-An Individual Car

To the very smallest detail, the Chevrolet reflects the ideals of the makers to produce a really high-grade car at a popular price.

That the Chevrolet is more commonly compared with cars selling at much higher prices is justification for the conscientious effort of its manufacturer.

The new model Chevrolet "Four Ninety" Touring Car and Roadster, attain a standard of excellence uncommon of cars at these prices. This is a claim we would be delighted to prove—we could ask no greater favor than to do so.

Would you have a good-looking car? The Chevrolet has it in full measure. Would you have strength? Vanadium steel is used wherever unusual strength is required. Would you have comfort? Proper spring suspension together with comfortable upholstery and roominess meet your comfort-wishes to the fullest degree. Would you have power and low upkeep? The wonderful valve-in-head motor with which each Chevrolet is equipped provides power far in excess of ordinary requirement or emergency; and the direct-application-of-power principle insures maximum power on minimum fuel. Twenty-five miles per gallon is a common thing for this Chevrolet. And the car is fully equipped.

Suppose you let us demonstrate that we have not overstated Chevrolet quality.
