

HOUSEHOLD NOTES.

HOMELY WRINKLES.

Work up the old dry pieces of bread into bread puddings, soups or cream toast.

A child's thimble makes an admirable glove-darner when that convenient little article is misplaced.

A pancake turner is very useful in taking cookies from the board before baking and lifting from the pan afterward.

Now is the time to do much of the sewing for next summer. Choose the light colors to work on evenings and thus spare your eyes.

Keep your most restful chair in the kitchen. It is lots cheaper to sit than stand while waiting for something to cook or getting the vegetables ready for dinner.

Dangerous burns have been caused by using benzine in the presence of much heat. Always keep away from a lighted lamp or a fire with this liquid.

Ordinary slippery-elm bark is put up in tablet form and is quite useful. It will often allay an irritating cough, and at all events is a cheap and harmless remedy.

Carron-oil, which is much used for burns, is made of lime water and sweet-oil, equal parts. If ten drops of carbolic acid be added to each ounce of the mixture so much the better.

It is said that the fumes of burning camphor gum will relieve a cold in the head. Place a piece of the gum in a saucer; crush into granules. Apply the match and after burning a moment extinguish the flame. The fumes may then be inhaled.

In washing a sore, never let the dirty water run back into the wash bowl. Either apply with a bulb or fountain syringe, or dip pieces of absorbent cotton into the water, rub over the wound or sore, then throw away each piece as fast as used. Many prefer using a syringe.

Cleaning Dining Room Tables. Copper cooking utensils and zinc bath tubs can be kept nice and bright by cleaning them every now and then with a hot solution of salt and vinegar.

If very dirty, they can be scoured first with soap and ashes. Kerosene will make tin kettles as bright as new, but they must be well washed in soap and water to get the kerosene taste out. Dishes discolored from being put in the oven may be cleaned with either a little whiting or soda, rubbed on with a damp rag. Any tin pans or dishes, if rubbed over with fresh lard and heated thoroughly in the oven, will never rust afterward. Thus treated, any tinware can be constantly put in water, and yet remain comparatively bright and quite free from rust.

Chocolate Fudge. One cake of unsweetened cooking chocolate, which is one-half pound, cut into small pieces and mixed with two pounds of brown sugar, one cupful of milk, and a quarter of a cupful of butter. Let these come slowly to a boil, then stir constantly to prevent burning until done, which will be when a little dipped into cold water will harden. Usually it should boil about ten minutes. Then remove from the fire and beat briskly for about five minutes. Pour into shallow pans to cool, and before the candy becomes hard cut into squares.

PURE MILK. In nothing that is bought for human food is the necessity of cleanliness and purity more manifest than in milk. Meats and vegetables are for the most part thoroughly cooked before they are eaten, fruits are peeled and nuts are shelled; but milk is more or less injured in flavor and in nutritive properties by boiling, and it has no protective covering to keep it clean. It is therefore essential for the consumer to know the history of the milk he gets.

In view of the importance of this question the provider for the family should if possible himself inspect the dairy his milk comes from, and should satisfy himself that perfect cleanliness is the rule in every stage. The cow barn should be well ventilated and sunny, the cows should be healthy and clean, the milk should have well-washed hands, the udder should be washed before each milking, and the pail for receiving the milk should always be recently scalded or, better, actually boiled. The receptacles containing the milk should be immediately cooled, and the milk never allowed to get warm again until it is delivered at the customer's house.

In many dairies and farms all these essentials are now strictly observed, and if the milk is then bottled at once and the bottle is kept sealed until delivered, one may feel reasonably certain that the milk is fit to drink. If this certainty is denied one, especially if there are young children in the family, the only recourse is sterilization. Boiling for a few minutes will kill all germs, but at the same time it kills the milk, which becomes a different fluid and, as many physicians believe, less nutritious than raw milk.

Another and less objectionable process is what is called "Pasteurization," which is meant keeping the milk at a temperature of about 170 deg. for twenty minutes, but never letting it come to a boil.

Either boiling or Pasteurization will destroy the germs which cause acid fermentation or putrefaction, as well as the germs of tuberculosis; but if these changes have occurred, boiling will not annihilate the poisonous

STRUCK DOWN.

Slain in the Hour of Success.

The Indian who trailed the hunter silently and secretly through the woods, often played with his victim as a cat plays with a mouse. Just in the moment of the hunter's success, the blow fell; silent, sudden, swift.

There are certain forms of disease which seem inhumanly malevolent. Like the Indian they seem to play with the victim, until some day when he has reached the height of success and is thinking to "take life easy," disease strikes him down, perhaps never to rise again, or mayhap to drag out the remainder of existence in physical pain and privation.

