It is said that Gov. McBride has gone to New York from the World's Fair, and that he will not be back till after election. Those who have admired the Governor's positive nature will be surprised and disappointed at this action, which is about on par with stepping across the line to escape the draft in war-times.

Arrangements will be made with E. T. S. Kallstrom to return trip same night after Tenino meeting, \$1 for round-trip.
August Schneider a few days ago preferred a misdemeanor charge against his brother, Albert Schneider. It appears that the former drove his team and wagon into the woods west of this city to the end of a wood pile, and while in there Albert cut several trees that fell across the road and pinned up his brother's team. August was compelled to unhitch and leave his wagon to the dangers of forest fires.
James K. L. Mitchell, who is East, was in the train wreck in Chicago on the 17th inst., in which number of people were killed and maimed. He writes his father, Dr. Mitchell, that the car in which he was riding turned completely over, but he was not injured and crawling out of a window, was the first man who went to the aid of the sufferers. Five cars were piled up in a heap, and among the killed were both firemen and engineer. Mr. M. will be home next week.
John Kendall and Henry Wood, the well drivers, while driving a team near Plum Station, Monday, the tongue of the wagon slipped out of the hitch and fell to the ground, frightening the horses, when they started to run throwing the tongue under a log at the side of the road. The sudden stop of the vehicle caused the occupants to fall over the tongue with great force. While Mr. Wood was but slightly injured, Mr. Kendall received a severe cut across the side of the head, having struck the corner of a log in the fall.
Tom Ismay had a bout with Will Morford, a car conductor, last Monday, which resulted as usual, in defeat for the local "statesman." It is reported that Tom insisted on exercising his "Americain" right of smoking on the rear platform, while the company insists that the front platform is the proper place for such indulgence. When the conductor laid down the rule, Tom expressed doubt in his most positive vernacular, and the man who rings up fares protested with what is known since the gloom contest as a "bunch of fives," and Tom left the car.
Vance & Mitchell have filed suit in the Superior Court of Pierce county for A. P. Perry against the Tacoma Mill Co. for \$7,400, and the Fidelity & Deposit Co. of Maryland for \$3,000. Action is brought to recover damages alleged to have been sustained in an attachment suit against Perry in May, 1901. He alleges that his sawmill and logging camp at Tenino were tied up for five days by reason of the same, and that his credit and business were injured by garnishments served on the State Bank of California and the Northern Pacific. Perry alleges that he secured dissolution of the attachment, which was upheld by the Supreme Court.
School census returns just completed by the State Superintendent of Public Instruction show that there are 192,347 children of school age in the State, of whom 160,898 are enrolled. Of the enrolled pupils 81,749 are males. The schools of the State for the year ending June 30, 1904, expended \$2,294,250 in teachers wages, employing 43,137 teachers. In repairs, fuel and incidentals, the sum of \$508,733 was expended and for furniture, buildings, sites, apparatus and libraries \$859,467. The total amount expended in the year to maintain the schools, including taxes, and warrant interest, and all items mentioned above, was \$4,158,447.55.
Judge Linn has ruled that A. W. Ritchie, who is attempting to "Goss" the State out of some \$12,800 for services as an expert witness in the infamous Goss case, and \$600.20 for mileage, fees to and from Spokane, to help restrain the attempt of the contractor to exact large sums over and above contract price for the abortion he has created, bristling with blemishes and defects. As a judgment was refused on the ground of an informality of presenting the claim, neglect to first submit it to the Auditor for allowance, there is a probability that it may "bob up serenely" along with two other neat little nest eggs—\$1,400 for preparing plans for erecting metal floors, and \$1,500 for plans for the furniture. If the architect and contractor's ideas of such matters are allowed, all the need of a lifetime will be "got in" in some public work and retire with a competency to life. Out upon such instances of public plunder! Where are the guardians of public rights amid our executive and judicial officers?
"Sweet Clover," presented at Olympia Theater, Monday night, is one of the delightful plays staged by competent people, which occasionally visits our city now. Otis B. Thayer, in the character of Jerome Holcomb, and Gertrude Bondhill as Lois Holcomb carried the leading parts in an exceptionally creditable manner, and the support was all good. In the cast we recognize several old-time favorites. Mr. Thayer was a member of the Calhoun Opera Co., at its first appearance in this city in 1895, and Clara Tapfield appeared at a still earlier date with Daniel Sully, in his "Corner Grocery." While all the costumes worn by the ladies were exceedingly beautiful, and costly wistal, a necklace and shawl worn by Miss Tapfield in the second act possesses more than intrinsic value. The former is an heirloom brought over by an ancestor in 1634, and the latter was once the property of a lady-in-waiting in the house of the Duke of Kent, father of Queen Victoria, and was brought over to Halifax, N. S., in 1665, and was presented to its present owner by a very dear friend. The company left here Tuesday, for Portland, where they appear at the Marquam Grand.

SAN FRANCISCO SHIPPING IS NOW menaced by an unusual danger. A stray torpedo is floating about in the offing lost by the U. S. submarine boat Pike, while engaged in experimental work in San Pablo bay under direction of Lieutenant MacArthur. Two were lost but one was recovered by an Italian fisherman, and a reward of \$250 is offered for finding the other.
THE battleship Nebraska will be launched at the Moran yards, Seattle, next Friday.
TAMMANY is planning to send Chas. A. Towne to Congress to succeed Hearst.

Low stocks for rail shipments should mean higher prices. It is conceded by buyers that stocks are light in lumber and shingles.
British Columbia loggers will not be allowed to send across the international line logs that have been cut on crown lands. A recent decision of the government has been made on this vexed question. The ruling will make logs cheap in the province.
The year 1904 has been a bad one for wholesalers. This is especially true in the red cedar trade. Margins have been practically obliterated. There has been nothing in the conditions to warrant anyone entering the wholesale lumber trade. Nevertheless, there have been some additions along the line.
Coast lumbermen should keep a sharp lookout for the lumber and timber needs of the Isthmian Canal. Already two large orders have been placed for yellow pine. The southern lumbermen have been warm advocates of a canal. They are cutting off a few coupons early in the game.
If it lies within the limits of possibility, every shingle should be made with a smooth butt. It must be acknowledged that many Coast shingles are as ragged on the butt as they would be if cut with a horse-rap. If there be any kind of a saw or device that will make smooth butts it should find a place in every shingle mill.
Lumber manufacturers should realize that an increase price to a level profits are attractive to the outsider will always result in the addition of new competitors. It is a fact in over production. It has been argued by some mill men that the better prices obtained by not only the cargo mills, but the car mills in 1902, attracted so much outside capital and investment that a consequent increase in over production. G. F. GOODRUE.

Mrs. Eber J. Kelley of Kettle Falls, last week, met with a singular accident. She was using the sewing machine and the needle was run through the finger at about the center of the nail. The needle in striking the bone broke, leaving the point in the finger. The other portion of the needle passed around the bone, through the finger, pinning her last to the machine. Mrs. Kelley was alone. Her cries brought her husband from the store below, who, with assistance, took the machine apart to release the unfortunate sufferer, it not being possible to get the finger or needle loose in any other way.
