THE ALABAMA CLAIMS. Renowned Amicable Settlement of the Enslaved. Our Government Thought to Have Partially Withdrawn Its Claim Against England for Indirect Damages.

The New York Evening Post thinks that the whole sixth chapter of our Alabama case to be heard at Geneva—that chapter which refers to the consequential damages caused by the prolongation of the war and the transfer of American ships to the British flag—should be put in simply as an argument in favor of the award of a gross sum, instead of the reference of the same to a Board of Assessors.

It argues that neither the American Government nor the American people expects Great Britain to pay for these consequential damages, and that they are only put in as an oratorical flourish of the lawyers. It is not at all probable that any Council of Arbitration would bring in a bill against Great Britain for the expense of a year or two of war, but the British Government refuses to allow the question to go to the Board of Arbitration, claiming an understanding that no claim for consequential damages was to be put into the case by the American Government. If our Government has no faith in its claim, why does it put it in? If it puts it in as an argument in favor of the award of a gross sum, why not say so, and let the case go on?

New York, April 8.—The New York Evening Post, which is regarded as semi-official authority on such matters, is referring to the rumors in the cable dispatch to the Associated Press to-day of the peaceable settlement of the differences pertaining to the Alabama case, says:

We have strong reasons to believe that our Government has conveyed to Great Britain an expression of its willingness to be excluded by agreement from consideration of claims for indirect damages from the arbitrators, at least so far as they demand an award. On this ground these claims must remain in the case as arguments in favor of the award of a gross sum, but not as claims for money to be paid us.

The proposition, the Post is informed, is in a form which the British Government can hardly in consistency accept, and therefore another week of final friendly feeling will be accomplished between the two countries as to the interpretation of the treaty.

London, April 8.—The Post says that a rumor prevailed last night that an important telegram was received at the Foreign Office from the Government of the United States, indicating that there was a prospect that the differences between England and America, growing out of the claims for consequential damages will be settled in a manner satisfactory to both nations.

A carpenter, being asked for a riddle, propounded the following: "I picked it up; I couldn't find it; I put it down and went along with it." No one could guess it. It was a splinter in his foot.

There is a universal expression of confidence in the virtue of the remedy known as Weeks' Magic Compound. The certainty and rapidity of its action upon diseases of the throat and lungs is remarkable.

THE QUESTION SETTLED.—Those eminent men, Dr. James Clark, Physician to Queen Victoria, and Dr. Hughes Bennett, of London, have discovered that Dr. Wistar knew the truth, he discovered that his own widely known Balsam of Wild Cherry, and his experience has proved the correctness of his opinion.

In the month of Miss Cassidy the death affliction, which she had long been suffering from, finally loses its main pillar, and the community an exemplary member of society. The family has the sympathy of all in their great loss.

She spoke of the realm of the blest. This country so bright and so fair. Was willing to go if it were best. And join her friends that were there.

A FATED CITY.

Once more the famous city of Antioch is reported to be destroyed. Of all the great cities of the earth there has, perhaps, never been one that has suffered a greater calamity. The population of this fated city, for two thousand years and more it has been the victim of earthquake, fire, sword and famine.

Antioch was built by Seleucus Nicator three hundred years before Christ and named in memory of his father, Antiochus. Fifteen other cities, also built by the founder of the Syrian monarchy, received the same name, but this one, on the banks of the Orontes, was the most magnificent and beautiful of them all.

It became very populous and wealthy, and its inhabitants were highly intellectual but also luxurious, studious and frivolous, refined and witty, but licentious and superstitious. Antioch was the Paris of the time. Pliny called it the "Queen of the East," and for several centuries it deserved the name.

In the time of Chrysostom, a native of Antioch, in the fourth century, it contained a population of 200,000, one-half of which were Christians, belonging to the church founded there soon after the martyrdom of Stephen.

But the hard fortune of Antioch had begun long before. The Jews, under Jonathan, one of the Maccabees, made war against Syria about a century and a half before the Christian era, and 100,000 of the people of Antioch perished.

In A. D. 11 while the Roman Emperor Trajan was on a visit to this Asiatic city, it was shaken by the first of the terrible series of earthquakes, and almost totally ruined. The Emperor himself was injured among thousands of others; but he exerted his influence and himself contributed liberally to its restoration, and it was rebuilt in its ancient splendor.

Only forty years afterward it was destroyed by a second earthquake, which in A. D. 170, while the Roman Emperor Trajan was on a visit to this Asiatic city, it was shaken by the first of the terrible series of earthquakes, and almost totally ruined.
