The past month has been favorable for corn. Slight frost north of 40 degrees injured late corn, but the percentage of damage was generally very small, as the crop was well matured in the third week of September.

Potatoes were injured east of the Alleghenies by excess of moisture, causing rot. In West Virginia and Ohio similar reports are received. Drought reduced the yield in Michigan, though the quality is generally good.

The returns of yield per acre of wheat are in threshing measurement. This report is preliminary, as the local estimates will be tested by the record books of the threshers now coming.

condition will be heavily discounted, with a date later than the average a large crop will be gathered. The following State percentages are presented:

Dr. Smith said that he had no warning of the outbreak whatever; we did not even suspect it. There are 137 darkies employed in the phosphate mines and they were all sent from the city of Baltimore. The worst element of them were ship hands, who had been arrested for riotous and other offenses and sent there by the United States shipping commissioner instead of being sent to jail, so you can see that they were a pretty hard class of our people.

There was no protection whatever from bullets. Our men were only men of the street, netting and the walls were a mere shield of thin boards. Before we got into the house I fired into the mob that had Jones on the ground and hit one of them. They concealed themselves behind trees and stones, so that our fire had little effect on them.

The men who fell were Thomas O. Foster, Joseph Fales and William T. Shea. The blacks literally butchered them with knives and clubs. Mr. Foster was the superintendent. We reached a small house in which we hid for safety for the time, and in the interval the negroes ransacked and pillaged the superintendent's house, in which we first took shelter.

As soon as Judge McConnell took his seat on the bench State's Attorney Longenecker hurried from the room and the counsel for the defense looked at each other in surprise. The unexpected adjournment was the subject of excited comment and especially in view of the fact that extra detectives were stationed at the doors of the State's Attorney's office.

CHICAGO, Oct. 11.—Dan Carroll, the runaway witness in the Cronin case, was brought to the city last night by the police. After making his escape the man hastened back to Riverview and reentered the employ of Con Sullivan.

BRADFORD, Pa., Oct. 12.—At Davis Switch, a small village thirteen miles from this place, while the family of Patrick Daily were at supper, the father stepped to the cook stove to turn off part of the natural gas, but unintentionally shut the throttle tight and on turning it on again the house was filled with gas; an explosion followed and in an instant the entire house was in flames.
