CLUB DAY FESTIVAL ATTRACTS CROWD

SIXTY OLYMPIA BOYS AND GIRLS JOIN THROG AT PUYALLUP EXPERIMENT STATION

Fully one thousand boys and girls attended club day festival at the Puyallup Experiment Station last Friday, July 23. Of this number about 60 were from Olympia. This was a good showing indeed for our city. They were accompanied by F. R. Klumb, president of the Olympia Chamber of Commerce, De Fore Cramblitt, principal of the Lincoln school; Mrs. W. W. Manier and others who had contributed cars for the occasion. They more than filled the five big cars. The county school clubs also sent representative delegations.

At Puyallup the visitors, who also included boy and girl club members from Western Washington generally, were the guests of the State College summer school and experiment station. They joined in a big parade, played games, examined a fine display of school work, were shown all over the experiment station farm.

The Pathe Weekly took moving pictures of the parade and other events. An elegant and substantial luncheon was provided for the youngsters, an especial feature of which was one pint of milk for each child. This milk was furnished as a part of the national campaign of "More Milk, Healthier Children." The Pathe Weekly also filmed the children while at luncheon, especially showing each child with a bottle of milk. This national movement for more milk is being pushed in Pierce county. School clubs represented were the canning, garden, cooking, sewing and animal and poultry. Their visit is part of the annual entertainment provided at the summer school and experiment station to instruct boys and girls in the various branches of club work and increase their interest in agriculture and animal and poultry raising.

The trip was a very successful one and the youngsters all enjoyed as well as profited by it.

CALVIN DUNHAM DIES.

The sad intelligence of the death of little Calvin Dunham, 9-year-old son of Mr. and Mrs. Fred C. Dunham of Spokane, was received by telephone this morning by Mr. and Mrs. O. M.

Dunham in this city. A letter, which had been written Sunday, arrived this afternoon and told of his illness of blood poisoning which in all probability resulted from a bruised shoulder which he received in a fall about a month before. His shoulder began swelling Wednesday and the result was death from blood poisoning.

Mr. Dunham and his family left here in May for Spokane, he having held a position in the land office for some time before leaving here. Their many friends in this city will sympathize with them in this their great sorrow.

Mr. and Mrs. O. M. Dunham will leave this evening for Spokane to attend the funeral.

NEW TARIFF FILED BY RAILROAD COMPANIES

Increases Class and Commodity Rates Between All Stations West of Cascade Mountains.

The North Pacific Coast Freight Bureau, representing the principal railroads of this state, has filed tariff No. 1-A, effective August 25, 1920, increasing class and commodity rates between all stations west of the Cascade mountains.

For example, the first-class rates between Seattle and various distributive points in western Washington are increased as follows:

Between Seattle and—	Present	Proposed
Portland	37 1/2	86 1/2
Chehalis	45	60
Centralia	45	57 1/2
Aberdeen	37 1/2	74
Hoquiam	37 1/2	75
Olympia	31 1/2	65
Tacoma	25	35
Everett	31 1/2	32 1/2
Bellingham	37 1/2	60
Vancouver	37 1/2	84

Corresponding increases apply to other classes as well as to special and distance commodity rates applying on food products, fuel and various other commercial products, including articles of manufacture and the classification thereof, in addition to the cancellation of certain commodity rates now in effect.

The bureau has also filed proof copy of its proposed tariff No. 29, naming increased commodity and distance rates on saw logs, carloads, between stations on the lines of the principal railways operating in Washington, Oregon and Idaho, and increasing the minimum carload weights applicable in connection therewith, in addition to the cancellation of various special rates now in effect.

WHAT RECLAMATION OF COLUMBIA BASIN MEANS

Addition to Our Producing Lands of an Area Twice as Large as Rhode Island, Larger Than Porto Rico and Greater Than Reclaimed Lands of the Nile.

An irrigated area greater than the Babylonian plains, more extensive than the original reclaimed areas of Egypt and richer than either, larger than the state of Delaware and as large as Porto Rico—a construction work second only as an engineering accomplishment to the Panama canal!

This is the Columbia Basin project in Washington in prospect. In the development program for this area of 2,000,000 acres of approximately 3,000 square miles, representatives of the states of Washington, Oregon, Idaho and Montana are to gather at an irrigation and development congress to be held in Seattle, September 16 and 17.

