are situated in connection with all the private room sections, the main dormitories and the lounging quarters. They may be locked as required. These are complete with showers, tubs and wash basins, designed to accommodate 400 inmates in two minute ablution periods. Heating apparatus is of the radiator type in consonance with the ventilating system that forces heated air from the intake at the basement through the lower strata and sucks it out at the top of the walls by the blower system. In the kitchen at the center of the range of buildings and accessible from all sides, are installed three large hotel ranges backed by sheet metal tables and pot racks, supersteam copper kettles for stews and soups, two steam driven meat cutting machinery, sheet steel washing tubs, drying facilities, and a battery of coffee cans. A special lavatory facilities are also included in the kitchen is illuminated through a large glass transom. A special dumbwaiter is arranged to carry supplies from cellar to roof and an enamelled stretcher elevator runs from the basement to the top floor, where the hospital is located. It is planned to install the women in the westerly section of the building and the men on the east side. Large dormitories for their use are located on the northeast and northwest corners and range northward on both sides in the L-shaped units. They are connected on each side by a long and wide lounging room which takes the place of the ordinary corridor. As a terminal of the three extensions to the Northward, units ranging from the main front are a series of rooms for the sick, the aged and the place of the ordinary corridor. As a terminal of the three extensions to the Northward, units ranging from the main front are a series of rooms for the sick, the aged and the place of the ordinary corridor.

NEITHERCUT CAR HITS CARPENTER AT BUSY CORNER

Machine With Woman At Wheel Seriously Injures Stacy W. Hall.

Driving an automobile at a slow rate of speed south on Main street at Fairfield avenue about 11 o'clock this morning and with the traffic opened to her, Mrs. Richard L. Neithercut of 180 Brooklawn avenue, wife of the purchasing agent of the Bridgeport Brass Co., struck and knocked down Stacy W. Hall, aged 56, a carpenter, of 33 Whitney avenue. Hall suffered a fracture of the skull when, in falling, his head was struck by the rear mud-guard.

The emergency hospital ambulance corps was called and Hall was taken to St. Vincent's hospital where he is in a serious condition this afternoon. Traffic Policeman Alpheus C. Goulden took Mrs. Neithercut to the police quarters and after witnesses said that she was not to blame, she was released. Witnesses assert that the automobile was driven slowly and that Hall attempted to cross the street while traffic was closed against him. He did so at his own risk, according to the police reports.

Mrs. Morehouse's Death Shocks Her Numerous Friends

The news that Bessie Houghton, wife of Vernon Morehouse of Stratford, had died from pneumonia and grip, last night was received with deep regret by the great number of friends and Stratford friends and acquaintances of the young woman. As Miss Houghton she was very well known in Bridgeport when four years ago she conducted gymnastium classes at the local Y. W. C. A. She was a woman of great refinement and great charm, who was beloved by all who knew her.

Mrs. Morehouse was the daughter of Mr. and Mrs. Joseph Houghton of Elm street, Stratford, and had lived most of her life in that town. She was a prominent member of Christ Episcopal church, Stratford, where for several years she taught a class of boys in the Sunday school. Mrs. Morehouse was an alumna of the Stratford High School and the New Haven Normal School and the New Haven School of Gymnastics. After graduation from the latter institution she taught dancing in her own town, was instructor of dancing and Laurelton Hall, Milford, and conducted gymnasium classes in the Bridgeport Y. W. C. A.

In June, 1912, she was married to Vernon Morehouse, son of Mr. and Mrs. George N. Morehouse, a few days before her father's death. Her brother, to whom she was married, was Miss Ruth Griffin of this city.

Vernon Morehouse was superintendent of Watervliet Water works, Watervliet, N. Y., which position he still holds, and he and his bride went to that city to live. A year later Mrs. Morehouse became the mother of a daughter, Margaret, who survives her, as well as an infant. She is also survived by her husband, her mother and father, and two sisters, Miss Josephine and Miss Ethel Houghton, whose marriage to William Everett of Fairfield was scheduled for 3 o'clock this afternoon.

Dr. Milton Butler Pratt of Troy, N. Y., a friend of the family, assisted by Rev. Chauncey C. Kennedy of Christ church, will officiate at the funeral on Monday. Eleven hundred employees of the Union Drawn Steel Co. and the Union Specialty Co. plants at Beaver Falls, Pa., went on strike for a 10 per cent wage increase. One person was killed and four others injured when a brewery auto and a limousine owned by Edward F. O'Brien of White Plains, N. Y., collided near there. One hundred soldiers and train employees were killed by the wrecking of a German ammunition train en route from Lido to Smorgen. The train was wrecked by a washout.

Exports of copper from Atlantic ports for the week ended Jan. 27 amounted to 4,009 tons.

PERFECT DENTISTRY

Without Fear or Pain at Moderate Prices

"NAP-A-MINIT" TAKES THE PAIN AWAY

—makes dental work easy for the patient and permits the doctor to do his best work. Any operation on the teeth can be done with "Nap-A-Minit." You need not fear the dental chair any longer.

Read the Below Testimonial From One of Our Satisfied Patients.

I had 8 teeth extracted by Dr. Weidlich's "Nap-a-Minit" without any pain or inconvenience whatever. I heartily recommend Dr. Weidlich's "Nap-a-Minit" to any one suffering with teeth trouble. RAYMOND TYLER, 15 Seeley St.
