RED TRIANGLE OFFERS TEN FINANCIAL COMMANDMENTS

Y. M. C. A. Economic Program Emphasizes Points Essential to Individual and Group Success.

Every successful business man has been built on a basis of coming out ahead, not behind, nor just breaking even, according to Arthur M. East, director of the industrial department of the Young Men's Christian association. To help the individual worker to better himself and promote happiness in business and home relations, as the foundation of the economic program the following ten commandments have been drawn up:

1. WORK AND EARN. Be a producer. Realize the importance of your personal part in keeping the wheels of society turning. Know the deep satisfaction of adding to the world's wealth, knowledge and comfort. This spirit sweetens one's work and makes life worth while.

2. MAKE A BUDGET. Plan in advance so to spend every dollar that you will get fullest return and greatest satisfaction for every hour you work. Money is simply a counter—what you buy with your earnings determines what you actually get for your services. Budget spenders get more than do haphazarders.

3. KEEP A RECORD OF EXPENDITURES.

You can't expect to run your business of living if you keep track only of what comes in and merely guess at outgo. Every sane business keeps records down to "petty cash." Without such a record you do not know what you are working for. "Goodness only knows where the money goes" never helped anyone to get ahead.

4. HAVE A BANK ACCOUNT. Most financially solid folks pay by check—payment and receipt in one—safer to transmit than cash. Interest accounts guard money and help it grow. A good bank account is the best of references. The mere act of filling out a check makes you think before you spend. Money in a sock or pocket works for no one—money in the bank works for you and for general prosperity.

5. CARRY LIFE INSURANCE. Wiping out worry about "what will happen to them" will increase your present day efficiency and earning power. Insurance—family protection—is an essential element of a normal life. Modern policies provide savings and investment and old age security along with constant protection of the family.

6. MAKE A WILL. A properly drawn will insures that what you leave will go to those whom you choose. It is as if were the final deed to all you possess. A will saves court troubles, delays and expenses for small as well as large estates. With a will you select your own trustee to assist your dear ones. You leave your business instructions when you are to be away a few days—leave such instructions in your will when you go on your long journey.

7. OWN YOUR OWN HOME. A home is more than a house; it makes you an active partner in your community, increases your self-respect and makes for family stability. Owning a home adds to present-day savings and comfort and secures old age. It supplies a motive that makes saving easier and more pleasant. For your children's sake start now to own a home of your own.

8. PAY YOUR BILLS PROMPTLY. Pay your bills on pay-day. If you are paid every week, don't ask the grocer to wait thirty days or more. When you get goods on credit you obligate yourself to pay the bill when due. Every unpaid bill is a mortgage against your future time and work. Money spent in advance means that you have to work for something that is in the past. Work for today and for the future. Get square with yourself. Pay and save as you go.

9. INVEST IN RELIABLE BONDS. War Savings Stamps, Treasury Saving Certificates and Liberty Bonds not only afford a convenient means of saving but provide a guaranteed security paying good interest. Own something. Own stock in your government. Help others to become investors rather than mere spenders. Keep your bonds—don't sell or swap them without a banker's advice.

10. SHARE WITH OTHERS. Life that is worth living is a matter of folks and neighborliness and service as well as of food and shelter. No normal human being can be completely happy unless those about him are happy. The man who neither helps not is helped by his community might just as well be on a desert island. Invest in community welfare. Know the joy and satisfaction of supporting worthwhile institutions and movements. Give while you live.

WEST WILL SET MEN'S NEW CLOTHING STYLES

Styles in men's clothing will be set in the west, this year, for the first time in history.

At the second annual convention of the Pacific Coast Merchant Tailors Association, which meets in Los Angeles for three days, January 11, 12 and 13, fashions for the spring season will be discussed, together with problems of labor, prices and workmanship.

"This is the first meeting in the industry, this year," explained Sam G. Levy, president of the organization. "The national association meets in Chicago during the latter part of the month, but the national officers are waiting with interest to see what is done in the west. The ideas developed here will have a potent influence upon the action of that body in setting the styles for America in 1921"

More than 300 delegates from all parts of the Pacific Coast will attend the session. In addition, men prominent in the tailoring industry from the east, will be present to address the convention.

One of the most important topics to be discussed by the delegates, is the proposed program of co-operative advertising, which contemplates an expenditure of \$5,000,000 on a national scale covering three years.

President Sam G. Levy and Thomas H. Lipps, secretary of the Los Angeles exchange of the association, will leave for Chicago immediately after the convention, with the officers of the national association, to complete final details of the gigantic advertising program.