Agricultural prosperity of the undeveloped portions of the West depends largely upon an adequate supply of water for irrigation. Water rather than land is the primary unit of value in the development of arid regions. In the eastern part of the state of Washington alone there are almost 3,000,000 acres of rich soil now barren and deserted—only awaiting application of water to produce a gross revenue of not less than \$66 an acre each year. When the Columbia River Basin project is developed it will produce before the third year, at the rate of an annual \$66 gross yield an acre, more than the entire cost of the construction and primary development. E. F. Blaine, president of the Irrigation Institute of Washington, the "daddy" of irrigation in Washington, says \$66 an acre is too low a figure in view of the Roseby Sunnyside and Yakima projects, for the former produced a gross revenue of \$167 an acre last season and the net return in 1919 was greater than the original cost of putting water on the land and putting the area in shape for crops.

Twice Size of Rhode Island. Just as a side issue to this great increase in production of food and wealth, engineers estimate that in addition to reclaiming an area more than twice as large as the state of Rhode Island the water after making possible the addition of a minimum of \$132,000,000 a year to the state's crop production can be used over to develop 1,600,000 horse power electric energy of that section.

Today, uninhabited, barren and a great stretch of volcanic ash—this area has the same soil as the famous Yakima and Sunnyside projects where orchard lands command \$1,500 an acre. Elwood Mead, soil expert of the government who also put in the Australian irrigation system, in a report to former Secretary of Agriculture Wilson said similar lava ash soil on the Pacific coast was the "richest of all in this nation."

A total of 6,250,000 acre feet will be diverted from average annual flow of 19,000,000 acre feet from the Pend Oreille river at Albany Falls near Newport, Washington, to irrigate 2,000,000 acres, and convert them into an empire almost equal in richness to the entire state of Washington.

Ample storage can be developed in had lake, in Montana, two of the Lake Pend Oreille, in Idaho, and Flat-largest inland lakes in the United States. Consequently the storage on the project is sufficient to provide a regulation of flow. The use of a portion of the waters draining from 25,000 square miles in the Rocky Mountains is contemplated by the Columbia Pacific Survey Commission, a board authorized by legislature and appointed by the governor to determine the feasibility of this great irrigation project. Engineering investigations show that the irrigation of the Columbia Basin is entirely feasible from the physical standpoint.

A Gigantic Engineering Feat. The project necessitates the construction of 56 miles of concrete lined main canal; 34 miles of tunnels, eight in number, the longest of which will be 15 1/2 miles and the shortest one mile. Forty miles of artificial and natural lakes will be

GEO. B. LOVELACE LOSES LIFE AT SEA

Former Olympia Resident Reported Missing From Effingham—Was Well Known in Northwest.

TACOMA, July 25.—George B. Lovelace, deck engineer of the steamer Effingham, bound for Egypt from Tacoma, was lost overboard on the trip down the coast, according to reports received here from San Pedro, Cal., where the vessel touched yesterday. Lovelace, who formerly lived in Tacoma, is believed to have fallen overboard, his shipmates said. His coat, gun and cap were found on the deck when search was started after Lovelace was missed. He leaves a wife, Mrs. Josephine Lovelace, living in Seattle, and a sister, Mrs. Guy Banta, living in Tacoma.

Lovelace was well known in Shelton and Olympia. For a number of years he was superintendent of the machine shops of a logging company at Shelton. Removing to Olympia, he engaged in the manufacture of logging supplies. Later he was employed by the Tacoma smelter and at the outbreak of the war went to work in the Seaborn shipyard and then at the Todd plant. He sailed from here first as deck engineer on the steamer St. Anthony, a Todd-built ship. He left here last Sunday with the Effingham, which is the steamer that brought Tacoma's German cannon to the city.

Mr. Lovelace built the machine shop now owned by Morris Berkowitz. It was one of the finest and best equipped of its kind in this section of the coast, being able to handle the camp locomotives, donkey engines and other heavy machinery. He sold it and went to Tacoma five or six years ago.

Mr. Schomber, who knew him well, speaks in the highest terms of Mr. Lovelace, who, he says, was a high class machinist and A1 man in every respect. His many friends here will hear with sorrow of his death.

DR. COUNTERMINE TO LEAVE SEPTEMBER 1ST

Pastor of United Churches is Considering Professorship at Albany Oregon, College.

