This money is used in the control and relief of tuberculosis. In the past few years a decided increase in the number of deaths from this disease has been noted. In 1911 the number was 413. In 1916 when the Vermont Tuberculosis Association was formed the number was 384. Since that time the number has dropped steadily except for the year 1918 until 1921 has the lowest number of all, 239. Will you help to keep the number growing less?

B. A. 54—GREENSBORO 16

Barton academy opened its basketball season last Friday evening by defeating Greensboro high 54 to 16, before a large audience in Durkee's hall. Both teams played well, notwithstanding the fact that this was their first game. The early minutes of the game found the teams battling evenly, but before the first half ended Barton had located the basket and had a commanding lead which they held throughout the contest. The feature of the game was the accurate shooting of Capt. Cornish and Lewis, the former caging 13 baskets and two foul throws, while the latter accounted for 11 baskets. Thompson and Batten played well for Greensboro.