The best example of such a malevolent disease is found in dyspepsia and allied forms of "stomach trouble." Not long ago the newspapers were calling attention to one of the richest men of the age working in his garden like a common laborer for his health's sake and for the same cause living abstemiously on a diet which a laborer would despise. There was a conspicuous example of the class of people whose success seems almost failure. But how many people are struck down in the hours of success, no man can absolutely say. Stomach "failure" means heart failure, the failure of kidneys, liver, lungs and any other organ, inasmuch as each and every organ of the body is dependent on the stomach for its nutrition and therefore for its vitality. For this reason no vital statistics can ever give the number of those who fall victims to disease of the stomach and the other organs of digestion and nutrition, because the cause of their disease is charged to other organs diseased through the stomach.

WHAT'S THE MATTER WITH YOU? Is it "weak" lungs, "weak" heart, kidney "trouble," liver "trouble" or disease of any other organ? You will find that in general, if you trace the disease back it originates in a diseased condition of the stomach and its allied organs of digestion and nutrition. The best proof of this is that diseases of heart, liver, lungs, kidneys, etc., are constantly being cured by Dr. Pierce's Golden Medical Discovery, which is primarily and chiefly a medicine for the cure of diseases of the stomach and of the blood. The body and all its organs are sustained by food, properly digested and assimilated, which when converted into blood forms the nutrition by which physical life is renewed day by day, and meal by meal.

products already formed; it will not make bad milk good. The addition of any of the various "preservatives" to milk is only an exchange of one poison for another, and should be condemned.

STATE NEWS. A Brief Summary of News Gathered from All Parts of the State.

The State fish hatchery at Sultan last year distanced all others in the State by a hatch of 3,600,000 fish.

Several cases of amplexor are reported among the laborers on the railroad construction work below Hoquiam.

One hundred thousand sheep have been shipped out of the Yakima valley during the past year to Eastern and Puget Sound markets.

The Weyerhaeuser syndicate began cutting, this week, an order for 1,000,000 feet of lumber in the newly purchased Bell-Nelson mill at Everett.

Albert W. Reed, formerly of Pentigo, Wis., arrested at Snohomish on a charge of insanity, cut his throat in his cell with a pocket-knife, Saturday, and died soon after.

Within the past ten days nearly 1,000 bales of hops have been sold in the Yakima valley, which leaves but 1,038 bales in the hands of the growers, after a crop of 14,000 bales.

The Post-Intelligencer building was sold at Seattle, Monday, by Edward Bailey of Harrisburg, Pa., to the Hamm & Schmitts Land Company of Seattle. The price paid was \$165,000 in cash.

The annual school of dairying at the Washington Agricultural College began Monday for a term of eight weeks, under the management of Prof. J. L. Harris, instructor of butter-making.

Four Spokane banks declared dividends last week amounting to \$59,000. The bank clearings for Spokane for the past year were \$58,856,224, an increase of 4 per cent. over the preceding year.

The logging dam on the Washkah river, in Chelalis county, is a failure, and several hundred thousand dollars worth of logs will be unavailable from want of means to transport them to tide-water.

The oystermen at South Bend lost heavily by last week's storm. The sand washed in on the oyster beds, and smothered the bivalves, which were not thus "sanded" were piled up in ridges by the storm.

James R. Cone, a Sergeant of the artillery company stationed at Fort Canby, was drowned at Ilwaco, on the 3d inst. He had been spending the day at Ilwaco, and had been drinking heavily. When he went to the wharf to take the boat back to the fort he fell into the river and was drowned.

But when the stomach and other organs of digestion and nutrition are diseased, the nutritive properties are not extracted from food, the blood becomes poor, the body lacks adequate nourishment and the flesh "falls away." The weakness consequent on this loss of nutrition will generally find its expression in some one organ which has been longest starved. Thus as starvation causes weakness, when the nutrition falls short of the needs of the body we may look for the expression of that weakness in some one organ—lungs, liver, heart, kidneys, or any other vital organ of the body. When the nutritive food is not absorbed by Dr. Pierce's Golden Medical Discovery, then the diseases of other organs which originated in the disease of the stomach are cured also.

WHAT PEOPLE SAY. "Your 'Golden Medical Discovery' and Dr. Sage's Catarrh Remedy have been of great benefit to me," writes (Prof.) Pleasant A. Oliver, of Vista, Fulton Co., Ark. "Before I used the above mentioned remedies my sleep was not sound, and I felt a continual feeling of misery. I now feel like a new man."

"I have been writing your 'medicines' to Mrs. W. M. Bowers, of Lynch, Boyd Co., Neb., and I can say enough in their praise. They have helped me more than all our doctors have helped me in two years of doctoring. I spent dollars upon dollars for my lungs and received no benefit from the medicine I took, until a lady friend advised me to write to Dr. Pierce. I did so, took his kind advice, and am now so well as to be able to do my own work. I also took the Golden Medical Discovery and the 'Felle's' six months for liver disease and indigestion, as the kind doctor advised. I know that they reached the case, as they have helped me so."