Rev. James W. Countermine, pastor of the United Churches of this city has definitely decided to give up his pastorate here September 1st. He has had several other positions under consideration for some time among them being a professorship in Albany College, a Presbyterian institution under the direction of the Synod of Oregon.

A bulletin from the College for July announces the election of Dr. Countermine to the chair of Mathematics and Astronomy, and also the election of Mrs. Countermine to the position of Instructor in Spanish. Mrs. Countermine was a teacher in Porto Rico, under the Presbyterian Board of Missions.

To a standard representative Dr. Countermine stated that they had not definitely accepted the position offered, though they were taking them under advisement. It is a work for which they are well prepared, and would enjoy, but they would have to take into consideration several other things before deciding.

The Countermine have made many friends during their stay in this city who will be very sorry to have them leave. The best wishes of all their parishioners will attend them wherever they decide to locate.

"The President's Church."

Washington clergymen are wondering which will be "the president's church" after March, 1921. In the last eight years Central Presbyterian, where President Wilson worshipped, has held the coveted title. Senator Harding is a Baptist and Gov. Cox belongs to the United Brethren. Since his residence in Dayton, Mr. Cox has attended Christ Episcopal church in that city, of which Mrs. Cox is a member. Gov. Coolidge, republican vice presidential candidate, is a Congregationalist, and Franklin D. Roosevelt, his democratic opponent, an Episcopalian.

COX STRONG IN THE WEST, SAYS AMBASSADOR GERARD

DAYTON, July 26.—A quite Sabbath was had by Governor Cox. After an early morning horseback ride he attended Christ Episcopal church with Mrs. Cox and James Gerard of New York, former ambassador to Germany. Word of a strong democratic swing in the West was brought by Mr. Gerard, who urged a vigorous western campaign.

"I was very much impressed with the governor," said Mr. Gerard. "He will make a strong appeal to the country, particularly the progressives of the western country. When his record on progressive legislation in Ohio is known I am sure his strength will grow."

The League of Nations and other international affairs were discussed at length with Gov. Cox and Mr. Gerard said he felt sure the governor's position on the league would be one of the strongest democratic assets.

UMATILLA COUNTY SHERIFF KILLED BY DESPERADOES

Officer Shot by Prisoners, Who Are Successful in Breaking Jail at Pendleton, Ore.

PENDLETON, Ore., July 25.—T. D. Taylor, sheriff of Umatilla county, was shot through the breast and fatally wounded this morning when prisoners broke out of the county jail. Six men of seven in the jail escaped after overpowering Deputy Sheriff Jake Marin and shooting the sheriff.

Taylor was shot with a revolver which had been concealed in one of the jail cells.

Following the break from jail and the shooting of the sheriff the fugitives fled to the O. W. R. R. & N. railway tracks, where they boarded a freight train which they rode four miles east of Pendleton to Mission station. Here they left the train and fled into the wooded country.

The break took place at 10:40 p. m. and the desperadoes, after seizing guns and ammunition in the sheriff's office, bolted from the jail and ran to the railway tracks.

Sheriff Taylor died at 6:10 tonight from an internal hemorrhage. The bullet entered his chest, struck a bone and glanced off to his right, lodging in his lungs.

The jail breakers' names are: Neil Hart, Indian, 22, in jail after a fight with Taylor and Deputy Sheriff Marin in the hills near Reith last week, faced charges of grand larceny and attempt to kill; Jim Owens, Indian, charged with grand larceny, and attempt to kill; Jack Hatlie, 22, charged with robbing a store; Albert Lindgren, charged with "raising checks"; Richard Patterson and Lewis Anderson, alleged bad check passers.

All of the fugitives were awaiting action of the grand jury.

COLLEGE ALUMNI PICNIC AT PRIEST POINT PARK

University and State College Students and the General Public Take Part.

University and Washington State College students and alumni and many invited guests will enjoy a picnic dinner at Priest Point park this evening, beginning at 6:30. The dinner will be in charge of Mrs. S. Raymond Holcomb and Miss Myrtle Boone.

Dancing following the lunch, will commence at 8:30 and continue until midnight.

HOTEL MEN GATHER AT THE HOTEL OLYMPIAN

About thirty members of the Washington Hotel Men's Association meet in monthly session at the Olympian this evening, where they will banquet and later hold a business meeting.

