"With Him Twain"

"Twain," you remember, means "two," and the ancient injunction was when compelled to go a mile to go twain.

The idea is more practiced today—in the modern spirit of service that is permeating all business—than ever before in the history of the world.

Banks have been not a whit behind other institutions in advancing to the principle of doing the utmost possible good to the customer.

The idea has always been one of the ideals of this Bank, which now, after more than twenty-five years of the strength and prestige of successful service, is peculiarly able to translate the thought into deeds.