"I have taken your medicine with the greatest satisfaction," writes Mrs. George Riehl, of Lockport Station, Westmoreland Co., Pa., "and can honestly say Dr. Pierce's Golden Medical Discovery has cured me of a pain in my right lung that the best working in his garden like a common laborer for his health's sake and for the same cause living abstemiously on a diet which a laborer would despise. There was a conspicuous example of the class of people whose success seems almost failure. But how many people are struck down in the hours of success, no man can absolutely say. Stomach 'failure' means heart failure, the failure of kidneys, liver, lungs and any other organ, inasmuch as each and every organ of the body is dependent on the stomach for its nutrition and therefore for its vitality. For this reason no vital statistics can ever give the number of those who fall victims to disease of the stomach and the other organs of digestion and nutrition, because the cause of their disease is charged to other organs diseased through the stomach."

"I am glad to testify to the benefits derived from Dr. Pierce's Golden Medical Discovery," writes Miss Belle Summerton, of San Diego, Duval Co., Texas. "I was troubled with very frequent headaches, often accompanied by severe vomiting; bowels were irregular and my stomach and liver seemed continually out of order. Often I could eat almost nothing, and sometimes absolutely nothing, for twenty-four hours at a time. I was entirely unfit for work, and my whole system seemed so run-down that I feared a severe cold spell, and was very much discouraged. I was induced to try Dr. Pierce's Golden Medical Discovery and did so with such satisfactory results that before finishing the third bottle I felt perfectly able to use the duties attending public school life, and contracted to do so."

A VALUABLE MEDICAL WORK, CONTAINING MORE THAN ONE THOUSAND PAGES FREE. Dr. Pierce's Common Sense Medical Adviser, containing over one thousand large pages and more than 100 illustrations, some of them lithographed in colors, is sent free on receipt of stamps to pay expense of mailing only. Send properly one-cent and ten-cent stamps, or only 21 stamps for the book in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

Sophia Nelson, wife of Ole Nelson, living near Edgewood, in Pierce county, committed suicide, on the 4th inst., by taking strychnine. She told her little girl she was going to a neighbor's, but when her husband came home at night inquiry disclosed she had not visited the neighbor, and search resulted in finding her body in the hayloft with a bottle of strychnine near her. She was 46 years of age and had been dependent.

William A. Seaton was hanged at Seattle, at 8 o'clock on the morning of the 3d inst., as the penalty for the murder of his uncle, Dan Richards, at South Park, Dec. 6, 1900. He showed no fear when summoned to the scaffold. On the scaffold he said in a firm voice: "Gentlemen, you all know what I am here for. I know not the circumstances that brought me to my present position. I trust you will forgive me for what they say I did, as I forgive everybody. I want to say before I die that I have no feeling of animosity towards Sheriff Oudihoe or any officers with whom I have associated while in prison."

His crime was as follows: About dark, between 3 and 4 o'clock on the afternoon of Dec. 6, 1900, Seaton, armed with an ax, brained his sleeping uncle, Dan Richards, severely wounded Myrtle Haggood, aged 5, and seriously cut his sister, Mrs. Roy Clarke, aged 22. He slightly wounded a neighbor, John Kennedy, and received a pistol wound in the neck while resisting arrest.

Sleeping Apartments. Eight hours out of the twenty-four, one-third of every day, are spent in sleep. Twenty years of absolute unconsciousness in an average human life! How much the usefulness and extent of that life are determined by the quality of the air breathed while asleep who shall say?

Twenty years of soft, unconscious respiration, not the vigorous breathing of active consciousness. Twenty years of semi-apnoea of repeated inhalations of one's own effete, tainted breath mingled perhaps with that of another, twenty years of carbonic acid poison, or twenty years of life-giving ozone—which will you choose? Think of it every night when you go to bed. "Close bedrooms," says Dr. Hall, "make the graves of thousands."

There is a tradition to the effect that night air is injurious. What air can you have at night but night air? No noxious gases arising from the earth's surface at night, where there is no sunlight to dissipate them, are half so deadly as the emanations from the body.

If air were taxed we should probably use it more lavishly to get our money's worth; but, being free, we are content to take it as we do some medicines, in homeopathic doses.

THE Old and Reliable GROCERY AND PROVISION STORE 119 Fourth Street. REDER & PHIPPS, PROPRIETORS

THE MOST COMPLETE STOCK OF Staple & Fancy Groceries

In the city, and the constant endeavor is to maintain the reputation this house has always enjoyed for quality of goods, fair prices and promptness in filling orders. The fullest and most complete line of CROCKERY AND GLASSWARE in stock.