Officers of the association who are in the city to attend the meeting are: D. W. Bass of the Frye, Seattle, president; Ray Hodgdon of the Hotel Seattle, Seattle, treasurer; T. D. Rockwell, secretary.

"BETTER SEED AND BIGGER CROPS" WORK

STATE COLLEGE SPECIALISTS EXAMINING WHEAT, AND PREPARING COURSE FOR PHYSICAL EDUCATION—BREEDERS OF DUROC SWINE ORGANIZE

WASHINGTON STATE COLLEGE, PULLMAN, July 26.—Thousands of acres of pure wheat, including Hybrid 128, bluestem, and Baart, and "Rosen" rye were recently seen in Walla Walla, Adams, and Franklin counties by the extension specialist in farm crops, the visitation being a part of the statewide "better seed and bigger crops" campaign started some time ago by the Washington Seed Growers' Association in co-operation with the extension service of the State College, and the farm bureaus of the various counties. The final certification of this seed, as to purity, will not be made until it is threshed. This wheat will be ready for examination as to absolute purity of seed by the middle of July.

In Franklin county there are at least 1,830 acres of Rosen rye, which standing now in the field gives assurance of quality and purity suitable for use as seed.

"Rosen" rye is a crop of Russian parentage, and was developed for American use, in Michigan. A few years ago it moved westward, and not long ago was introduced in dry central Washington by the county agricultural agents and farm bureaus. It is winter hardy, prolific, possesses a long head, and is good for hay and grain.

The reddish tinge, that is, a sort of rosy hue in the field, and many people think that this accounts for the name "Rosen." This is incorrect. Under conditions now obtaining in Franklin county on the farms named, Rosen rye is standing head high, or nearly that.

In Adams county a good deal of Baart and bluestem is being grown in small, pure seed lots from seed stock originally purified and furnished the growers by the State College.

Extension Physical Education. Plans are being completed here to give college extension courses in physical education in Spokane during 1920-21. The superintendent of the Spokane schools has approved the plans thus tentatively made. It is likely that the head of the department of physical education in the Spokane schools will conduct courses.

The work that has been planned thus far is arranged with a view to enable teachers to meet the requirements of the new physical education law of the state of Washington. The courses, as planned, are described as follows:

Course 1. A consideration of the theory and general practice of physical education method of teaching. Exercises with and without apparatus, selected and arranged to meet school conditions. Gymnastic and simple dance steps; games for the school room, for the yard, and for the gymnasium. Purpose of play. Once a week at the Lewis & Clark gymnasium.

Girls' Dormitories. Work is progressing rapidly on the two new girls' dormitories for the State College. R. C. McCroskey hall, on the campus, is being financed by state appropriation and the other is being paid for by the citizens of the community. It is proposed by the college authorities to have all freshmen girls entering the college this fall live in these halls. This will eliminate the necessity of housing the girls off the campus which has heretofore been a serious problem. Sophomore girls will have the opportunity of residing in these halls if they are not filled by the freshmen.

Duroc Breeders Organize. The Duroc Jersey breeders of Whitman county, meeting in the Animal Husbandry rooms of the State College of Washington on July 17, organized the Whitman County Duroc Jersey Breeders' Association.

It is planned to hold an association sale this summer and a bred sow sale

DON'T WAIT

RUSTY SHOULDERS are rare in THIS MAN'S TOWN. EVERYBODY has them—(the shoulders)—to the wheel heaving, pushing **BOOSTING** for OUR TOWN and neighborhood.

It is a community steadily growing in prosperity. The big reason for such growth is loyalty and SERVICE.

The business and public-spirited men LONG AGO realized that if OUR TOWN wanted to maintain a substantial position, their business must be built upon the foundations of CLOSEST RELATIONSHIP.

That relationship is possible through having SOMETHING to offer—and making the offerings KNOWN. It is the principle underneath "BOOSTING" our community.

A town is no stronger than its BUSINESS—the business of its merchants and neighboring farmers.

The way to show these honest, sincere merchants of town and country that you appreciate the stand they have taken, and are taking every day in BOOSTING this town—is to read their advertisements—patronize them. BUY YOUR GOODS of the men who are keeping our town in the prosperous habit.

In that way you'll be doing your BOOSTING.
