## Learn the Barber Trade

THERE ARE HUNDREDS OF OPPORTUNITIES today in the barber trade. The demand for barbers is far in excess of the supply, and the wages are higher than ever. Why not learn a trade that is profitable? The barber trade is quickly and easily learned. (We teach you in eight weeks). It appeals to the old and the young. The young man or woman starting out life's journey can make big money at this trade. The man or woman who has passed the middle stage of life can become independent by opening his own shop, and feel secure in the fact that he has something for a rainy day. When you have finished your course with us we will positively secure you a position; or, if you want to start your own shop we will help you, which, if desired, can be done on the installment plan. There is a golden opportunity awaiting you today. Do not hesitate and say in a few years hence: "I am sorry that I did not learn the barber trade." If you want to learn a trade that pays good wages, a trade that you can become independent at, a trade that you can work at the year around, we can teach you.
