R. G. Esterly was out to the farm part of last week. He took in a few sacks of sawdust to feed his hens. Grain is too high.

Robert Whitham went to Seattle last Saturday, returning Monday. We are having an unusual amount

Seed Corn

Every agency for the upbuilding of our community recognizes the necessity of increasing production.

Every community permanently prospers in the proportion to their production.

Our section has greatly increased its production, but we can yet speed up our output a large percentage.

Last year's crops were generally short and prices are high. An effort should be made this year to increase their volume and it can be profitably done. This bank will try to help. Raising more feed for stock will help us all.

We have purchased a quantity of tested seed corn, grown in this climate and west of the mountains. Our stock consists of three varieties.

As long as our supply lasts we will give to any farmer who will cultivate his crop, seven pounds of seed. The County Agent has expressed his willingness to co-operate in every way possible to make a crop.

This quantity of seed will not grow a large amount of corn, but it will give you an idea of the kind best adapted to your needs.

For further particulars call in person, by phone, or write
